INTRODUCTION

We are happy to present by the grace of God this edition of the Brihat Samhita of Sri Varahamihira with an English translation. A look at the table of contents will enable the reader to gauge the wonderful depth and wide range of the author's knowledge. In this monumental work which can rightly be called a *Magnum Opus*, there is no subject which he has not treated of with dignity, beauty and grandeur. This work, in fine, is a valuable encyclopaedia, as it deals with an astonishing variety of subjects of exceptional interest and value. Albiruni, the Arabian astronomer who has translated the लघुजातक (Laghu Jataka) of our author into Arabic, eulogises this संहिता (Samhita) for its richness in details. It contains important astronomical data, geographical details, Architecture, Sculpture, Medicine, Psychology, Physiology, Physiognomy, Botany, Zoology, Prosody, figures of speech and other subjects. This work is unique in Sanskrit Literature. The author has made it extremely interesting in spite of its dealing with technical subjects. The author is a poet of a high order. We can also observe here clear traces of the influence of the great poet Kalidasa on this author. In fact वराहमिहिर (Varahamihira) must have been an ardent admirer of Kalidasa. This fact probably led people to believe that our author was a contemporary of the illustrious poet. Moreover, in the ज्योतिर्विदाभरण (Jyotirvidabharana), its author, a Kalidasa, says that he wrote it in 3068 of Kali Yuga or 33 B. C. and that he is a contemporary of Varahamihira. This work bears internal testimony of

composition at a much later date. This pseudo-Kalidasa apparently wanted to pass off for the real one and called himself a contemporary of Varahamihira. Varahamihira's literary acknowledgment to Kalidasa will be apparent from the following extracts :—

यत्राकृतिस्तत्र गुणा वसन्ति (Brihatsamhita LXX-23)

प्रायः शरीराकानुवर्तिनो हि गुणा दीपाश्च भवन्ति

(Brihatsamhita II-2)

ते दुर्जना मे मनसो वितर्कः (Brihat Samhita LXXIV-5)

यस्मिन् मनो व्रजति तत्र गताऽयनात्मा (Brihat Samhita LXXV-3)

योऽथ विचिन्तयति याति स तन्मयः (Brihat Samhita LXXV-4)

and verses 7 and 8 (The whole chapter is excellent)

मनो हि मूल हृदयमूर्तेः (Brihat Samhita LXXVIII-14)

The verses 1 and 2 in Adhyaya LXXIV.

All these lead us to believe in the author's admiration for Kalidasa. The metres employed by him point to his mastery of poetics and command of language. He gives various kinds of **दण्डक** (Dandaka) and **आर्या** (Aryas).

The author is a staunch adherent of scientific principles in Astrology. Out of respect for the ancient sages or masters of this science, he quotes their views and then states his own confirmed decisions in unmistakable terms (*vide* III-1, 2, V-1.17, and IX-6). He belongs to the group of first-rank scholars in scientific astronomy such as **आर्यभट्ट** (Aryabhata), **ब्रह्मगुप्त** (Brahmagupta) and **भास्कर** (Bhaskara). [The last two are posterior to him]. Varahamihira does not claim to be a pioneer in the field of Samhita. Before him, Parasara, Garga and others had

written Samhitas. He refers to them and sometimes quotes them and gives his views in addition, for the benefit of mankind (*vide* I-5). The *पराशरतन्त्र* (Parasara Tantra) is partly in prose and partly in verse of अनुष्टुप् (Anushtub) and आर्या (Arya) type. The geographical details given in Chapter XIV are taken with slight changes from this तन्त्र (Tantra). So, it can be said to be the geography of India at the time of Parasara. According to tradition, it was Varahamihira that fixed the sphere at the beginning of Aswini (*Cf.* III-1).

His style, though at times archaic, is simple, graceful and pithy, bearing the stamp of individuality and affinity to सुश्रुत (Susruta) and Kalidasa. That is the reason why he was ranked among the nine gems of the Court of Vikrama.

The author was the son of आदित्यदास (Adityadasa) of Ujjain (इ. ज्ञ. XXVIII-9). The Astronomers of Ujjain have held that वराह (Varaha) belonged to the 427th year of Saka era or 505 A. D. This date is confirmed by Albi-runi also as that of the composition of his पञ्चसिद्धान्तिका (Pancha Siddhantika). But Dr. Bhau Daji declares that वराह (Varaha) died in 587 A. D. Hence it should be concluded that 505 A. D. is the date of his birth and not of his composition. Scholars hold that वराह (Varaha) quotes आर्यभट (Aryabhata) who was born in 476 A. D. This also points to the above conclusion regarding the date of his birth. About the statement made in the ज्योतिर्विदाभरण (Jyotirvidabharana) we can only say that it was not written by Kalidasa, the author of Raghu-vamsa, etc. Probably there were many Kalidasas and one such was the one belonging to the 6th century A. D.

For, the **सत्रुञ्जयमाहात्म्य** (Satrunjayamahatmya) mentions a king **विक्रमादित्य** (Vikramaditya) as having ascended the throne in 544 A. D. Probably **वराह** (Varaha) and this neo Kalidasa were contemporaries of this Vikrama. Similarly **अमरसिंह** (Amarasimha) who is identified with **अमरदेव** (Amaradeva) that built the Buddha Gaya temple in about 500 A. D. is said to be a contemporary of our author. This too will lead to the above conclusion of his date. Many scholars from the days of Colebrook, Davis, Sir William Jones, Weber and Lassen have done much research work on Varahamihira.

According to Sage Garga, the Science of Astronomy-cum-Astrology was created by the creator himself for the sake of the twice-born as ancillary to the Vedas. It was handed down to Garga by Brahman, and from him, other sages got it and thus its knowledge was disseminated throughout the world.

It is but right that we draw here the attention of the readers to the erroneous judgment of many a western orientalist regarding Astrology and Greek influence. On the other hand, it is the Greeks who freely borrowed or learnt the various scientific truths from the Aryans of India. Clement of Alexandria calls Pythagoras, the celebrated Greek, a pupil of the Brahmanas. The Swami Vivekananda, the great spiritual and intellectual giant of modern India, has ably refuted the false theories of the Western Orientalists. He says :—

“There may be, it is true some similarity between the Greek and Indian terms in astronomy and so forth, but the westerners have ignored the direct Sanskrit etymology and sought for some far-fetched etymology from the Greek. That

such shallow and biased learning has been manifested by many orientalists in the West is deplorable. From a single Sanskrit Sloka that reads, 'The Yavanas are Mlechchas; in them, this Science is established; therefore, even they deserve worship like Rishis.....' in the west, they have gone so far as to declare that all Indian sciences are but echoes of the Greek; whereas a true reading of the Sloka may show that the Mlechcha disciples of the Aryans are herein praised in order to encourage them to a further study of the Aryan Sciences.....".

Only a sage can comprehend this Science. says our author (II-4). The present author does pay homage to the ancient authorities on this subject. He also just alludes to the various theories regarding creation propounded by the Sankhyas, Vaiseshikas, Meemamsakas and others and passes on to the subject on hand. The Science consists of three Skandhas or branches, *viz.* Ganita, Hora and Sakha (*vide* I-9). The treatment of the whole subject in all its details is said to be *संहिता* (Samhita) which itself means a collection. Accordingly Garga says that the Great Brahman who is well-versed in these three branches is said to be an expert in Samhita. But our author points out that he has already done justice to two of the branches, *viz.*, Ganita (गणित) and Jataka (जातक) in his पञ्चसिद्धान्तिका (Panchasiddhantika) and बृहज्जातक (Brihat Jataka) respectively (*vide* I-10). He gives in the 2nd Chapter the details of the *संहिता* (Samhita) thereby indicating that the term Samhita is independently used for the Sakha also by itself. But he gives a resume of the first two Skandhas also.

It has been stated (CVII-13) that this work consists of 100 Adhyayas, in Slokas 3900 when converted into

अनुष्टुप् (Anushtub) metre. Out of the 107 Adhyayas now printed in this book, the chapters on (1) वातचक्र, (2) रजो-लक्षणं, (3) अङ्गविद्या, (4) पिटकलक्षणं, (5) विवाहपटल (6) नक्षत्र जातक and (7) शास्त्रानुक्रमणी are apparently not his. These have been noted in their respective places.

The qualifications of an astrologer (Adh. II) are really very high and not within easy reach of ordinary mortals. The author says that a king should employ a chief astrologer assisted by 4 others. He is of opinion that no good people should live in a country where there are no good astrologers. The esteem in which the author holds them is indeed very great. He is equally strong in condemning pseudo-astrologers.

The chapters on Omens give a great deal of useful information. If man is careful in noting them when he goes out, he will be forewarned about the results of his efforts. The author says that (XLVI-2) the evil omens are the results of man's Karma in previous births and that they are intended to warn him.

There is a whole chapter giving various types of the आर्या (Arya) metre containing their Ganas and Yatis and also many varieties of Dandakas. Verse (LXVIII-112) is an example of good poetry.

The verse आसन्नघासु मुनयः is very useful in finding the time that has elapsed since the reign of the Pandavas. But here there is a doubt in the next line of the verse, where he says so many years intervene between Yudhishtira and the commencement of the Saka era. Some hold different views regarding this शक. Some say that it

refers to the विक्रमशक and others to the शालिवाहनशक. But in our opinion, it points to the latter.

The chapter entitled विवाहपटल was composed by one विश्वयवासी. द्वाकणल forms part of the मनुसंहिता. Manu is said to be one of the 18 ancient authors of Samhita. In मनुसंहिता itself, Manu's authority is recognised. This shows that Manu was a very ancient sage.

The author quotes a number of authorities in this Science: Parasara, Garga, Vriddha Garga, Kasyapa, Narada, Pitamaha Siddhanta, Saura Siddhanta, Paulisa Siddhanta, Vasishtha Siddhanta, Romaka Siddhanta, Vishnugupta, Asita, Devala, Rishiputra, Sukra (Bhrigu or Usanas), Maya, Brihaspati, Saka, Garutman, Saptarshi, Badarayana, Nagnajit, Saraswata, Savitra (a work), Shashtyabda (a work?), Manu, Viswakarman, Vajra, Sri Dravyavardhana, Bharadwaja, Kapila and Kanabhuk. In other works of his, the author quotes the following: Satyacharya or Bhadata, Manitha, Devaswamin, Siddhasena, Yavanacharya, Jeevasarman, Latacharya, Simhacharya; and Aryabhata.

Some hold the view that Garga and Vriddha Garga are one and the same person. But in XIII-2 and XLVIII-2, he mentions Vriddha Garga by name. The quotations of Bhattopala, the commentator, also prove that they are different persons. Cf. XXXI. Vriddha Garga is referred to in the Mahabharata also. We are of opinion that they are different. The मनुसंहिता which is otherwise known as बृहद्गर्गीय contains almost the same chapters with the same titles. In this work, there is a chapter entitled युगपुराण dealing with the Yugas. Asita

who was a great astronomer cast the horoscope of the Buddha according to Hieuntsang. Kasyapa also was a very ancient sage, who does not mention the Romakas at all.

From this work, it appears quite clear that वराह had already written his पञ्चमिद्धान्तिका and the बृहज्जातक (I-10) According to him, the होरा (Hora) should treat of horoscopy, questions about journey and marriage. The पञ्चमिद्धान्तिका which is based on the five Sidhantas has been published with an English translation by G. Thibaut in 1888. He seems to have written two other big works, namely Brihat Yatra and Brihat Vivahapatala. He has also written three smaller editions of these, viz (कृत्तु ?) खल्वज्जातक, लघुयात्रा and लघुविवाहपटल. The Brihat Jataka is very famous. Bhattopala has commented upon it. One महर्षि also seems to have written a commentary on it. Albiruni speaks of a commentary on it by बलभद्र (Balabhadra). This Balabhadra has written an independent astrological work from which extracts are quoted in the pages of Jatakaparijata. The लघुजातक which is also commented upon by Bhattotpala has been translated into Arabic by Albiruni as already stated above. Only two chapters of this लघुजातक are now available. The यात्रा according to Utpala contains 14 chapters. Dr. Kern has said that a manuscript copy of this work was with him. The copy now available has only 7 chapters and goes under the name of योगयात्रा. It is not complete either. Hence we may conclude that it might be the लघुयात्रा.

We know nothing about the author's विवाहपटल. Owing to its utter absence, the commentator has probably in-

roduced a chapter by विन्ध्यवासी*. The author has written a समाससंहिता which is known to us only from the quotations of the learned commentator.

The author's son पृथुयज्ञस (Prithuyasas) was also a great astrologer. He has written the षट्पञ्चाशिका and होरासार as far as we know. The latter is a very useful work giving many new ideas and has been utilised by Mantreswara in his Phaladeepika especially in respect of Ashtaka Varga (*vide* page 265 of that work).

The present work has the commentary of Bhattot-pala which is very exhaustive and helpful. It gives valuable quotations from many ancient authorities and the other works of the author. At the end of his commentary on the Brihat Jataka, he says that he finished his commentary on Thursday, the 5th day of the Bright half of the month of Chaitra in 888 of the Saka era-966 A. D. He has commented upon the योगयात्रा and also the षट्पञ्चाशिका of पृथुयज्ञस. His scholarship was deep and vast. He seems to have written a work भट्टेष्टपलहोराशास्त्रम् in 75 stanzas. He has also written a work-वास्तुविद्या (see P. 439). He was well acquainted with all the ancient works on Astrology, Astronomy, Poetics, etc. He is very frank. Where he is ignorant, he openly owns that. For example, in perfumery, he says his knowledge is very meagre. He holds our author in the highest esteem. Scholars all over the world should be grateful to this commentator for his having preserved by his quotations

*According to one tradition, this is Varahamihira himself as he was living in the Vindhyas before he went to the Royal Court.

many authors in this field whose works are now lost. We are not pioneers in presenting an English translation of this great work. Before us, Dr. Kern and Chidambara Iyer have translated it. But those editions are not available now. Moreover, they are deficient in some respects. They do not also give the translation by the side of the text.

We too might have nodded in certain places in spite of our care and scrutiny ; for, we are also human beings and this is a very big work whose publication has necessarily extended over a long period. We have given notes under the translation wherever necessary and not grouped the notes in an appendix to avoid the reader being put to inconvenience by referring to the concerned pages.

The author says at the end of the work, the course of the work and the Slokas it contains. Here Sloka means a श्लोक or 32 syllables.

It may not be out of place here if we tell the readers that in spite of the heavy cost of printing and paper, the price of this book has been kept sufficiently low in order to enable all classes of readers to have easy access to it. We take this opportunity to record our heartfelt thankfulness to Mr. V. B. Srikantaiya, Proprietor, Messrs. V. B. Soobiah & Sons, Printers, for printing this huge work promptly in a spirit of cordial co-operation and service to the Goddess of Learning, in spite of the scarcity of labour and consequent hardships.

Sloka 1.—The Sun who is the procreator of the Universe, who is the supreme being (soul of the Universe), who is the natural ornament of the sky and who is adorned with rows of thousands of rays that resemble molten gold, is flourishing supreme.

Sloka 2.—Being convinced of the correctness and truth of the voluminous science expounded by Brahma (the first sage), I now begin to write this scientific work explaining clearly its ideas in a way which is neither too brief, nor too copious.

Sloka 3.—Simply because this ancient work was composed by a sage, it should be good, while that written by an ordinary man of the present day could not be so. When the sense conveyed in both the cases is the same, while the words used alone are different, why should

there be any distinction between the two as it is a non-Vedic subject ?

The translation of a Vedic passage into any language is not as sanctified as the original though the sense may be the same. as the former lacks the शब्द (Sabda) or the sound of the original.

क्षितितनयदिवसवारो न शुभकृदिति यदि पितामहप्रोक्ते ।

Sloka 4.—It has been declared by our grand father (Sage Brahma) that the day of the week belonging to Mars—that is Tuesday—is not auspicious. People of our generation have also stated that the week day of Mars will not prove good (for beginning or doing any function). Wherein is the special merit in the two declarations of man and God ?

आब्रह्मादिविनिःसृतमालोक्य ग्रन्थविस्तरं क्रमशः ।

क्रियमाणकमेवैतत्समासतोऽतो समोत्साहः ॥५॥

Sloka 5.—Looking into the vastness of the science that has emanated from Brahma and others and its being epitomised gradually by successive sages, I also take pleasure in writing this work in a brief manner.

This science *viz.*, Astronomy-cum-Astrology was created by Brahman himself as ancillary to the Vedas. It was handed down from him to गर्ग (Garga) and other sages.

Cf. गर्गः

Sloka 6.—Originally, there was only darkness pervading throughout the universe. Then came water. From it sprang a blazing golden egg consisting of the two parts of the shell, *viz.*, the earth and the firmament. Out of this, it is said, arose Brahman, the creator, with the Sun and the Moon for his eyes.

Sloka 7.—Sage Kapila has declared प्रधान-Pradhana (the unmanifested Prakriti) to be the material cause of the universe, while Sage Kanada—who was the founder of the atomic theory relating to the origin of the Universe—has described the Dravyas—the nine substances—as the material cause. Some have opined that time is the cause of the universe. There are others who say that the universe was produced and is sustained by the natural and necessary action of substances according to their inherent properties (and not by the agency of a supreme being). Lastly, there are people who state that the actions—good or bad—of the beings are the cause of the universe.

Sloka 8.—Enough of this incidental discourse on a polemical and vast subject, and which, if it were to be discussed, would swell to a very great length and be of no avail to us for the present. I am now going to treat in a decisive manner of the principles of the science of Astrology—Jyotissastra—and the ancillary topics.

Sloka 9.—The science of Astrology consists of various branches and is in three sections or Skandhas—viz., गणित-Ganita, होरा-Hora and शाखा-Sakha, and the treatment of the subject in its entirety is termed by sages

संहिता-Samhita (compilation or collection). The first स्कन्ध or section where the exact movements, etc., of the planets in the several signs of the zodiac are ascertained through mathematical computation is otherwise known as तन्त्र-Tantra. Horoscopy is another section ; अङ्गविनिश्चय-Angavinischaya or locating precisely the correct position of the Lagna, etc., which is the first step in जातकर्म-Jatakakarma is the 3rd.

Sloka 10.—By me have been treated in detail in the करणग्रन्थ (Karana Grantha) पञ्चसिद्धान्तिका (Pancha Siddhanthika), of retrograde and direct motions of the several (non-luminous) planets from Mars onwards, their disappearance (eclipse) through proximity to the Sun, and their reappearance or emerging after conjunction with the Sun, their state of being at war or planetary fight. All things connected with horoscopy along with births, journeys, marriages, etc., have been already treated of in my previous works.

This shows that Varahamihira had already written Brihat Jataka, Yatra, etc.

Sloka 11.—Omitting queries and their respective answers which are not highly useful for our purpose, and also the origin of the planets and other unessential discussions, I am going to treat of real facts—the quint-essence of everything that is useful.

सांवत्सरसूत्राध्यायः । ॥२॥ The Astrologer.

१. अध्यातः सांवत्सरसूत्रं व्याख्यास्यामः ।

We shall now comment upon the aphorisms relating to an astrologer :—

२. तत्र सांवत्सरोऽभिजातः प्रियदर्शनो विनीतवेषः सत्य-
वागनम्रयकः समः सुभंहितोपचितगात्रसन्धिरविकलश्चारुकरचरण-

घोषः । प्रायः शरीराकारानुवर्तिनो हि गुणा दोषाश्च भवन्ति ।

2. The astrologer should be of noble descent, good-looking, modest in disposition, truthful, free from malice, impartial, with well-proportioned limbs all perfect and unimpaired, strong joints, undeformed, with fine hands, feet, nails, eyes, chin, teeth, ears, forehead, eye-brows and head, with handsome physique and a voice deep and sonorous. For, merits and demerits are generally the reflections of good and bad physical features.*

* Cf. Kumara Sambhava-Canto V—36.

दैवात्ययात् । ग्रहगणितसंहिताहोराग्रन्थार्थवेत्तेति ।

3. The following are the good qualities of an astrologer. He must be clean and active, bold and

eloquent, have readiness of wit, fully conversant with the details of the place and time and sincere in disposition. He should not be timid in an assembly, should not be overpowered by his fellow students, must be well-trained, should understand the heart of others, should be free from vices, must be conversant with the art of propitiation, with hygiene, magic and ablutions, should be engaged in the worship of the Devas, should be an observer of fast and penance, should be endowed with great power resulting from the wonderful achievements of his scientific knowledge, should be capable of answering questions put by others, and voluntarily suggesting palliatives and remedies regarding things other than the visitations of God. He should also be thoroughly conversant with works dealing with calculations of the positions, etc., of planets, Samhita, Horoscopy and their several details.

४. तत्र ग्रहगणिते । पौलिशरोमकवामिष्टसौरपैतामहेषु
पञ्चस्वेषु सिद्धान्तेषु युगवर्षायनर्तुमासपक्षाहोरात्रयामुहूर्तनाडी-
प्राणत्रुटिनुद्याद्यवयवादिकस्य कालस्य क्षेत्रस्य च वेत्ता ।

4. In that astronomical science, there are five schools, viz., Paulisa (belonging to Pulisa), Romaka (a Siddhanta, probably derived from the Romans), Vasishtha (belonging to Vasishta), Saura (belonging to Surya), Paitamaha (or Brahma Siddhanta), that is Siddhanta by Brahmagupta. In these are treated of all about Yuga, year, Ayana, Ritu, Masa, Paksha (fortnight), Day, Night, Yama, Muhurtha, Nadee, Prana, Thruti and its further subdivisions of time, and the astrologer should be conversant with all these and also with the ecliptic.

५. चतुर्णां च मानानां सौरसावननाक्षत्रचान्द्राणामधिमास- कावमसंभवस्य च कारणाभिज्ञः ।

5. He should also be familiar with the four kinds of measurements of time, *viz.*, सौर-solar ; सावन, a duration (day) intervening between the first rising of any particular planet or star and its corresponding next rising ; नाक्षत्र stellar calculation in terms of lunar months, Tithis, etc., with the occurrence of Adhimasa or intercalary lunations and intercalary days.

A सौर day is the interval between one sun-rise and the succeeding one. A सावन or terrestrial day is the interval between two contiguous risings of the Sun at the Equator. Thirty such days constitute a सावन month. नाक्षत्रदिन is the time taken by the Moon to clear a Star. A चान्द्रमास consists of 30 lunar Tithis and is a period intervening between two successive conjunctions of the Moon with the Sun. An Adhika Masa is a period of a lunar month occurring between two solar Sankramanas in the same Rasi. For this and अवम, see Suryasiddhanta.

६. षष्ठ्यब्दयुगवर्षमासदिनहोराधिपतीनां प्रतिपत्तिच्छेदवित् ।

6. He should be familiar with the computation of the commencement and termination times of the 60 year-period, the Yuga (5 year-period), a year, a month, a day, an hour and also of their respective lords.

There are 12 Yugas or five-year periods in a cycle of 60 years and their lords are stated as follows :

विष्णुः सुरेज्यो बलभिरुताशस्वष्टोत्तरप्रोष्ठपदाधिपश्च ।

क्रमाद्युगेशः पितृविश्वसोमशक्रानलाख्याश्विभगाः प्रदिष्टाः ॥

७. सौरादीनां च मानानामसदृशसदृशयोग्यायोग्यत्वप्रति- पादनपटुः ।

In the case of the several systems of measurements of time, *viz.*, Solar, Savana, Lunar, etc., he must be able to distinguish what are similar and what are not similar; and also be conversant with the aptness or otherwise of each for (being used for) any particular purpose.

८. सिद्धान्तभेदेऽप्ययननिवृत्तौ प्रत्यक्षसममण्डललेखासंप्रयोगाभ्युदितांशकानां छायाजलयन्त्रदृग्गणितसाम्येन प्रतिपादनकुशलः ।

8 In cases of difference of opinion among the Siddhantas regarding the actual termination of an Ayana, he should be able to reconcile them by showing the agreement between accurate calculation and what has been actually observed in the circle drawn on the ground through shadow and water-appliances.

९. सूर्यादीनां च ग्रहाणां शीघ्रप्रन्दयाम्योत्तरनीचोच्चगतिकारणाभिज्ञः ।

9. He should also be conversant with the causes that lead the planets from the Sun onwards to proceed in different kinds of motions—rapid, slow, southerly, northerly, towards apojee, perijee, etc.

Vide Sripatipaddhati—P. 48.

१०. सूर्याचन्द्रमसोश्च ग्रहणे ग्रहणादिभोक्षकालदिक्प्रमाणस्थिति-विमर्दवर्णादेशानामनागतग्रहसमागमयुद्धानामादेष्टा ।

10. In the matter of the Solar and Lunar eclipses, he should be able to predict by calculation the times of their commencement, cessation, direction, magnitude, duration, intensity and color as well as the Moon's prospective conjunctions with the non-luminous planets and their warfare.

११. प्रत्येकग्रहभ्रमणयोजनकक्ष्याप्रमाणप्रतिविषययोजनपरि-
च्छेदकुशलः ।

11. He should in the case of every planet be able to calculate its distance (in Yojana) from the Earth, the length of its orbit, etc.

१२. भूमगणभ्रमणसंस्थानाद्यक्षावलम्बकाहर्व्यासचरदलकाल-
राश्युदयच्छायानादीकरणप्रभृतिषु क्षेत्रकालकरणेष्वभिज्ञः ।

12. He should be familiar with the Earth's rotation (in its own axis) round the Sun and also with its revolution in the stellar firmament, its shape (संस्थान) and the like, the latitude (of a place) and its complement, the difference in the lengths of the day and night, the Chara Khandas of a place, the rising periods of the several signs at any place, the methods of conversion from shadow to time and time to shadow, to find the exact period—elapsed ghatikas since Sun-rise or Sun-set—at any required time from the position of the Sun or from the Lagna as the case may be.

For Charakhandas, see Sripatipaddhati PP-157-160.

१३. नानाचोद्यप्रश्नभेदोपलब्धिजानितवाक्सारो निकषसन्तापा-
भिनिवेशैः कनकस्येवाधिकतरममलीकृतस्य शास्त्रस्य वक्ता तन्त्रज्ञो
भवति ।

13. He is a true astrologer who is able to understand the objections and points of differences and meet them in clear and convincing language thus proving the truth of the science in its pristine purity in the same way as separating pure gold by bringing it under the touch-stone, fire, hammer, etc., and enabling it to retain its pure value.

न प्रतिबद्धं गमयति वक्ति न च प्रश्नमेकमपि पृष्टः ।

निगदति न च शिष्येभ्यः स कथं शास्त्रविज्ञेयः ॥१॥

Sloka 1.—How could, one who is not able to understand the ideas contained in the Sastras (incorrectly interprets the same), nor cares to answer any question that may be put to him, nor explains his views to his students, be termed an Astrologer that has grasped the essence of the science ?

ग्रन्थोऽन्यथाऽन्यथार्थं करणं यश्चान्यथा करोत्यबुधः ।

स पितामहमुपगम्य स्तौति नरो वैशिकेनार्याम् ॥२॥

Sloka 2—He is only a fool whose interpretation is quite opposed to the spirit of the text and whose calculations are also wrong. This is just like his approaching his grand father or God Brahman and praising before him his grand mother or Saraswati attributing the qualities of a courtesan to her.

तन्त्रे सुपरिज्ञाते लभे छायाभुयन्त्रसंविदिते ।

होरार्थे च सुरुढे नादेष्टुर्भारती वन्द्या ॥३॥

Sloka 3.—When the astrologer has well-understood the mathematical portion, and has arrived at the correct Lagna by means of shadow, water-appliances, etc., and has acquired a firm grasp of the science his predictions and teachings will never prove void of effect.

The revered Vishnugupta says :

Sloka 4.—It may be possible for a man trying to cross the ocean even to reach the other shore through the force of the wind. But 'it is not at all possible for a person who is not a sage to reach even mentally the other shore of the vast ocean of Kalapurusha, i. e., Astrology.

१४. होराशास्त्रेऽपि च राशिहोराद्रेष्काणनवांशकद्वादशभागत्रिंशद्भागबलावलपरिग्रहो ग्रहाणां दिक्स्थानकालचेष्टाभिरनेकप्रकार-बलनिर्धारणं प्रकृतिधातुद्रव्यजातिचेष्टादिपरिग्रहो निषेकजन्मकाल-विसापनप्रत्ययादेशसद्योमरणायुर्दीयदशान्तर्दशाष्टकवर्गराजयोगचन्द्रयोगद्विग्रहादियोगानां नाभसादीनां च योगानां फलान्याश्रय-भावावलोकननिर्याणगत्यनूकानि तत्कालप्रश्नशुभाशुभनिमित्तानि विवाहादीनां च कर्मणां करणम् ।

14. And the science of horoscopy comprises the following : the several divisions, viz., Rasi, Hora, Drekkana, Navamsa, Dwadasamsa, Trimsamsa, the ascertainment of their strength or weakness, the calculation of the Balas of the planets due to दिक्, स्थान, काल, and चेष्टा in their various (Vargas) divisions, the humours of the planets, the constituent elements of the body represented by them, the substances pertaining to them, their castes, their characteristics, etc., the time of Nisheka (impregnation) and actual birth, extraordinary cases of birth and their prediction, the time of one's immediate death, the years contributed by the planets for one's life, the Dasa and its sub-divisions, Ashtakavarga, Raja yogas, the Chandra or lunar yogas, conjunctions of two or more planets, Nabhasa and other yogas and their effects, the effects of planets due to their occupation of

a Rasi, Bhava, etc., and the effects of their aspects on them, one's exit from the world, the region to which the deceased had belonged in his previous birth and the region to which he goes, the effects on queries—good or bad—at any time, good or bad omens, the performance of marriage and other rituals.

All the above subjects are treated of in Brihat Jataka and Vivaha Patala—विवाहपटल. This latter work is not by Varahamihira but by one author called विन्ध्यवासि, another great astrologer, who has written on Muhurta for marriage and so on. [See Adhyaya 103 *infra*]

15. And in the work यात्रा too, the seers have declared all about Tithis, week days, Karanas, asterisms, Muhurta (48'), Lagna, Yoga, the throbbing of the body, dreams, baths for success in battle, sacrifices performed for the propitiation of planets, the worship of the Yakshas 7 days prior to the day of starting on a journey, prognosis through the movement—clockwise or otherwise—of the flame of the Sacrificial fire, the correct understanding of the feelings of the elephants and horses through the movements of their limbs, military proclamations and tendencies, omens, etc., the suitability through the help of the planets of any of the six expedients in foreign politics, *viz.*, (1) सन्धि-peace or alliance (2) विग्रह-war (3) यान-march or expedition (4) स्थान or आसन-halt (5) संशय-seeking shelter and (6) द्वैध-duplicity; the four

means of success against an enemy. *viz.*, (1) सामन्-conciliation or negotiation (2) दान-bribery (3) भेद-sowing dissensions and (4) दण्ड-punishment (open attack)—to be judged by the omens (good or bad) when setting out on a journey; nature of the camping ground—lands for the location of the army—the colors of (ceremonial) fires, the procedure of employing at the proper time ministers, spies, envoys, foresters, instructions for besieging and capture of fortresses belonging to others.

Sloka 5.—He who has got a clear grasp of the astrological science inclusive of the mathematical portion as if it were spread before his eyes in the world and engraved in his intellect and imbedded in his heart, the predictions made by him will never prove ineffective.

१६. संहितापारगश्च दैवचिन्तको भवति ।

16. It is only he who has made a complete and thorough study of the Samhita that becomes fit to divine the past, present and future—a true Astrologer.

१७. यत्रैते संहितापदार्थाः ।

18. The movements of the Sun and other planets, their nature and extent of change if any, their magnitude, color, rays, brilliancy, their form or figure, their setting and rising, their route, the nature of their motion on the way, retrograde and direct, upwards and downwards, conjunction with a star or planet and of their course among the stars and the like, their effects, the nine triads of stars (divided like a tortoise) and their effects in the countries, the Agasthya Chara (the course of Canopus), the time of its rise (which ushers the Sarat Season when every thing on earth assumes a lively appearance), the course of the seven (sages मरीचि, अत्रि, अङ्गिरस, पुलस्त्य, पुलह, ऋतु and बलिष्ठ) stars, the constellation called Ursa Major and their effects, the assignment of countries, substances and living beings to the planets and also to

the stars, the ascertainment of the good effects resulting from planets occupying all the three houses, viz., 1st, 5th and 9th, effect of planets being at war, their conjunction with the Moon, the planet presiding over the year and the effect caused thereby, monsoonish indications of the weather, the Moon's conjunction with the stars, Rohini, Swati, Purvashadha and Uttarahadha, symptoms for immediate rain, predicting good or bad effects through the growth of flowers and fruits, the misty halo round the Sun and the Moon, line of clouds crossing the Sun at Sunrise or Sunset, of the winds, fall of meteors, apparent outbreak of fire in the quarters, earthquakes, redness of the sky just before Sunrise or after Sunset, clouds taking the appearance of a City, of dust-storms, portent of thunderbolts, variation in value of commodities, the growing of corn, fruits, etc., Indradhwaja or banner worshipped by kings, rainbow, architecture, the science of foretelling good or evil by the movements of limbs, or by the cawing of crows, Antarachakra omens, phenomena connected with the deer, dogs, winds blowing in the 8 directions, royal mansions, construction of temples, casting of images, installation or consecration of an idol, herbalistic treatment, finding of sources of water, ceremony of general purification by water (done by kings, etc.), flight of the Khanjana (wagtail), expiation of evil caused by unusual phenomena boding calamity, Mayura Chitraka घृतकंबल or पुष्पस्नान (coronation ceremony when the Moon is in पुष्य), of swords, tiara or diadem, all about the features, etc. of कृकवाकु-a cock, tortoise, cow, rain, horse, elephant, a man and a woman, about the harem, breaking out of boils, injuries to shoes and clothes, on chowries, staffs, beds and

seats, examination of gems and precious stones, lamps, materials derived from tusks, wood, etc., good and bad omens which are common to all the people of the world inclusive of the King and the ordinary individual. And all the above should be divined by an astrologer every moment with a single-minded devotion. And it is not possible for a single person to comprehend all these occurring day and night. Hence an astrologer in the employ of a king should engage four efficient assistants for the task, each to be in charge of two directions, thus: one to observe east, and south-east, a second for the south and south-west, a third for the west and north-west, and the fourth for the north and north-east. By this, it will be possible for noting clearly the fall of meteors and the like which is sudden in its nature and one's good and bad effects have to be predicted through the form, color, viscosity, size, etc., of these falling bodies and as to how they dash or strike against the other planets and stars.

शृङ्गाटक (Srīngataka) yoga. If at a birth all the three houses viz., 1st, 5th and 9th are occupied by planets, Srīngataka yoga is formed. The yoga and its effect are thus described by Varahamihira in his Brihatjataka :

Slokas 2-3.—At present, one course of the Sun begins from the commencement of Karkataka and the other from the beginning of Makara. That it is different from what has been stated above can easily be ascertained by direct observation.

By marking every day the position of an object situated at a distance at the time of the rising or setting of the Sun, or watching the entry and exit of the brim of the shadow of a stick placed at the centre of a big circle drawn on the Earth, the difference in the Sun's course may be detected.

Sloka 5.—When the Sun changes his course after staying a little longer in his northern course, there will be prosperity all over and increase of crops. The same result will accrue when he is in his natural course. But if there should be any change or alteration in his gait, he will cause fear to the whole mankind.

प्रकृति is interpreted by Bhattotpala as agreement between calculation and actual observation in the Sun's change of course.

Slokas 12-16.—Wherever these Thamasa Keelakas show themselves in the Sun's disc, there will be distress and misery to the kings ruling over these countries. And even sages, emaciated being stricken with hunger, forsaking their usual religious duties and good conduct will be emigrating with great difficulty to other countries, having in their arms infants—mere skeletons—without flesh due to want of food. Good men will be robbed of their entire wealth by thieves and will be heaving long sighs ; and their eye-lids will be drooping and bodies, languid ; and their eyes will be obstructed by tears due to sorrow. Feeling weak and disgusted on account of trouble caused not only by their own Government but also by other (bordering) kings, people will begin to speak in disdain

about the behaviour of their own kings and will not attribute their suffering to their previous Karma. Clouds though thick with full quantity of water will not let loose the same to fall on the earth. Rivers will become attenuated and crops will be found only here and there (only in a few places).

Now the author speaks of the effect of the several shapes of these portents.

दण्डे नरेन्द्रमृत्युव्याधिभयं स्यात्कवन्धसंस्थाने ।

ध्वाङ्गे च तस्करभयं दुर्भिक्षं कीलकेऽर्कस्थे ॥१७॥

Sloka 17.—If there should appear in the Sun's disc Thamasakeelaka in the form of a stick, it portends the death of the sovereign ; if the object appear like a body without the head (headless), there will be outbreak of diseases ; if the form be that of a crow, there will be danger from thieves, and if the form be that of a Keelaka (wedge), there will be famine.

राजोपकरणरूपैश्छत्रध्वजचामरादिभिर्विद्वः ।

राजान्यत्वकृदर्कः स्फुलिङ्गधूमादिभिर्जनहा ॥१८॥

Sloka 18.—If the Sun's disc be obscured by obstacles in the form of a king's paraphernalia such as umbrella, chowrie, banner, etc., it indicates a change of a sovereign. If the Sun be hidden by sparks of fire, smoke, etc., it forebodes the destruction of people.

एको दुर्भिक्षकरो व्याघ्राः स्युर्नरपतेर्विनाशाय ।

सितरक्तपीतकृष्णैस्तैर्विद्वोऽर्कोऽनुवर्णमः ॥१९॥

Sloka 19.—If there should be one single object in the Sun's disc, it denotes the advent of famine. If there be two or more, it indicates the destruction of the sovereign. And should the objects referred to above be

of the colours, white, red, yellow and black, the destruction of the following classes in their order, *viz.*, Brahmins, Kshatriyas, Vaisyas and Sudras is indicated.

दृश्यन्ते च यतस्ते रविबिम्बस्योत्थिता महोत्पाताः ।
आमच्छति लोकानां तेनैव भयं प्रदेशेन ॥२०॥

Sloka 20.—And these portents appearing on the Sun's disc bring danger from these directions to the people that behold them. People will get troubles from that very quarter in which these portents make their appearance on the Sun's disc.

Slokas 21-22.—If the Sun be with upward rays of copper (red) colour, it denotes the ruin of the commander. If the colour be yellow, it betokens the destruction of the king's son ; if it be white, the preceptor will die. If the colour of the Sun's upward rays be variegated or misty and if there should be no immediate rain following, it causes chaos and disaster to the country through thieves, clash of weapons, etc.

Now he speaks of the Sun's colour in the different seasons :

ताम्रः कपिलो वार्कः शिशिरे हरिकुङ्कुमच्छविश्च मधौ ।
आपाण्डुकनकवर्णो ग्रीष्मे वर्षासु शुक्लश्च ॥२३॥
शरदि कमलोदराभो हेमन्ते रुधिरसंनिभः शस्तः ।
प्रावृट्काले स्निग्धः सर्वर्तुनिभोऽपि शुभदायी ॥२४॥

Slokas 23-24.—During the Sisira Ritu, the colour of the Sun will be like that of copper or tawny; it will be of greenish yellow or saffron colour in the Vasantha Ritu. In Greeshma Ritu, it will be almost pale or golden. In the Varsha Ritu, it will be whitish; in Sarad Ritu, the colour will be that of the interior of the lotus; and in the Hemanta Ritu, it will be blood-red, and the effect on mankind will be all auspicious. In the rainy season the Sun being glossy or showing the colours of other seasons a so is auspicious.

Sloka 9.—If the northern horn of the Moon be higher than the southern by a half thus presenting the appearance of a plough, there will be trouble to the agriculturists, there will be cordiality without any apparent cause among the kings and there will be prosperity in the land.

There are other shapes also of the Moon as detailed below : a tiny Moon indicates drought, while that which is big is declared to be a fore-runner of plenty of good crops. A form slender in the middle is termed Vajra and indicates risk to people from hunger and feverish preparations by kings for war ; while the Moon of the form of tabor denotes peace and plenty to the people. A Moon with a very broad disc denotes large influx of wealth to the king, while a corpulent Moon will make people eat rich food and a slender Moon will give food and grain that is most agreeable (or costly ?).

If the planet so cutting be Saturn, there will be peril through weapons, hunger and fear. If it be Mercury, it indicates famine and drought. If it be Jupiter, the important kings will die, while the petty

a boon conferred by Brahma, he is visible only at the time of eclipses and not on other days.

Simhika begged of Sage Kasyapa at an unseasonal hour for progeny. Enraged at this untimely request, he gave her a son who was dreadful like Yama. This son came to be called Rahu. As soon as he was born, he fought and sustained a defeat at the hands of the son of Aditi. Humiliated by this, he performed severe penance for 10,000 divine years on the summit of the Himalayas. He asked God Brahma to confer on him the status of a planet, immortality, victory over the Gods and power to devour the two luminaries. At this, the Lord spoke smilingly thus : "You will find it extremely hard to digest these two ; still, be it so." So saying, the Lord vanished. Then Rahu rushed at them. Then God Vishnu hurled his discus, chopped his head off and said, "Let the creator's words however, not go to waste. In your respective periods you may devour the two luminaries and thereby indicate good and bad things for the world."

The actual time of the eclipse has to be found out by noting the exact time of conjunction of the Sun and the Moon. These have been described in detail in my astronomical work Pancha Siddhantika.

Sloka 19.—The following seven deities are in their order the lords of the successive six-month-periods since creation. Brahma, the Moon, Indra, Kubera, Varuna, Agni and Yama.

Slokas 20-23.—During the Parvan presided over by Brahman, the Brahmins and cattle will prosper. The whole period will be marked by happiness, health and abundance of corn. In the Moon's Parvan, there will be similar prosperity for the Brahmins and the quadrupeds; but the learned will suffer and there will be drought. In the six-month period owned by Indra, there will be quarrel among kings; crops of the autumnal season will fail and there will be no happiness. In the period owned by Kubera, rich people will suffer loss of wealth, but there will be general prosperity in the land. In Varuna's period there will be no happiness for the kings, but people will be happy and there will be abundance of corn. In the six-month-period swayed by Agni—also known as Mitra—there will be plenty of crops; the people will be immune from disease and there will be abundance of water. During Yama's period, there will be no rain; people will suffer from famine and there will be a general destruction of crops. In the event of an eighth Parvan occurring next to this owing to unusual causes or phenomena, there will be general suffering due to hunger, death and drought.

Sloka 24.—If an eclipse should occur a bit prior to the time actually calculated, there will be miscarriages and outbreak of war. In the case of the eclipse happening a bit after the expected time, flowers will wither, fruits will be destroyed and there will be general panic and destruction of crops.

Sloka 25.—The effects of eclipses occurring a bit earlier or later than the actual time calculated have been described as stated above simply because they have been so stated in the ancient Sastras. However, the time calculated by a true astrologer will in no case prove inaccurate.

Note here Varshamihira's bold and dogmatic assertion that calculations done on proper lines will never be false. Consequently, there is absolutely no chance of there being any difference between the actual occurrence of an eclipse and the calculation.

Sloka 27.—If the Sun or the Moon rises or sets being eclipsed at the time, the crops of the शरद्-Sarat season will fail and the kings in the land will suffer. If such an eclipse be a total one and if the eclipsed disc be aspected by malefics as well, there will be famine and pestilence all over the country.

Slokas 28-31.—If the eclipse should begin when the Sun or the Moon has just half-risen, the low tribes, Chandalas, etc., will suffer and all sacrifices will be destroyed. If the visible portion of the sky be divided into seven equal divisions and if such an event happen in the first division, those that earn their livelihood with the help of fire such as gold-smiths, virtuous men, Brahmins and hermits will suffer. Agriculturists, heretics, traders, the Kshatriyas, leaders of the army, these will be destroyed, if the eclipse happens in the second division. The eclipse that occurs in the third division will bring on distress to artisans, artists, the Sudras, the Mlechchas and ministers. When the eclipse happens in mid-day, *i. e.*, the central or fourth division, the king and the central country will be destroyed; corn will sell at fair rates. Quadrupeds, ministers, people in the harem and Vaisyas will perish when the eclipse occurs in the 5th division of the sky. The eclipse in the sixth division will destroy the womankind and the Sudras; while thieves and people living in the border countries will be annihilated when the eclipse occurs at the setting time. When the end of the eclipse happens in the several divisions of the sky referred to above, the effect will prove good to the corresponding people.

Slokas 32-34.—Rahu when found in the Uttarayana will kill the Brahmins and kings, while in the Dakshinayana the Vaisya and the Sudra classes will be affected. If the solar and lunar eclipses begin at the four quarters, viz., the north, east, south, and west, it will kill respectively the Brahmins, the Kshatriyas, the Vaisyas and the Sudras. If found in the half-quarters (or corners), viz., north-east, south-east, south-west, and north-west, the Mlechhas, people who are marching, those that earn their livelihood by fire -- potters, smiths and the like -- and fire-worshippers will be affected. Further, if Rahu begins in the south, water-animals and elephants, etc., will suffer and if in the north, the cattle will suffer. If Rahu commences the eclipse in the east, he will inundate the earth with floods; if in the west, agriculturists, servants and dependants, seeds and seedlings will be destroyed.

Sloka 51.—The eclipse is termed मध्यतम (Madhyatama) when Rahu appears in the centre of the disc and the entire (circular) portion surrounding the same is unconcealed (bright all round). It will affect people living in the central countries, and people will suffer from colic. There will be general panic all over the country.

This phenomenon occurs only in a Solar eclipse.

पर्यन्तेष्वतिबहुलं स्वरूपं मध्ये तमस्तमोऽन्त्याख्ये ।

सस्यानामीतिभयं भयमक्षितस्कराणां च ॥५२॥

Sloka 52.—When the entire surrounding portion in the disc appears thick-dark while in the middle or central portion it is only slight, the eclipse is called Tamonthya. There will be danger to the crops through locusts, etc. and fear from thieves.

The Eetibadhas or injuries are six in number, viz.,

Slokas 53-59.—If the eclipsed disc appear white, there will be peace and prosperity all over, but the Brahmins will suffer. If the colour be like that of fire, there will be risk from fire and people who live by or eke their livelihood through fire, *viz.*, gold and silversmiths, etc., will suffer. If Rahu's colour be parrot's hue, there will be outbreak of diseases, and crops will be destroyed by excessive rain, etc. When the colour is reddish or tawny, quick-footed animals such as camels and Mlechchas will suffer and there will be famine. When the colour resembles that of the rays of the rising Sun, there will be famine and drought and birds will suffer. When the colour is grey, there will be prosperity all round and limited rain. When the eclipsed portion of the disc is reddish in colour or of the colour of the pigeon, or of gold or yellow-black, people will suffer from hunger. When it is of the colour of the pigeon or dark, the Sudras will

suffer from diseases. When it is the colour of a (topaz ?) spotless jewel (bluish-yellow), the Vaisyas will suffer destruction and there will be prosperity in the land ; if it be similar in colour to that of burning flame, there will be risk from fire ; and if the disc be of the colour of a mineral, (gold ore ?), there will be wars. If the colour be dark as that of the Durva stalks or yellowish, there will be outbreak of epidemics. And when Rahu is like the Patala flower in colour, there will be risk from lightning and thunder-bolts. If the colour be a mixture of red and brown, it indicates the ruin of the Kshatriyas and the advent of drought. If the colour be similar to that of the rising Sun, the lotus or the rainbow, it forebodes the outbreak of war.

Slokas 60-61.—When Mercury aspects the eclipsed Sun or the Moon, ghee, honey and oil will become dear and rare and kings will suffer. If Mars should aspect either of them in such a condition, there would be outbreak of war, risk from fire and danger from thieves. If Venus be the aspecting planet, there will be destruction of crops and there will also arise various miseries and troubles in the land. When Saturn is the planet that is aspecting, rains will fail, famine and risk from thieves will result.

If there should be clouds, of various colours there would be very great fear in men's minds. If there be thunder,

it will cause mis-carriages. If there be lightning, there will be trouble from kings, serpents, etc. If there be Parivesha, there will be trouble from diseases. If there be false fires, there will be danger from kings and risk from fires. If there be fierce and stormy wind, it will engender fear from thieves. If there be portentous thunder, Indra's bow or an impact of the Sun's rays with the cloud helped by the wind, people will suffer from hunger and there will be the risk of the country being overrun by a foreign king. If there be planetary war, there will be war between kings. If Ketu be visible, the same effect will happen. Sloka 98.—If a lunar eclipse happens at the next fortnight after a solar one, the Brahmins will perform many sacrifices and be blessed thereby and the entire population will be happy and contented.

When a solar or lunar eclipse occurs, persons at whose birth the Moon occupied the same sign as at the eclipse, should perform expiatory ceremonies in order to ward off any calamities that may befall them or their families. These are explained in detail in Adhyaya 67 of the मत्स्यपुराण-Matsya Purana. They generally relate to the worship of the lords of the eight quarters headed by Indra in four earthen pots filled with herbs, mud, gems, etc. representing the four oceans, and of Brahmins with the presents of cows and clothes.

Thus ends the fifth Adhyaya on the 'course of Rahu'.

It is termed Misra when he transits any of the stars Mrigasira, Ardra, Magha and Aslesha. The gait is called Sankshipta when Mercury travels through Pushya, Punarvasu, Purvaphalguni and Uttara phalguni. The course is Theekshna when he moves through Purvabhadra, Uttarabhadra, Jyeshtha Aswini and Revati. It is Yogantha when Mercury passes over Moola, Purvashadha or Uttarashadha. If the transit be through the stars Sravana, Chittra, Dhanishta and Satabhishak, it is called Ghora. Lastly, it is called Papakhya when his passage is over the stars Hasta, Anuradha and Visakha.

Slokas 20-21.—Find out the number of years that have elapsed since the commencement of the Salivahana era. Multiply this by 44. Add 8539 to the product and divide the result by 3750. To the quotient thus obtained, add the Saka years. Divide this by 60 and the remainder thereof by 5. The quotient represents the five-year-periods ruled by Vishnu and others, and the remainder denotes the number of years that have elapsed in the particular lustrum.

एकैकमन्डेपु नवाहतेषु दत्त्वा पृथग्द्वादशकं क्रमेण ।

हत्वा चतुर्भिवसुदेवताद्यान्युद्भूति शेषांशकपूर्वमन्दम् ॥२२॥

Sloka 22.—Place the years of Jupiter obtained in the previous Sloka separately in two places. Multiply the first by 9 and divide the other by 12. Add the above product (in the first case) and the quotient (in the second case). Divide the result by 4. The quotient will reveal the particular asterism reckoned from Dhanishta. The remainder will denote the Padas (पाद) in the next star that have been traversed by Jupiter.

In a Mahayuga (the period comprising the four Yugas),
the number of solar years is $4320000 = 3750 \times 1152$ | * 4370640
That of Jupiter for the same period is | as per Surya
 $4370688^* = 3794 \times 1152$ | Siddhanta.

So that for every 3750 solar years we have 3794 years of Jupiter.
Therefore 1 solar year = $1 + \frac{44}{3750}$ years of Jupiter.

To find out the number of Jupiter years that had elapsed (in Kaliyuga) at the time of the commencement of the Salivahana era, we have to proceed thus:

The number of solar years that have passed from the beginning of Kaliyuga till the commencement of the Saka era is 3179. This converted into Jupiter years will be $\frac{3794}{3750} \times 3179$ or $3216 \frac{1126}{3750}$

Now it is known that Kaliyuga commenced in the year Vijaya (the 27th year from Prabhava, which is the first year in a cycle of 60 years of Jupiter).

Therefore, $3216 \frac{1126}{3750} + 26$ or $3242 \frac{1126}{3750}$ being divided by 60, the remainder will give the particular year of Jupiter (in his cycle of 60 years) from Prabhava at the time of commencement of the Saka era, and this remainder is $2 \frac{1126}{3750}$ which is the 3rd year or the year Sukla of the cycle.

Coming down to the period subsequent to the commencement of the Saka era, say the present time (वर्तमान शक-*Vartamana Saka* 1868 April 1945), the number of Jupiter years that have elapsed will be $1867 + \frac{44 \times 1867}{3750} + 2 \frac{1126}{3750}$ from the beginning of Prabhava or $1867 + 21 \frac{3398}{3750} + 2 \frac{1126}{3750}$ or $1891 \frac{774}{3750}$ which indicates that it is the 32nd year of the cycle or Vilambi. But actually, it is Hemalamba. The reason is that the figures for Jupiter's years as given by Aryabhatta or as per Surya-siddhanta are a bit more than that of Varahamihira. His figure 8589 appearing in Sloka 20 is different from 8626 that we got above. Calculating backwards from 8589, we find the number of sidereal revolutions of Jupiter according to Varahamihira to be 364190000. This is probably the correct figure.

Sloka 22 gives a clue to find out the particular lunar mansion in which Jupiter may happen to be at any given time.

Taking the current Saka year 1868, we have the Saka years that have elapsed as 1867. The number of Jupiter years that have elapsed as calculated in the penultimate paragraph of page 96 will be $1891 \frac{774}{3750}$. This when divided by 60 gives a quotient 31.

As per Sloka 22, we have to multiply the above quotient 31 by 9; then we get 279; and by dividing the same quotient by 12 we get $2 \frac{7}{12}$. Adding these two figures we get $281 \frac{7}{12}$. Dividing this result by 4 we get 70 and odd, thus indicating the asterism traversed by Jupiter, as the 17th. This when reckoned from Dhanishta is Uttaraphalguni.

Sloka 23.—The lords of the 12 Yugas or five-year periods in the Jupiter's cycle are respectively (1) Vishnu (2) Brihaspati (3) Indra (4) Agni (5) Twashta (one of the creators) (6) Ahirbuddhnya (7) the Manes (8) Viswedeva (9) the Moon (10) Indraghni (11) the two Aswins and (12) Bhaga.

and phlegmatic diseases. In spite of these, the people will not feel miserable.

Slokas 29-30.—Thereafter, Vibhava, the second year begins. Then follow Sukla, Pramoda and Prajapati. The benefic effects will go on increasing in these years. During this period, Kshatriya kings will rule over the earth abounding in paddy, sugar-cane, barley and other grains, when the people will be free from fear and hatred, and where the people will be all-cheerful and free from the malefic effects of the Kali age.

Slokas 31-32.—In the second Yuga which is composed of Āngiras, Srimukha, Bhava, Yuva and Dhatu, the first three prove auspicious, the remaining two being middling. The lord of rain will pour down abundant rain in the first three years and the people will be free from affliction and fear. In the last two years, the rains will be equally distributed, but there will be the outbreak of diseases and war.

The first two years will be auspicious and will bestow the fruits of the golden age on the people. The third will be wholly inauspicious and the last two will give plenty of food-grains and risk from diseases.

Slokas 35-36.—In the fourth lustrum, the first year, viz., Chitrabhanu is declared to be the best, the second, named Subhanu is medium in result ; it brings on sickness without mortality. The next year known as Tharana gives copious rain. The year Parthiva is declared to yield luxuriant crops. The fifth year, namely Vyaya, will prove auspicious. Love reigns supreme and festivities will be the order of the day.

The commentator Bhattotpala adopts the reading नतं च instead of न तच्च in Sloka 35, and interprets नतं to be the name of the third year instead of Tharana. In the next sloka, he adopts Tharana as the fourth omitting Parthiva. Accordingly he adopts the reading मुदितं पार्थिवम्. This is not convincing as it is against our tradition

Sloka 37.—In the fifth lustrum presided over by खट्वा-
Thwashta, Sarvajit is the first year. The next is

Sarvadhari, followed by Virodhin, Vikrita and Khara. Of the above, the second year is good and the rest bring about dread.

Slokas 39-40.—The seventh lustrum is composed of the years Hemalamba, Vilambi, Vikari, Sarvari and Plava due to the transit of Jupiter. The first year will have stormy rain accompanied by the six-fold afflictions (*vide* Adhyaya V-52, *supra*). In the next year, the crops and rains will be scanty. The third year will prove very disastrous through floods, and the fourth will usher in famine. The last year Plava will prove auspicious with copious rain.

Slokas 41-42.—In the 8th lustrum ruled by Viswe-deva the years are Sobhakrit (also Sokahrit), Subhakrit, Krodhi, Viswavasu and Parabhava. The first two bring joy and contentment to people. The third will prove very malefic. The last two will be middling. But in the fifth year Parabhava, there will be fire, affliction caused by war and diseases; and the Brahmins and kine will suffer.

शोकहृद् is another reading for शोभकृत्.

Of these, Keelaka and Saumya are good, while Plavanga will prove troublesome in many ways to the people. In the year Sadharana, there will not be much rain and there will be the six-fold afflictions. In the fifth year, the rain will be unequally distributed, but crops will flourish.

Slokas 45-47.—In the tenth Yuga presided over by Indraghni, the first year is known as Paridhavi; then fol-

low the four years Pramadi, Ananda, Rakshasa and Anala. In the year Paridhavi, the middle country will suffer, and a king will die. There will be dearth of water and trouble from fire. In the year, Pramadi, people will be lazy ; there will be war, and red flowers and red seeds will be destroyed. The next year Ananda will bring joy to all. The two years Rakshasa and Anala will produce a general decay ; the former will be marked by the growth of summer crops and the latter by the outbreak of fires and epidemics.

प्रमाथिनं विक्रममप्यथान्यम् is another reading (in Sloka 45). In Sloka 47, विक्रमः is another reading for तत्पः:-

Slokas 48-49.—The eleventh Yuga is composed of the years Pingala, Kalayukta, Siddhartha, Raudra and Durmati. In the first year, there will be excessive rain. Robbers will increase. People will suffer from Asthma, cough, followed by the shaking of the jaws. The year Kalayukta has got many defects and evils, while the year Siddhartha contains many good qualities. In the year Raudra, there will be much suffering and loss. The year Durmati will have medium rain.

Slokas 50-51.—In the twelfth Yuga, the first year is named Dundubhi and will be marked by the growth of plenty of food grains. Then follows Udgari or Rudhirodgari, wherein kings will suffer and the rains also will be uneven and irregular. The third year is Raktaksha in which there will be general danger caused by tusked animals and diseases. In the fourth year Krodha, people will become subjected to anger and kingdoms will be devastated through wars.

In Sloka 50, अङ्गार is another reading for उद्गारि.

Sloka 52.—Kshaya is the name given to the last year of the 12th or last Yuga of Jupiter. It will cause decay in many ways to the people, engender a sort of fear among the Brahmin class. The agriculturists will prosper. The Vaisyas and the Sudras will gain ; so also the robbers. Thus have been declared here briefly all the effects arising from the 60 years.

Thus ends the 8th Adhyaya on the "course of Jupiter".

Similarly, if Venus transits north of a star, he is said to be in his northerly course, etc.

Sloka 9.—The course of Venus in the three routes नाग, मज and ऐरावत will produce effects *par excellence*, excellent and slightly good. Similarly the effects have to be pronounced to be even, middling and slightly bad, when Venus traverses the next three routes. In the last three routes, he will produce effects which will prove undesirable, disastrous and totally destructive respectively.

If after the rising of Venus in this मण्डल-Mandala another planet should pass over him, the latter will destroy the kings of the tribes Bhadraswa, Surasena, Yaudheya and Kotivarsha.

But he will be unfavourable to the Brahmin class, especially so to those that commit cruel deeds. If Venus is overpowered in this मण्डल-Mandala by another planet, he will cause distress to the Mlechchas, foresters eaters of dog's flesh and cowherds, the people of Gonarda, low-class people, Sudras and the people of Videha.

पुण्ड्रापरान्त्यशूलिकवनवासिद्रविडसामुद्रान् ॥१५॥

Slokas 14-15.—When Venus after rising is passing through the 3rd मण्डल formed by the five stars commencing from Magha, he will destroy crops, cause danger from famine and robbers, revolutionise the social levels and create commingling of the social strata.

If Venus is assailed by another planet in this cycle, he destroys shepherds, Sabaras, Sudras, Pundras, savages of the western countries, the Sulikas, foresters, the Dravidas and people living on the coasts.

Slokas 16-17.—The three stars commencing from Swati form the fourth Mandala which removes fear from people's minds, promotes the happiness of Brahmins and

Kshatriyas, and the growth of crops, but creates misunderstanding among friends. If Venus be overpowered (by another planet) in this Mandala, death overtakes the Kirata-chieftain, and the Ikshvakus will be crushed. So also will be the cave-men, people of Avanti, Pulindas, Tanganas and Surasenas.

Slokas 18-19.—The five asterisms beginning with Jyeshtha constitute the fifth मण्डल. Herein, the people will suffer from hunger, robbers and diseases. Similarly the people of Kashmira, Asmaka, Matsya, Avanti and those living on the banks of the Charudevi will be in distress. If Venus be overpowered here, he destroys the Dravidas, Abheeras, Ambashtas, Trigarthas and Saurashtas, people of Sindhu and the Sauveerakas. The king of Kasi will meet with his end.

Slokas 20-21.—The sixth Mandala which is auspicious is composed of six asterisms beginning with Dhanishta. The period will be marked by an increase of prosperity, cattle-wealth and food-grains ; but in some places there will be fear. If Venus be assailed here, he will cause distress to the Sulikas, people of Gandhara and

Avanti ; people of Videha will be destroyed ; cave men, Yavanas, Sakas and servants will thrive.

Sloka 25.—When the cart of Rohini is broken through by Venus, the earth will be strewn with hair and pieces of bones and assume the form of one who performs the कापालव्रत-Kapalavrata to atone for the murder of a Brahmin.

Here the author has indulged in a bit of poetic fancy. The idea is that many will be killed in battle, etc.

For कापालव्रत *Vide* मनुस्मृति XI-72

The wain of Rohini is cleft, i.e., undergoes occultation by a planet, when the latter, standing in the 17th degree of Taurus has a southern latitude (विक्षेप) of a little more than two degrees.

Sloka 28.—When he is in Aslesha, the people will undergo immense suffering caused by snake-poison. When he is piercing Magha, he will cause trouble to the chief of Mahouts. There will be copious rain.

“To the chief Msnister” if the reading महामास्य be adopted.

Utpala gives in a quotation the definition of the cleaving, *alias* occultation, of the junction star of Magha by a planet :

भेदलक्षणं गणितकौरुक्तम् ।

छादयति योगतारां मानाद्भौतविक्षेपात् ।

स्फुटविक्षेपो यस्याधिकोनको भवति समादिवस्थः ॥

The definition of the occultation of the star in question according to the scientific astronomers, is as follows : “A planet occults the junction star of Magha (Regulus) when its own rectified latitude, being in the same direction (north), is more than half the latitude, and less than one and a half the latitude of the star” From this we may deduce that the author of the stanza, whoever he may have been (probably Brahmagupta), had a still more accurate knowledge of the real latitude of Regulus than the Surya Siddhanta has, in which the latitude is stated to be 0. Another stanza defines the latitude of the Moon when causing the occultation of certain stars :

विक्षेपेऽन्ये सौम्ये तृतीयतारां भिनत्ति पिङ्गवस्य ।

इम्बुभिन्नति पुष्यं पौष्णं वारुणमविक्षिप्तः ॥ Kern.

Sloka 19.—When Jupiter is in Visakha and Saturn
in Krittika, terrible calamity will befall mankind. If
the two planets should transit one and the same star,
there will be a civil feud in cities.

Sloka 20.—When Saturn's orb is variegated, birds will suffer destruction. If his rays appear yellow, he will cause famine. If he is blood-red in colour, it portends war; if he is ashy, there will be strife and intense hatred among people.

Sloka 21.—It is a tradition among sages that if Saturn be as bright as the beryl, he brings on happiness to the people. Similarly, he is auspicious if he is jet black like the Vana flower or deep-blue like the Atasi-flower. Whichever colour Saturn assumes, he proves destructive to that class of people represented by that colour—that is, white-Brahmins, red-Kshatriyas, yellow-Vaisyas and dark-Sudras.

Slokas 33-36—There is a Chalaketu or a moveable comet rising in the west. His crest is an inch high and is turned to the south. His length increases the more it goes to the north. After touching the Seven Sages (Great Bear)—Vasishta and others—and also the Pole Star (Dhruva) and the star Abhijit he returns after travelling half the sky and sets in the south. When this comet appears, people in the region beginning from the banks of the Prayag and extending to the town of Ujjain and Pushkara forest will be destroyed. Those living in the north as far as the Devika river and the whole of the middle country will be wiped out. Other countries also will suffer from diseases and famine here and there. There is a second comet Ka by name in the 'form of a yoke and can be seen in the west. Both these can be seen at the same time for a period of 7 days. They are clear and augur good and plenty to mankind if they be glossy. Should however the comet Ka be visible for more than seven days, then it denotes that there will be war for ten years and consequent distress.

He is soft and clear and gives auspicious effects. If he should be seen by the kings on their martial equipments, by people of countries on their houses, trees and mountains and by house-holders on their vessels and the like, these are doomed to destruction.

Slokas 44-45.—Mani Ketu is the name of a comet. He is a very tiny little star appearing in the west and observable for only once and that too for a period of three hours. His crest is white and straight like a line of milk emanating from the breast. He hails with plenty of food lasting for a period of $4\frac{1}{2}$ months. But he generally causes reptiles and venomous creatures to come into existence.

Sloka 46.—The comet Jalaketu also appears in the west. He is spotless in his form and has a crest slightly higher inclined towards the west. He causes peace and abundance of food for a period of nine months.

Slokas 47-48.—There is another comet Bhava Ketu by name which makes his appearance for one night in the east and is a tiny glossy star. He has got a crest turned to the right and resembling the tail of a lion. There will be unprecedented abundance of food for so many months as the number of Muhurtas for which he is visible. Should however he be rough instead of soft in body, there will be an outbreak of diseases which will prove mortal to mankind.

अपरेण पद्मकेतुर्मृणालगौरो भवेन्निशामेकाम् ।

Sloka 49.—When the comet Padmaketu which appears only for one night in the west and white like the fibre of lotus stalk, people in the land will enjoy happiness for a period of seven years.

Sloka 50.—Avartha is the name of another Ketu appearing at mid-night in the west with his crest turned to

the South, glossy and red in colour. As many Muhurtas he makes himself visible, for so many months there will be peace and plenty to mankind.

Slokas 51-52.—During the time of Sun-set a Ketu named Samvarta with a crest smoky and coppery in colour makes his appearance in the west. He occupies a third of the sky and is stationed like a trident and is frightful to look at. As many Muhurtas as he is visible, for so many years there will be war and strife among kings and they will ultimately perish. Men whose natal star is identical with the one in which the comet appears will also suffer.

The chief of the Asmakas and the lord of the Magadhas will respectively meet with their end when the asterisms Punarvasu and Pushya are contaminated by a malignant comet.

NOTE.—Compare (with the above) what modern science has to say on the subject of comets :

“What then is a comet according to the latest scientific researches ? The spectroscope has pretty well solved the query. It consists, first, of a more or less solid nucleus of fire, blazing and glowing ; second, of vast masses of incandescent gas, constituting the luminous head ; third, solid materials, constituting the tail, which are ponderable, which reflect the Sun’s light and are carried along by the influence of the nucleus ; fourth, an immense prolongation of the tail in the nature of attenuated volumes of gas. The solid materials of a comet, it is believed, consist of stones and sand, particles ground by ceaseless attrition. The proof of this is the concession of most astronomers that meteoric showers are shreds and patches of cometic matter, dropped from the tail, and these meteors are stones. The genesis of comets is found to be in the explosion of planetary bodies, a theory not without good scientific authority.

Arago estimates that there are 17,000,000 of these fiery wanderers within the orbit of Neptune, and Lambert regards 500,000,000 as a moderate estimate for those in the solar system. All the astronomers agree that they are scattered through space as profusely as the fish in the seas. The Orbit of the Earth is overwhelmed in a fine net work of cometary orbits, and our globe is like a lost child in a forest full of wild beasts.”

Slokas 2—7.—Listen ! ye, now, to the description of the appearance of the Sage, who, in days of yore, suddenly heightened the splendour of the ocean by the drying up of its waters through the mountains situated in the interior whose summits were scooped out by the claws of crocodiles and which had streams of water in the form of choice gems and jewels falling upon them along with pearls, putting to shame as it were the Gods having a limited number of gems on their diadems,

He, by whom the ocean though deprived of its watery contents, was made more beautiful by means of the mountains shorn of their trees and decked with gems, jewels and corals and through the serpents that emerged from them in long rows,

He by whom the great ocean though brought to grief being drained off, was raised to divine glory since it displayed glittering whales, water-elephants and serpents, also heaps of gems scattered about,

The Commentator interprets the first two compounds as applying to Devaloka also.

Though the water is taken away, the ocean filled with floundering whales, pearl-oysters and conch-shells,

still possesses the splendour of a lake in autumn with [its waves, lotuses and swans,

He who converted the ocean (the lord of the rivers) into the sky, as it had white clouds in the form of whales, stars in the form of gems, the Moon in the form of crystal gem, the autumnal lustre in the form of the waterless bed and Ketu or comets in the form of the rays of the gems on the hoods of serpents,

And he who stemmed the Vindhya Mountain which was bent upon obstructing the course of the Sun's carriage and so had moving peaks, and which was adorned by the flags hoisted aloft in the form of clothes on the bodies of the Vidyadharas, who clinging to the shoulders of their confused lovers eagerly seated them on their own laps ; which possesses streams inside the caves occupied by lions whose heads are covered with bees following the fragrance caused by the tasting of the blood mixed with ichor on the heads of the elephants and are wearing ornamental wreaths of 'Vana' flowers as it were on their heads ; which was scratching as it were, the firmament with its uplifted peaks which had the deep sound of humming of the swarms of the intoxicated bees that were scattered by the shaking of the trees in bloom by the elephants and which (peaks) were the abodes of hyenas, bears, tigers and monkeys ; which is embraced in private by the Rewa river (Narmada) having the Madana trees on her banks just as one is embraced in amorous sport by one's beloved, in whose gardens dwell the Gods and which is accompanied by sages who subsist on water, nothing, roots and air ; such was the Vindhya, when he was stemmed by Agasthya. Listen ! ye, now, to the rising of that sage.

* “See Colebrooke, *loc.* His statement that there are three periods of rising and setting, according to Utpala, is not quite exact. On the contrary, Utpala expressly intimates that the rising of Canopus when the Sun stands in Hasta, is contrary to science, and only repeated by the author out of deference for the Ancients. He says किञ्चित्प्रागमन्युत्पले, which is quite true ; where our author uses किल, it is so much as *relata refero* यद्यत्रापि गणितसाम्यं न भवति तथाप्याचार्येण पूर्वशास्त्रदृष्टत्वात् कृतम् । The three periods of rising are

Sloka 3.—The Seven Sages were in the lunar mansion—Magha—when King Yudhishtira was ruling over the earth, the period of that King being 2526 years before the commencement of the Saka (Vikramarka?) era.

The assumption made by certain commentators that शक should invariably refer to Vikrama Saka (56 B. C.) does not seem to be altogether correct. For, it is said in the Mahabharata that Kali set in soon after Krishna's departure. This should be 3102 B. C. Hence the age of Yudhishtira should be somewhere at the earlier part of the 32nd century before Christ. Subtracting 2526 from this figure we find that the Saka referred to in the Sloka should be in the 7th Century B. C. (far earlier than the age of the Buddha—5th century B. C.). Hence the above remark.

Thus ends the 13th Adhyaya on the 'Course of the Seven Sages.'

कूर्मविभागाध्यायः ॥१४॥ Kurma Vibhaga.

With reference to our Puranas, it can be ascertained that जम्बूद्वीप-Jambudweepa (one of the seven continents surrounding the mountain Meru) was divided into nine sub-continents each being termed a वर्ष-Varsha. These nine divisions are (1) कुरु-Kuru (2) हिरण्य-Ḥiranmaya (3) रम्यक-Ramyaka (4) इलावृत-Ilavrita (5) हरि-Hari (6) केतुमाला-Ketumala (7) भद्राश्व-Bhadrasha (8) किन्नर-Kinnara and (9) भारत-Bharata. The name of the Adhyaya suggests in itself that the word कूर्म-Kurma instead of being literally translated as 'tortoise' should be construed to mean 'Globe.' This is further supported by the first Sloka of the chapter which starts with nine divisions of the 27 lunar mansions—each division consisting of 3 stars commencing from Krittika. The reader will note that the original divisions of the zodiac started from the first quarter of Krittika, the star owned by the Sun, the lord of the nine planets.

That our ancient authors went hand in hand with a thorough knowledge of the 18 Puranas is another reason for us to interpret कूर्म as Globe. For जयदेव-Jayadeva, the poet, in his गीतगोविन्द-Gitagovinda, while describing the 10 incarnations of Vishnu as

वेदानुद्धरन्तं जगन्निबद्धं भूगोलमुद्दिभ्रत
दैत्यं दारयते बलिं छलयते क्षत्रक्षयं कुर्वते ।
पौलस्त्यं जयते हलं कलयते कारुण्यनामन्वते
म्लेच्छान्मूर्च्छयते दशकृतिं कृष्णाय नमः ॥

observes the कूर्मवतार as 'जगन्निबद्ध' (one who carries the Globe on his back) and this interpretation is now taken advantage of.

एनङ्गहाण्डमस्यामृतघटसदृशं भाति वंशे मुरारेः
पाशाद्गः कूर्मदेहः प्रकटितमहिमा माधवः कामरूपी ॥

The following remarks of Dr. H. Kern on the subject will also be of interest :

"The word *Kurma* is the specific Sanskrit form of a word once common to all Indo-European tongues, viz, *Kurma*, Lat. *culmus*, Teuton. *holm*, etc. It does not originally denote the 'tortoise' itself, but its back, for the proper meaning is 'mound, buckle, half-globe, holm.' Even in Sanskrit, in such compounds as *Kurmonnata*, the word signifies the form of the back of the tortoise. At the time when the word *Kurma Vibhaga* became current, *Kurma* was taken in its proper sense. Yet in later times, they wholly mistook the meaning and made an absurd drawing, representing a tortoise, as if *Kurma* could denote a level ! The rendering by 'Globe' is not wholly exact, since properly only a half-globe, a *holm* is supposed to be raised above the waters."

Slokas 41-42.—If a planet shows signs contrary to the above-mentioned ones, his dependency will decay ; people and kings will feel sad, be suffering from battles, unsafety and disease. If no danger awaits the kings from their foes, surely, it threatens them from their own sons or ministers. Moreover, in consequence of drought, the country-people will frequent towns, mountains and rivers which they had never visited before.

Sloka 1.—How and when a conflict of the planets will take place according to the teaching of the sages who

Slokas 2-3.—The planets move in the firmament with their orbits lying one over another, but, owing to the great distance, they appear to our eyes to move on one even surface. According to the degree of their (seeming) approachment, there are four kinds of conflicts as stated by Parasara and other sages, *viz.* भेद-Bheda (occultation, cleaving), उल्लेख-Ullekha (grazing), अंशुमर्दन-Amsu-mardana (clashing of the rays) and अपसव्य-Apasavya (passing southward)

"The *Apasavyam* or *Asavyam Yuddham* takes place when the interval is somewhat less than a degree; at a greater interval there is no conflict at all."

Dr. Kern.

भेदे वृष्टिविनाशो भेदः सुहृदां महाकुलानां च ।

उल्लेखे शस्त्रभयं मन्त्रिविरोधः प्रियासूतृत्वम् ॥४॥

अंशुविरोधे युद्धानि भूभृतां शस्त्ररुक्भुदवमर्दाः ।

युद्धे चाप्यपसव्ये भवन्ति युद्धानि भूपानाम् ॥५॥

Slokas 4-5.—At the occurrence of an occultation, rains will fail and discord will prevail among friends and powerful families. When planets graze each other, there is danger from the sword, dissensions among royal councillors and dearth of food. At a clashing of the rays, there will be war between kings and desolation by sword, disease and famine. At the अपसव्य-*Apasavya* conflict, their will be hostile encounters between monarchs.

Utpala says : अपसव्यः प्रदक्षिण उच्यते । समं कृत्वा दक्षिणोत्तरा-
वस्थानमपसव्यमुच्यते । आचार्येण चन्द्रग्रहसमागमे अपसव्यकक्षणं कृतं ।
शशिनि ककुमुदस्थ इत्यादि । (XVIII-8 *infra*.)

Dr. Kern adds—"This is not difficult to understand, for the Moon leaving, in her eastward course, a planet or star at her own right (i. e. standing north from the planet or star), may be said to make a *pradakshina*; standing to the south, i. e., leaving a planet or star at her left, she makes an *apasavya*. Thus *Apasavya* means "from the left, at the left," and, in a special application, "at the south side;" but from this, it does not necessarily follow that *apasavya* originally was simply the opposite of *Savya*, "left". Yet it cannot be doubted that they have taken *apasavya* as the reverse of *Savya* or, in other words, that *apa* was understood to mean, not "from the side," but "not;" therefore *asavya* was considered to be simply synonymous with *apasavya*. Moreover, *Savya* has got the meaning of "right," precisely the reverse of its most common acceptance, viz., "left."

Not to be confounded with this acceptation of *Savya* is its use in augury. Applied to augural birds, etc., *Savya* is strictly and properly "left," but as birds first appearing from the left of the observer move in the direction of his right, and keep him at their own right, *savya*, "left," and *pradakashina*, "moving to the right," imply the 'same, without being the same. Utpala remarks ;

सर्व एव शकुनादयो यातुर्धामपाद्वीर्यप्रत आगत्य दक्षिणपादर्वेणाक्रामन्ति
यत् तत्प्रदक्षिणं सव्यम् । एतद्विपरीतं दक्षिणपादर्वीर्यामपादर्वेगमनं यत्तद्वपसव्यम्।

In astronomical works, *Savya* "moving (revolving) toward the right" and *Apasavya* "moving toward the left, is common enough ; *e. g.* Surya Siddhanta xii—55 ; Siddhanta Siromani, Goladhyaya 3—51, Arya Bhatiya IV—16.

Slokas 6-7—The Sun when standing in the meridian is called आक्रन्द-Akranda, *i. e.*, an ally coming to the rescue ; when in the east, he is a पौर-Paura, *i. e.*, a king staying in town ; in the west, he is a यायी-Yayee, a king who marches off. Mercury, Jupiter and Saturn are always Pauras, while the Moon is always Akranda. Keta, Mars, Rahu and Venus are marching planets. All the planets known as the Akranda, Yayee, and Paura when hurt, will destroy severally kings coming to the rescue, marching and staying in town. In the case of their being victorious, they bestow victory on their own class of kings.

पौरे पौरेण हते पौराः पौरान् तृपान्विनिम्नन्ति ।

Sloka 8—When a पौर-Paura planet is overpowered by another of the same description, kings keeping the town will kill others in the same predicament. The same

applies to राशि and आक्रम planets and kings. In case of a conflict between पौर and राशि planets, that which is victorious will bestow victory on its own class of kings.

Sloka 12.—If, owing to the indistinctness of the indications, it cannot be made out whether a conflict or a conjunction is taking place, the effects concerning the potentates on earth are said to be equally uncertain.

युद्ध-Yudda-war is among the non-luminaries while समागम-Samagama is between the Moon and one of the non-luminaries. Sometimes a conflict may take place without bringing out the conqueror clearly owing to both the planets being equally radiant, etc.

When he is defeated by Mercury, the Surasenas, Kalingas and Salwas will suffer. When defeated by Saturn, kings staying in town will be victorious, but the subjects will come to grief. When he is defeated by Mars, the middle country, kings and cows will suffer. When he is defeated by Saturn, the Arjunayanas, Vasatthees, Yaudheyas, Sibis, and Brahmins will suffer. When by Mercury, the barbarians, truthful

men, swordsmen and the middle country will be ruined. This affects also those described in Adhyaya XVI—21-25 *supra*.

When he is defeated by Mars, commandants of armies will be slain, and kings will wage war. When defeated by Mercury, the Parvateeyas will be lost ; there will be no milk-supply and rain will be scarce. When he is defeated by Saturn, foremen of corporations, military men, Kshatriyas and aquatic animals will be afflicted. Moreover, the general effect mentioned in Adhyaya XVI—26-30 will take place.

Sloka 25-26.—When Saturn is subdued by Venus, prices soar up, snakes, birds, and proud men suffer. Like-wise, the Tangana, Andhra, Udra, Kasi and Bahleeka countries will come to grief when Saturn is overcome by Mars. When he is defeated by Mercury, the Angas, merchants, birds, cattle and elephants suffer ; and when defeated by Jupiter; countries where women are predominating in number, the Mahishakas and Scythians will be afflicted.

ग्रहवर्षफलाध्यायः ॥१९॥ The years presided over by each of the planets and their results.

Utpala has made the following remarks :

कस्य ग्रहस्य कस्मिन्वर्षे कीदृशानि शुभाशुभानि फलानि भवन्तीति । यत आचार्येण पूर्वमेव प्रतिज्ञातमासीत् । पञ्चासिद्धान्तिकायाम्

वष यद्यस्य फलं मासे च मुनिप्रणीतमाहोच्य ।

तत्तद्वृत्तैर्वर्षे होरातन्त्रोत्तरविधाने ॥ इति-

It will thus be seen that Varahamihira fulfils the promise he had made above (in the Panchasiddhantika), by treating of this subject in the present work. Dr. Kern remarks in his foot notes:—

"It is not known which source has been chiefly used by our author in this particular instance ; thus much, however, is certain, that long before his time Greek horoscopy had been introduced into India."

By मुनिप्रणीतं, Varahamihira certainly refers to Garga, Parasara and a host of other Hindu astrologers as he has consistently been doing in all his works. No doubt, Yavana lived before Varahamihira and that Greek astrology was not unknown in India in his time. But to say that this idea about Varsha and Masa Phalas has been introduced into India by Yavana is certainly incorrect as sages who lived in India ages before have freely spoken about these. It may safely be said that ancient sages of India like

Garga, Parasara, etc., have known all about these and that Varahamihira perfected all these things in his Samhita as promised, knowing also that Yavanacharya also has known all about these.

It may not be out of place to bring to the notice of the readers that Maharshi Parasara, the father of the celebrated Vyasa, popularly known as वेदव्यास-Vedavyasa, existed far before the advent of Kali (कलि), that is, the fourth millennium B. C., and that for a sage of this repute, it is not correct to conclude that Parasara had to learn everything from the West. What I want to impress is that our ancient sages who were founders of the Six Angas (षडङ्ग) of the Vedas, did not require any foreign agency to put them in the way, but that they were in themselves, each a mine of knowledge. Further, to support my statement that Indian culture existed earlier than the Greeks, I quote below the following line from Raghuvamsa:—

Slokas 1-3.—The state of things in a year, month or day presided over by the Sun will be as follows : everywhere, the earth is covered with very little crop, the

forests are infested with voracious tusked animals as a visitation ; very little water flows in the rivers ; medicines do not show their usual potency. Even in winter, the Sun burns scorchingly ; clouds, though big as mountains, do not pour forth sufficient rain. The Moon and the cluster of stars in the sky lose their brilliance. Groups of hermits and cattle languish. Monarchs with irresistible forces consisting of elephants, horses and foot-soldiers, with their followers and with an excellent armament of bows, swords and clubs go about destroying the lands by war.

Slokas 4-6.—During the year presided over by the Moon, the sky will be covered with clouds which resemble moving mountains, which show the dark hue of snakes, collyrium, bees and buffaloes' horn, and which fill the whole earth with pure water and the quarters with a deep sound that creates pangs of separation in the minds of lovers. The water-sheets are decked with lotuses and lilies, the trees are blossoming and the bees humming in the parks ; the cows yield abundant milk, and [charming ladies increasingly delight their handsome lovers with amorous sports. Kings rule over the earth rich in wheat, paddy, barley, Kalama rice and plantations of sugarcane, and in towns and mines marked with sacrificial altars and resounding with the noise of great and small sacrifices.

Slokas 7-9.—In the year presided over by Mars, most violent fires roused by the wind spread out threatening to consume villages, forests and towns ; crowds of men ruined by the inroads of hordes of robbers and bereft of their properties and cattle cry out ' alas, alas ', throughout the land. The clouds, although bulky in appearance and piled up will not let loose anywhere much water. Even the crops that grow in the low-lying lands wither out. Even if it should bear fruit, it will be forcibly taken away by robbers. Kings do not attend whole-heartedly to their governing duties. Bilious diseases prevail ; there will be trouble from snakes. Mankind whose crops have failed will be thus afflicted by various calamities.

Slokas 10-12.—If Mercury be the lord of the year, month or day, men proficient in the art of jugglery, enchantments and magic, mines, townspeople, musicians, painters, accountants and military men will thrive ; kings will desire to exchange beautiful things creating joy among themselves with the idea of cultivating friendship. Rearing of cattle, trade, and husbandry will thrive through honesty. Vedic studies will be in a state of perfection. Justice will be administered scrupulously by kings as by Manu himself. Some will apply their mind to Yoga Vidya and others desiring the highest state to the science of logic. Jestlers, envoys, poets, children, eunuchs, perfumers and those that live near bridges, water and mountains will be happy. The earth will abound in herbs.

Slokas 13-15.—In the auspicious year presided over by Jupiter, the deep sounds produced in sacrifice by the great priests chanting Vedic hymns go up to heaven continually rending the hearts of evil spirits and delighting the hearts of the Gods partaking of the offerings. The earth is so full of excellent crops, so teeming with elephants, horse and foot, so stored with wealth and large herds of cows, and so prosperous owing to the protection of her rulers, that her people seem to vie with the denizens of heaven. The sky is covered with numerous towering clouds that regale the earth with water. The earth will be blessed with plenty of corn and great prosperity.

Slokas 16-18.—In a year presided over by Venus, the earth will abound in rice and sugarcane, its surface will be filled with water poured out by clouds resembling mountains ; it will be studded with tanks whose water is decked with beautiful lotuses and thus it will shine like a damsel with her limb dazzling through fresh ornaments. The kings will smash the mighty hosts of enemies making the quarters resound with the loud cries of victory. And the kings will rule over the earth rich in towns, mines and good people that are contented ; and all bands of wicked persons will be annihilated. In the vernal season, young men will drink frequently wine with their beloveds ; people constantly will sing melodiously to the accompaniment of flute and lute. Men will dine often with their guests, friends and relatives ; and the cries of victory of the God of Love will be heard everywhere.

Slokas 19-21.—In a year presided over by Saturn, the country will be torn by many battles of unruly bands

of robbers, will be deprived of cattle and properties and whole families will cry piteously owing to the murder of their near and dear ones and be oppressed by fell diseases and hunger. The sky will be bereft of clouds being chased by the wind ; all the trees with their branches broken down will cover the earth. The sky will not be illuminated by the rays of the Sun and the Moon, since it is covered with a dense mass of dust. Tanks and lakes will dry up ; and the rivers will become very shallow. In some parts, the crops will perish for want of water, in others, they get on being watered by artificial means ; and the Rain-god yields but little rain.

If he be otherwise i. e., big, with brilliance, posited in a good house, or be victorious in war, he will confer great prosperity. If the lords of the year and the month be both malefic, then

their evil effects will be aggravated in the particular month. On the other hand, if both be benefic, the good effects will be heightened. If one of them be good and the other bad, the result will be trifling.

Slokas 6-8.—When four or five planets, marching or stationary, congregate in a single asterism, the Yoga is termed *संवर्त* or concourse. If they be also combined with Rahu or a comet, it is called *सम्मोह* or tarnishing. When a stationary planet associates with another stationary planet, or one on march with another of the same type, the conjunction is named *समाज* or meeting. When some other planet joins the party made up of Jupiter and Saturn, there is *कोश* or fellowship. If two planets, one rising heliacally in the east and the other in the south (a little behind), it is called *सन्निपात* or an encounter. Any conjunction of planets other than the above five is called *समागम* or gathering, in which the effect will always be auspicious, if the planets be large, resplendent, and natural in appearance.

The former part of Bhadrapada may be fixed upon as the time of birth corresponding to the dark half of Magha. Those that are formed in the first half of Phalguna may be said to come out in the latter half of Bhadrapada. But those in the dark fortnight of Phalguna will be born in the bright half of Aswayuja. Slokas 14-18—The good symptoms at the time of the conception of clouds are the following : a delightful

and cool breeze from the north, north-east, or east; a clear sky; the Sun and the Moon surrounded by a glossy, bright and thick halo; the sky covered with large, bulky, smooth, needle-like or razor-like, red clouds or having the colour of the crows-eggs or a peacock's neck when the Moon and the stars shine brightly; a good twilight—morning or evening—accompanied by a rain-bow, good rumbling of thunder, lightning and a mock Sun; groups of birds and animals crying pleasantly in the north, north-east or east; the planets being large beaming brightly moving to the north (of the asterisms) and unhurt; trees with their sprouts unimpaired, and men and quadrupeds happy; these symptoms nourish all the embryos. There are however some special rules tending to the growth of the embryos and arising from the particular nature of the season which I am now propounding.

By these and similar portents of three kinds, *viz.*, celestial, atmospheric and terrestrial, an embryo gets destroyed.

Sloka 3.—If those four days of retention (धारणा-Dharana) be of the same type, the result will be auspicious. If, unlike, they prove disastrous and are said to engender danger from thieves. The following is the authority of sage Vasishtha.

Sloka 4-8.—The days of retention of the foetus will be favourable if they be accompanied by lightning, water-drops, dust-storm, and the Sun and the Moon screened by the clouds. If there should be beautiful flashes of lightning emanating from (moving towards ?) the auspicious quarters, an intelligent astronomer should predict the thriving of all crops. If on the same day there be rain with dust or if children engage themselves in happy sports, the cries of birds be pleasant and their sport be in dust, water or the like, if the Sun and the Moon be encircled by halos which are glossy and not broken, then, there will be rain tending to the growth

of all crops. If the clouds be glossy, collected together and moving in a clockwise manner, there will be a heavy rain favouring the growth of all crops.

Slokas 1-3.—I shall now try to expound briefly the good and bad effects arising from the Moon's conjunction with Rohini, having duly taken cognisance of them as explained by Garga, Parasara, Kasyapa and Maya to their hosts of pupils and as instructed by Brihaspati to Narada in the park on the summit of the Meru, which resounds with the humming of the bees clinging to the flowers of the trees in the caves of the golden rocks, which rings with the twitterings of

numerous birds and which has the melodious strains of music of celestial damsels.

Rohini Yoga is the period of a day when the Moon passes through the star Rohini in the dark half of the lunar month of Ashadha.

In this connection, Mr. Chidambara Iyer, very aptly remarks :

"These prefatory remarks clearly shew that what follow are important scientific truths in the eyes of Hindu astronomers: that the weather indications of one single day in a year should form the subject of so much calculation with the Hindus in determining the future agricultural prospect of the land while to the inexperienced eye of a western man of science, the day appears as indifferent or otherwise as any other day of the year argues that modern science is still far behind in her investigations of the laws of nature."

How a future conjunction of the Moon with the asterism should be foretold has been explained by me in my work Panchasiddhantika under the head of "Conjunction with Fixed Stars" The effects, however, must be declared as deduced from the Moon's size, brightness, colour, direction and from portents at the time and the winds.

breeze not vitiated. I shall now treat of the effects of the clouds and the wind.

The rain will be meagre, moderate and copious according as well, river and lake water proves the heaviest. The value of elephants is determined by the amount of ivory they have ; of cows, horses and the like, by their hair ; of kings, by the amount of gold in their treasuries ; of Brahmins, Kshatriyas, etc., as well as of countries, years, months and quarters, by beeswax ; and of other substances, by their actual weight.

Sloka 12—When the results of the Moon's conjunctions with Rohini, Swati and Ashada are the same, the prediction—good or bad—is to be made unhesitatingly. If they be different, the effects of Rohini alone will prevail.

Sloka 1.—If on the day of the full-moon in Ashadha an easterly wind blows from heaven, being tossed by the stroke of the tops of the billows of the eastern ocean and mingled with the mass of the mane-like rays of the Sun and the Moon, the whole earth will shine being enriched by the splendid vernal and autumnal crops and being covered overhead with groups of dark clouds every-where.

Sloka 2.—When the wind blows with such force as if to break off the peaks of the Malaya Mountain from the south-eastern part of the sky at sunset on the same full-moon day, the earth, blazing continuously with the flames of fire embracing (spreading on) its surface, will emit heaps of ashes along with the hot breath emanating from its own body.

Sloka 8.—If the sky be without the rays of the Sun, the Moon and the stars, and if there be no rain, then, I think it cannot be called Bhadrapada.

The sloka is spurious, says the Commentator.

Sloka 1.—If, at a query regarding rain, the Moon be posited in the Lagna which is a watery sign (Kataka, Makara, Kumbha or Meena) or in the 4th, 7th or 10th house in the bright fortnight, there will be plentiful rain ere long in the monsoon, provided she is aspected by benefics. If she be aspected by malefics in the

above Yogas, there will be very little rain. In predicting rain, Venus should be treated on a par with the Moon during the rainy season.

The commentator asks the question :—When the Lagna is a Kendra already, what is the meaning of केन्द्रगः ? Does it mean a Kendra other than the Lagna ? Yes, it does. The idea of the author is this : There will be rain, etc., in the dark half when the Moon is in Lagna Kendra alone and not elsewhere, while in the other half, even in another Kendra, it is all right.

Sloka 1.—The interval during which the firmament contains indistinct stars before the Sun has half-risen and

after he has half-set is called the juncture, *i. e.*, dawn and twilight respectively. The effects—good and bad—of the juncture are to be foretold through the following symptoms.

Sloka 2.—The deer, birds, wind, haloes round the Sun and the Moon, mock Sun or Moon, cross-bar¹ of clouds on the Sun's disc at the juncture, tree-shaped² clouds, rainbow and the glossiness of an apparent town in the sky, Sun's rays, a stick-like formation³ caused by the collection of solar rays, clouds and wind and dust, —from these, the effects of the juncture are to be determined.

1. This is an appearance in the sky of the shape of an iron bar.

2. An appearance resembling a tree in shape assumed by the clouds.

3. An appearance in the sky resembling a club.

Sloka 3.—A beast (deer) dreadfully crying aloud repeatedly, indicates the destruction of the village. The same standing in the Sun to the south of an army and crying aloud, foretells the annihilation of the army.

अपसव्ये सङ्ग्रामः सव्ये सेनासमागमः शान्ते ।

मृगचक्रे पवने वा सन्ध्यायां मिभने वृष्टिः ॥४॥

Sloka 4.—If at dawn or twilight a flock of deer or the wind be to the left of an army (and be facing the Sun), then a war will break out; if it be to the right of the army, cries pleasantly (and is not facing the Sun), the two armies will come together; if it be of mixed characteristics, there will be rain.

The following symptoms of this circle will be revealed a week in advance: the quarters are covered with smoke; a wind blows lashing with the dust of the earth and breaking trees; and the Sun does not cast bright rays. During an earthquake of the Wind Circle the decay of crops, water, forest and herbs, the outbreak of swellings, asthma, madness, fever, phlegmatic affections and trouble to the trading community will ensue. So also, concubines, warriors, physicians, women, poets, singers, traders, artisans, the Saurashtras, Kurus, Magadhas, Dasarnas and Mathsyas will suffer.

Slokas 12-15.—Pushya, Krittika, Visakha, Bharani, Magha, Purvabhadra and Purvaphalguni belong to the 'Fire' Circle. This also reveals its symptoms a week in advance. They are the following : the sky is covered with the fall of stars and meteors ; owing to the fire in the horizon, the sky appears to be illuminated ; the fire with the aid of wind rages over the land. During an earthquake of the 'Fire Circle', the clouds will be destroyed ; lakes and tanks will dry up ; kings will be at loggerheads with one another ; herpes, scab, fever, erysipelas and jaundice will prevail ; men of great valour, hot-tempered persons, the Asmakas, Angas, Bahleekas, Tanganas, Kalingas, Vangas, Dravidas and hill-men of various tribes will be affected.

Slokas 16-19.—The asterisms Abhijit, Sravana, Dhanishta, Rohini, Jyeshtha, Ashadha and Anuradha appertain to the circle of Indra. The following is the token : the clouds resembling moving mountains, sending forth loud peals of thunder, containing flashes of lightning and appearing like buffaloes' horn, swarm of bees and serpents, pour down rain. An earthquake of Indra's Circle will ruin men of celebrated families and castes, famous persons, kings and heads of corporations. It produces dysentery, swelling of the neck, diseases in the face and violent vomiting. It will also bring trouble to the people of Kasi, Yugangdhara, the Pauravas, Kiratas, Kiras, Abhisaras, Halas, Madras, Arbudas, Saurashtrians and Malwas. But it will give desirable rain.

An earthquake of this circle will kill those that are dependent upon the seas and rivers; it will yield excessive rain. People will forget their mutual hatred. It will ruin the Gonardas, the Chedis, Kukuras, Kiratas and the people of Videha.

Slokas 24-26.—The other portents referred to above are enumerated here—meteors, aerial city, (Harischandra pura), dust, portentous thunder, earthquake, fires in the quarters, violent winds, solar and lunar eclipses, unnatural phenomena in the case of any star or groups of stars, rain without clouds, any thing unnatural in the firmament, excessive rain, smoke without fire, flames without sparks, (?) entry of wild creatures into a village, sight of a rainbow at nights—unnatural phenomena during twilights, fragmentary circles (halos) round the Sun or the Moon, contrary flows in rivers, sounds of musical instruments in the heavens. Any other phenomenon which is contrary to nature and its effects should be included in the above circles.

Garga says; persons in whose Nakshatras earthquakes and the like Utpatas occur will suffer miseries; they shall therefore perform expiatory ceremonies in honor of the particular Deva under whose influence the occurrences take place.

Similarly the earthquakes of Varuna's circle counteract one born of the Fire-period and *vice versa*. Thus, the earthquakes of particular periods and circles as stated above cancel each other.

Garga says that if an earthquake is connected with two Nakshatras, division with respect to time of day takes precedence—

प्रथितनरेश्वरमरणव्यसनान्याग्नेयवायुमण्डलयोः ।

क्षुद्रयमरकावृष्टिभिरुपताप्यन्ते जनाश्चापि ॥२८॥

Sloka 28.—During an earthquake of the ' Fire ' circle and ' Wind ' period or *vice versa* (' Fire ' period and ' wind ' circle), a celebrated king will die or suffer calamity; and the subjects will be troubled by the dread of famine, by pestilence and drought.

Sloka 1.—The forms of those who fall down after having enjoyed unalloyed happiness in Heaven are called Ulkas or meteors which are divided into five kinds viz, विष्ण्य-ignescent balls, उल्का-meteors, अशनि-thunder-bolt, विद्युत्-lightning and तारा-shooting stars.

For a similar idea, Cf. भगवद्गीता- क्षीणे पुण्ये मर्त्यलोकं विशन्ति.

Garga opines that the meteors are burning missiles that are discharged by the protectors of the quarters for indicating good and bad effects.

Slokas 12-15.—Saturn inside a halo destroys base corn such as Priyangu, causes stormy rain and ruins trees and agriculturists. Mars inside it causes misery to boys (princes ?), commanders of armies and armies ; he occasions danger from fire and weapons. Jupiter under the same circumstances engenders trouble to royal preceptors, ministers and kings. Mercury bestows prosperity on ministers, trees and writers and gives good rain. Venus is harmful to the marchers, Kshatriyas and queens, and makes food very costly. When Ketu is similarly situated, there will be danger from famine, fire, death, king and weapons. Rahu causes trouble to children in the womb, disease and danger to king.

Some interpret द्विरुदितमनुलोमं as—of the two rainbows, if one is in the north and the other in the south, it is प्रतिलोम i. e., contrary to each other, while, if they are in the same direction, it is अनुलोम. But this interpretation in the light of Garga seems to be wrong.

उदगादिपुरोहितनृपबलपतियुवराजदोषदं खपुरम् ।

सितरक्तपीतकृष्णं विप्रादीनामभावाय ॥१॥

Sloka 1.—An aerial city seen in the four quarters beginning with the north is harmful to the royal priests, kings, commanders of armies and the Yuvaraja respectively. Similarly, one with white, red, yellow or dark colour tends to the annihilation of the Brahmins, Kshatriyas, Vaisyas or Sudras as the case may be.

नागरनृपतिजयावहृद्यदग्विदिकथं विवर्णनाशाय ।

Sloka 1.—A mock-Sun is auspicious, if it is glossy and possessing the colour appropriate for the Sun in the season (vide Adh. III—23 & 24 *supra*.); if it possesses the lustre of beryl, is white or bright, it causes happiness and plenty.

पीतो व्याधिं जनयत्यशोकरूपश्च शुक्लकोपाय ।

प्रतिस्वर्याणां माला दस्युभयात्कनूपहन्त्री ॥२॥

Sloka 2.—A yellow mock-Sun produces disease ; one of the colour of the Asoka blossom (red) leads to the clash of weapons; and a row of mock-Suns tends to danger from robbers, to disease and destruction of kings.

दिवसकृतः प्रतिस्पर्शो जलकुदुदक्षिणे स्थितोऽनिलकृत् ।

Sloka 3.—When a mock-Sun appears to the north of the Sun, it gives rain ; to the south, a strong wind ; on both sides, danger from water ; the same appearing above the Sun, destroys the king ; and below, the people.

This sloka has already appeared in the 3rd Adhyaya as Sloka 37.

In the morning for about three hours, when there are thin clouds near the Sun, there appears another Sun as it were, on account of the Sun's rays (reflected in the clouds). This is called a mock-Sun. This may happen likewise in the evening also.

Sloka 14.—Similarly, the Sun posited in any one of the signs Dhanus, Makara and Kumbha and aspected by or conjoined with the benefics, makes the autumnal crops

flourish and fetch fair price, etc. But at the time of harvest, if the Sun be aspected by or conjoined with the two malefics, effects, quite contrary to the above should be understood to happen (*i. e.* the corn will be very costly, useless and infested with pest. But for sale, the period will be all right.)

Thus ends the 40th Adhyaya on 'Growth of Crops.'

ध्वजार्थं देवराजस्य पूजेयं प्रतिगृह्यताम् ॥१८॥

Slokas 17-18.—"Hail to all beings living in this tree! Salutation to you. May you change your abode after receiving this gift. O great tree, hail to you! The king chooses you for the banner of the king of the Gods. Kindly accept this worship."

Sloka 19.—At dawn, facing the East or North, he (the carpenter) should cut the tree. A rough and creaking sound of the axe is not auspicious, but a soft and full one is favourable.

नृपजयदमविध्वस्तं पतनमनाकुञ्चितं च पूर्वोदक् ।

Sloka 21.—The tree must be chopped at the top to the extent of four inches, and at the bottom, of eight inches, and then the trunk must be put into water. After taking it out, it must be taken to the town-gate through cart or by men.

अरभङ्गे बलभेदो नेम्या नाशो बलस्य विज्ञेयः ।

अर्थक्षयोऽक्षभङ्गे तथाणिभङ्गे च बद्धकिनः ॥२२॥

Sloka 22.—If the spoke of the cart-wheel give way when the tree-trunk is being carried, the king's army will be shattered ; if the rim breaks, the army will be destroyed ; if it is the axle, the king will lose his wealth ; and if the axle-pins give way, the carpenter will come to grief.

Slokas 29-30.—Then the carpenter should plane the trunk and mount it on a platform, so that it is held

horizontally on it. On the eleventh day of the month, the king should cause vigil to be observed at night. The royal priest dressed in white cloths and wearing white turban should offer oblations to the Fire with hymns addressed to Indra and Vishnu, and the astrologer should observe the symptoms of the fire.

Slokas 42-49.—The first ornament of the hue of the red Asoka flower and of quadrangular shape was given by Viswakarmān (the celestial architect); Brahman and Siva gave severally a girdle of many colours. The third ornament, octangular and bluish-red, was given by Indra. Yama conferred the fourth gift, *viz.*, a dark and lustrous ममूरक (name of an ornament on Indra's Banner). Varuna gave the fifth ornament, a sexangular and madder-hued one, resembling the waves of water. Vayu bestowed the sixth gift, *viz.*, an armlet, made of peacock feathers and as dark as cloud. Lord Subrahmanya gave the Banner his own multi-coloured armlet as the seventh. The God of fire gave the eighth, a circular ornament resembling the flame of Fire. Indra gave another ornament, *viz.*, the ninth, a necklace looking like beryl.

One of the Sun-Gods, by name Twashta, gave a lustrous ornament, looking like the wheel of a chariot, as the tenth. The Viswedevas gave the eleventh ornament called Udvamsa, resembling a lotus. The sages bestowed the twelfth gift named Nivesa bearing the lustre of blue lily. Jupiter and Venus adorned the head of the Banner with the thirteenth ornament slightly bent at the two ends (or endowed with short bottom and top), broad at the upper end and shining like molten red lac. Whatever ornaments were created by the Gods severally for the sake of the Banner, are to be understood by the wise as being presided over by the respective deities.

Slokas 62-66.—The wise declare that there is great danger in store for the King if a carcass-eating bird, owl, dove, crow or vulture sits on the Banner. If it be a blue jay, the danger is for the Yuvaraja ; an eagle sitting on it, will deprive the King of his eyes. The King will die if the umbrella on the banner breaks or falls down. If honey-bees cling to it, there will be danger from thieves ; a meteor falling on it augurs the preceptor's death ; a lightning, that of the queen. The fall of a flag denotes the queen's death, while that of an ornament augurs drought. If the staff should break in the middle, top and bottom, the ministers, the King and the citizens will respectively meet with their end. When the staff is covered with smoke, there is danger from fire ; when with darkness, mental aberration will be the result. The ministers will be destroyed if the figures of the snakes fall or break. If portents are observed in the north and other quarters, Brahmins and other castes will suffer. If any of the staffs called 'Indra's daughters' break, courtezans will die. If the ropes should give way, children will suffer. If the prop at the bottom breaks, it indicates trouble to the King's mother. Whatever good or bad is done by boys or actors will have corresponding effects.

Sloka 1.—When Lord Narayana opens his eyes, viz., the Moon and the Sun with the eye-lashes, viz., clouds (i. e., when he wakes up from his Yogic sleep in autumn), lustration should be performed for horses elephants and men (warriors).

Lustration of arms is a military and religious ceremony held by kings on the 19th of Aswayuja before taking the field.

God Vishnu rises from sleep on the 11th lunar day of the bright half of Kartika.

Slokas 17-18.—If the horse or elephant brought into the Holy House should stand with its right leg uplifted, then the King would soon vanquish his foes without difficulty; if it stands frightened, it augurs ill to the King. The activities of elephants and horses betokening good and bad results, which have been dealt with at length in the Yatra, should be applied to lustration also according to the circumstances.

Slokas 23-26.—The King should proceed in the following manner. The 'orecze should be scented by the dripping ichor of elephants that are gladdened by the sounds of tabors and conchs. The King shines like the Sun in autumn owing to the mass of glittering rays issuing from his crest jewels. His beautiful garlands and clothes are shaken by white chowries disseminating waves of fine fragrance just as the Himalayas is surrounded by the rows of swans flying hither and thither. The King adorned with jewels of various colours, diamonds, crown, ear rings and armlets and brightened by the rays

of numerous gems, creates the lustre of a rain-bow. The King is accompanied by horses springing up to the sky, as it were, by elephants tearing up as it were the earth and by warriors who have defeated their enemies just as Indra is attended upon by the Gods who have defeated their foes.

Sloka 27.—Or, he should proceed being adorned with diamonds and pearls, having garlands, head-dress, ointment and clothes, all white, an umbrella held over his head, and mounting an elephant, just as Venus does on a cloud having the Moon above him.

खञ्जनकलक्षणाध्यायः ॥४५॥ Wagtail.

खञ्जनको नामायं यो विहगस्तस्य दर्शने प्रथमे ।

प्रोक्तानि यानि मुनिभिः फलानि तानि प्रवक्ष्यामि ॥१॥

Sloka 1.—I mean expounding in this chapter the effects enunciated by ancient sages as pertaining to the first sight of the bird called Wagtail.

In Tamil, the bird is known as *गरुडपुंजु*.

Khanjanaka (खजनक) will not generally be seen in the sky during the four months beginning with Sravana (श्रावण).

कृष्णो गलेऽस्य बिन्दुः सितकरटान्तः सरिक्तकृद्रिक्तः ।

पीतो गोपीत इति क्लेशकरः खजनो दृष्टः ॥३॥

Slokas 2-3.—A variety of wagtails named Bhadra with a stout body and a dark, long and raised neck is auspicious. One which is dark from the face to the neck and termed 'Sampurna' (full) fulfils one's ambition. The one called 'Rikta' or empty has dark spots on the neck and white cheeks. It leads to disappointment. The one called Gopeeta which is yellow in colour produces trouble when sighted.

Slokas 4-6.—A wagtail in the following places tends to prosperity : on trees bearing fragrant flowers and sweet fruits, on holy lakes and rivers, on the heads of elephants, horses and serpents, on temples, gardens and

mansions, near cows, mangers, assembly of righteous men, sacrifices, auspicious functions, Kings and Brahmins, on elephant-yards, stables, umbrellas, flags, chowries and other royal appendages, near gold, on white cloths, lotuses, blue lilies, places of worship, paved and cleaned spots, on curd-pots and corn-ricks.

Slokas 7-8.—When the wagtail is seen perched on mud, sweet food will be obtained ; on a heap of cowdung, excellent milk and its products ; on green grass, clothes ; on a cart, devastation of the country ; on the roof of a house, loss of wealth will be the result ; on a piece of hide, imprisonment ; on filth, disease, and on backs of goats and sheep, immediate union with one's beloved.

महिषोष्ट्रगर्दभास्त्रिभुवनगृहकोणशर्करादुष्यः ।

Sloka 9.—It is inauspicious and tends to danger from death and disease if the wagtail is seen perched on a buffalo, camel, donkey, bone, burial ground, corner of a house, clod of earth, turrets, compound walls, heap of ashes or hair.

अत्रि is another reading for अट्रि.

पक्षौ धुन्वन्नशुभः शुभः पिवन् वारि निम्नगासंस्थः ।

Sloka 10.—It is inauspicious when a wagtail is seen flapping its wings ; when it is seen drinking water from

a river, it gives auspicious results ; also when seen in the early morning. In the evening, it forebodes evil.

नीराजने निवृत्ते यया दिशा खञ्जनं नृपो यान्तम् ।

पश्येत्तया गतस्य क्षिप्रममतिर्वशमुपैति ॥११॥

Sloka 11.—If a King observes at the end of a lustration ceremony a wagtail flying in a particular direction and marches in that quarter, he will surely subjugate his enemies there before long.

Sloka 13.—The bird being dead, crippled, wounded or diseased produces effects similar to the condition of its body. If it comes to roost in one's front, the person will get wealth ; if it flies up into the sky, it indicates one's meeting with one's kith and kin.

उत्पाताध्यायः ॥४६॥ Portentous Phenomena.

यानत्रेरुत्पातान् गर्गः प्रोवाच तानहं वक्ष्ये ।

तेषां सङ्क्षेपोऽयं प्रकृतेरन्यत्वमुत्पातः ॥१॥

Sloka, 1.—I shall now treat of portents enunciated by Atri and expounded by Garga after him. The following is a summary of them : Anything contrary to nature is termed a portent or Utpata.

Sloka 2.—Sins accumulate as a result of wrongful actions committed by men; and troubles arise from them as a consequence. The three kinds of portents, *viz*, celestial, atmospheric and terrestrial, foreshadow such troubles.

Sloka 3.—Displeased with the misdeeds of men, the Gods create these portents. The King should cause expiatory ceremonies to be performed in order to ward off their evil consequences.

Slohas 4-5.—The celestial portents consist of the unnatural behaviour of planets and asterisms, meteors, thunders, storms and halos; the atmospheric ones, of aerial cities, rainbows, etc.; and the terrestrial ones arise from the moving and the stationary objects. This last class can be warded off through expiatory rites; the atmospheric can be mitigated, while the celestial according to some cannot be so assuaged.

Sloka 9.—The breaking or falling down of the axle, wheel, yoke and flag of the car during a temple-festival or the being twisted, the destruction and the entanglement of the above things, do not lead to the well-being of the King as well as of his country.

मासैश्चाप्यष्टाभिः सर्वेषामेव फलपाकः ॥१४॥

Slokas 10-14.—Any unnatural behaviour observed in the images of sages, Yama, Manes and Brahman foreshadows evil to the Brahmins; one in the images of Siva and the protectors of the quarters, to the cattle; one in the images of Jupiter, Venus and Saturn, to the priests; of Vishnu, to the people; of Skanda and Visakha, to the potentates of principalities: of Sage Vyasa, to the minister; of Lord Ganapati, to the Commander of the army; of the Creator and Viswakarmā,

betokens the destruction of the people. Any unnatural feature seen in the idols of Gods, in the figures of boys, girls, women and servants indicates the ruin of the King's sons, daughters, harem and servants. Similarly one seen in the idols of demons, goblins, Yakshas, and serpents, leads to the same result. All these portents produce their effects in eight months.

Slokas 15-16.—On seeing portents in the idols of Gods, the priest, being clean after a bath, and fasting for three days, should worship them (idols) with ablutions, flowers, pastes and garments. He should also propitiate them with the offerings of Madhuparka, (a mixture of five ingredients), eatables and other presents, and offer into the Sacred fire, cooked rice according to rules, with the hymns addressed to the deities.

Sloka 17.—If kings perform properly the expiatory rites for 7 nights along with worship and Dakshina to Brahmins and Gods, and also with songs, dance and festivities, whenever they see a portent of Gods, they will not experience the evil effects of the portents.

(2) *Portents through Fire.*

राष्ट्रे यस्याग्निः प्रदीप्यते दीप्यते च नेन्धनवान् ।

मनुजेश्वरस्य पीडा तस्य च राष्ट्रस्य विज्ञेया ॥१८॥

Sloka 18.—If there be flames without fire and fuel in any country, it forebodes trouble to the King and his dominions.

जलमांसार्द्रज्वलने नृपतिवधः प्रहरणे रणो रौद्रः ।

सैन्यग्रामपुरेषु च नाशो बह्वैर्मयं कुरुते ॥१९॥

Sloka 19.—If fire is observed on water, flesh or anything wet, it indicates the King's death ; on weapons, a sanguinary war ; and if the fire goes out in military camps, villages or towns, there will be danger from fire.

प्रासादभवनतोरणकेत्वादिष्वननलेन दग्धेषु ।

तडिता वा षण्मासात् परचक्रस्यागमो नियमात् ॥२०॥

Sloka 20.—If temples, houses, triumphal arches, flags and the like are burnt, without fire or by lightning, there will undoubtedly be an invasion by a foreign enemy.

धूमोऽनघ्निसमुत्थो रजस्तमश्चाहिज महाभयदम् ।

व्यथ्रे निश्युदुनाशो दर्शनमपि चाह्नि दोषकरम् ॥२१॥

Sloka 21.—Smoke produced without fire, dust and darkness seen at day-time, the disappearance of the stars on a cloudless night and their appearance at day-time, tend to very great peril.

Sloka 23.—The blazing, moving, sounding, rushing out of the sheath, trembling or any other unnatural phenomenon of the sword foreshadows a dreadful war and confusion in the near future.

मन्त्रैराग्नेयैः क्षीरघृक्षात्समिद्धिर्होतव्योऽग्निः सर्वपैः सर्पिषा च ।

अग्न्यादीनां वैकृते शान्तिरेवं देयं चास्मिन् काश्चनं ब्राह्मणेभ्यः ॥

Sloka 24.—The expiation to be performed for portents of fire, etc., consists of a sacrifice to the fire with white mustard seeds, ghee and the twigs of milky trees, to the accompaniment of hymns addressed to the Fire God, and of gifts of gold to the Brahmins.

शाखाभङ्गेऽकसाद्रक्षाणां निर्दिशेद्रणोद्योगम् ।

हसने देशभ्रंशं रुदिते च व्याधिबाहुल्यम् ॥२५॥

Sloka 25.—If the branches of trees break down all of a sudden (without any cause), preparation for war should be foretold; if the trees produce a laughing sound, ruin of a country will be the result; and if they produce a weeping sound, there will be a rich crop of diseases.

राष्ट्रविभेदस्त्वनृतौ बालवधोऽतीव कुसुमि ते बाले ।

बुधात् क्षीरस्त्रावे सर्वद्रव्यक्षयो भवति ॥२६॥

Sloka 26.—If trees yield flowers (and fruits) out of season, the country will be thrown into confusion (disintegration); if a tender plant blossoms very luxuriantly, children will die; and if milk flows from trees, all substances will be destroyed.

तथा च गर्गः ।

स्वराष्ट्रभेदं कुरुते फलपुष्पमनातवम् ।

बाळानां मरणं कुर्याद्वाळानां फलपुष्पजम् ॥

मये वाहननाशः सङ्ग्रामः शोणिते मधुनि रोगः ।

स्नेहे दुर्भिक्षमयं महज्जयं निःसृते सलिले ॥२७॥

Sloka 27.—If wine flows from trees, vehicles will be destroyed; if blood, there will be war; if honey, disease; if oil, threat of famine; and if water, there will be great misery.

शुष्कविरोहे वीर्यात्मसङ्ग्रहः शोषणे च विरुजानाम् ।

पतितानामुत्थाने स्वयं भयं देवजनितं च ॥२८॥

Sloka 28.—If withered trees sprout up again and healthy ones wither away, there will be the decay of strength (powerful men) and food, and if fallen trees stand erect by themselves, there is fear of divine visitations.

पूजितवृक्षे खनृतौ कुसुमफलं नृपवधाय निर्दिष्टम् ।

धूमस्ताक्षिन् ज्वालाऽथवा भवेन्नृपवधायैव ॥२९॥

Sloka 29.—If a worshipping tree should bear flowers and fruits out of season, or if there be smoke or flame on it, the destruction of the King is indicated.

सर्पत्सु तरुषु जल्पत्सु वापि जनसङ्ग्रहो विनिर्दिष्टः ।

बुधाणां वैकृत्ये दशभिर्मसैः फलविपाकः ॥३०॥

Sloka 30.—The walking or talking of trees presages the annihilation of the population. The portents of trees bear fruit within ten months.

समान्धूपाम्बरपूजितस्य छत्रं विधायोपरि पादपस्य ।

कुत्वा शिवं रुद्रजपोऽत्र कार्यो रुद्रेभ्य इत्यत्र षडेव होमाः ॥३१॥

पायसेन मधुनापि भोजयेद्वाङ्गणान् घृतयुतेन भूपतिः ।

मेदिनी निगदितात्र दक्षिणा वैकृते तरुकृते हितार्थिभिः ॥३२॥

Slokas 31-32.—Putting an umbrella over it, the tree should be worshipped with garlands, perfumes, incense and cloths. An image of Siva should be placed under it and the hymn called Rudra chanted repeatedly ; and only six offerings made with the fire with the hymn " Hail to the Rudras." Then the King should feed Brahmins with Payasa, honey and ghee. The Dakshina laid down by those interested in the weal of the country in connection with the portents of trees, is in the form of gifts of land.

(4) Portents connected with crops.

नालेऽजयवादीनामेकसिन् द्वित्रिसम्भवो मरणम् ।

कथयति तदधिपतीनां यमलं जातं च कुसुमफलम् ॥३३॥

Sloka 33.—If the stalk of lotus, barley or wheat has a branch or two, it forebodes its owner's death ; so does a double fruit or flower.

अतिवृद्धिः सस्यानां नानाफलकुसुमसम्भवो वृक्षे ।

भवति हि यद्येकसिन् परचक्रस्यागमो नियमात् ॥३४॥

Sloka 34.—If there is an overluxuriant growth of crops and varieties of flowers and fruits on a single tree, there will certainly be an invasion by a foreign power.

अर्धेन यदा तैलं भवति तिलानामतैलता वा स्यात् ।

अन्नस्य च वैरस्यं तदा तु विन्याद्भयं सुमहत् ॥३५॥

Sloka 35.—When sesamum seeds yield only half the quantity of oil or no oil at all, and food loses its taste, one should know that there is great danger impending.

विकृतकुसुमं फलं वा ग्रामादथवा पुराद्बहिः कार्यम् ।

सौम्योऽत्र बरुः कार्यो निर्वाप्यो वा पशुः शान्त्यै ॥३६॥

सस्ये च दृष्टा विकृतिं प्रदेयं तत्क्षेत्रमेव प्रथमं द्विजेभ्यः ।

तस्यैव मध्ये चरुमत्र भौमं कृत्वा न दोषं समुपैति तज्जम् ॥३७॥

Slokas 36-37.—An unnatural flower or fruit should be removed from the village or town. For the expiation of the portent, cooked rice should be offered to Soma and a goat sacrificed. On seeing any unnatural phenomenon in the crop, the field itself should be made over to Brahmins at first ; and at the centre of the field, the owner should make an offering of cooked rice to the Earth. By so doing, he will not experience the evil effects of the portents.

(5) *Portents connected with Rainfall.*

दुर्भिक्षमनावृष्टावतिवृष्टौ क्षुद्भयं परभयं च ।

रोगो हनृतुमवार्या नृपतिबधोऽनभ्रजातायाम् ॥३८॥

Sloka 38.—Drought foretells famine ; excessive rain, famine and threat of foreign invasion ; untimely rain, disease ; and rain without clouds, the King's death.

शीतोष्णावपर्यासो नो सम्यगृतुषु च सम्प्रवृत्तेषु ।

पण्मासाद्वाष्ट्रभयं रोगभयं देवजनितं च ॥३९॥

Sloka 39.—Cold in the hot season and heat in the cold season, and the seasons not functioning properly,

foreshadow danger to the kingdom, fear of disease and divine visitation in six months.

अन्यत्तौ सप्ताहं प्रबन्धवर्षे प्रधाननृपमरणम् ।

रक्ते शस्त्रोद्योगो मांसास्थिवसादिभिर्मरकः ॥४०॥

धान्यहिरण्यत्वक्फलकुसुमाद्यैर्वर्षितैर्मयं विन्यात् ।

अङ्गारपांमुर्वे विनाशमायाति तन्नगरम् ॥४१॥

Slokas 40-41—Continuous rain for seven days in any season but the rainy, denotes the death of the chief sovereign. If there be a rain of blood, there would be war ; of flesh, bones, marrow and the like, epidemics ; of corn, gold, tree-barks, fruits, etc., peril ; and of burning coal and dust, the particular town will be destroyed.

उपला विना जलधरैर्विकृता वा प्राणिनो यदा वृष्टाः ।

छिद्रं वाभ्यतिवृष्टौ सस्यानामीतिसञ्जननम् ॥४२॥

Sloka 42.—When there is a rain of stones without clouds or of unnatural animals, or during an excessive rain when there is some spot without any rain whatsoever, the crops would get the six-fold pest. (P. 61, *supra*.)

क्षीरघृतक्षौद्राणां दध्नो रुधिरौष्णवारिणां वर्षे ।

देशविनाशो ज्ञेयोऽसृग्वर्षे चापि नृपयुद्धम् ॥४३॥

Sloka 43.—When there is a rain of milk, ghee, honey, curds and hot water, the ruin of the country is to be predicted ; and when there is one of blood, war among kings will be the result.

This Sloka is omitted in some editions.

यद्यमलेऽर्के छाया न दृश्यते दृश्यते प्रतीपा वा ।

देशस्य तदा सुमहद्भयमायातं विनिर्देश्यम् ॥४४॥

Sloka 44.—If trees cast no shadow even when the Sun shines brightly, or if the shadow is in the same

direction as the Sun, it should be predicted that great calamity is in store for the country.

व्यभ्रे नभसीन्द्रधनुर्विवा यदा दृश्यतेऽथवा राशौ ।

प्राच्यामपरस्यां वा तदा भवते क्षुद्भयं सुमदत् ॥४५॥

Sloka 45.—If there be rainbow in a cloudless sky by day or night, in the east or west, then there will be great peril from starvation.

सूर्येन्दुपर्जन्यसमीरणानां यागः स्मृतो वृष्टिविकारकाले ।

धान्यामगोकाश्चनदक्षिणाश्च देयास्ततः शान्तिमुपैति पापम् ॥४६॥

Sloka 46.—A sacrifice to the Sun, the Moon, Cloud and Wind has been ordained at the time of a portentous rain. If gifts of corn, food, cows and gold are also made to Brahmins, the sin arising from the above portent will disappear.

(6) *Portents connected with Water.*

अपसर्पणं नदीनां नगरादचिरेण शून्यतां कुरुते ।

शेषश्चाशोष्याणामन्येषां वा हृदादीनाम् ॥४७॥

स्नेहासृग्मांसवहाः सङ्कुलकलुषाः प्रतिपिगाश्चापि ।

परचक्रस्यागमनं नद्यः कथयन्ति षण्मासात् ॥४८॥

Slokas 47-48.—The receding of rivers from a town and the drying up of never-drying rivers or other places such as lakes, make the town desolate before long. If the rivers carry oil, blood or flesh, be turbulent or filthy, and flow upwards, they indicate attack by a foreign enemy after six months.

ज्वालाधूमकाथारुदितोत्क्रुष्टानि चैव कूपानाम् ।

गीतप्रजल्पितानि च जनमरकायोपदिष्टानि ॥४९॥

Sloka 49.—If wells show flames, smoke, ebullition, crying sound, shouting, singing and talking, they are said to tend to the mortality of the population.

सलिलोत्पत्तिरखाते गन्धरसविपर्यये च तोयानाम् ।

सलिलाशयविकृतौ वा महद्भयं तत्र शान्तिमिमाम् ॥५०॥

Sloka 50.—When water springs up from the earth without any digging, when the taste and smell of it undergo a change, or, when there is some unnatural occurrence in tanks, etc., great danger is to be apprehended. The following is the remedial measure to be adopted in that case.

सलिलविकारे कुर्यात् पूजां वरुणस्य वारुणैर्मन्त्रैः ।

तैरेव च जपहोमं शममेवं पापमुपयाति ॥५१॥

Sloka 51.—During a watery portent, Varuna should be worshipped with hymns addressed to him and with the same hymns meditation (Japa) and offerings to the Fire should be made. By so doing, the sin can be warded off.

(7) *Portents connected with Births.*

प्रसवविकारे स्त्रीणां द्वित्रिचतुःप्रभृतिसम्प्रसूतौ वा ।

हीनातिरिक्तकाले च देशकुलसङ्गयो भवति ॥५२॥

Sloka 52.—When women give birth to monstrosities, or two, three, four or more children at a time, long before or after the usual period, ruin befalls the country and the family.

बद्धबोष्ट्रमहिषगोहस्तिनीषु यमलोद्भवे मरणमेषाम् ।

षण्मासात् स्रुतिफलं शान्तौ श्लोकौ च गगोक्तौ ॥५३॥

Sloka 53.—If mares, camels, she-buffaloes, cows and cow-elephants bring forth twins, it augurs the death of these mothers. The effect of such births will come to be

felt six months later. The following two verses of Garga deal with the expiation therefor.

तथा च गर्गः ।

अकाले प्रसवे चैव कालान्तीतेऽथवा पुनः ।

असंख्याजनने चैव युग्मस्य प्रसवे तथा ॥

अमानुषाणि काण्डार्जिन मञ्जातद्वयज्जगानि वा ।

अनङ्गा ह्याधिकाङ्गा वा दीनाङ्गाः समन्वति वा ॥

विमुखाः पक्षिमदशास्तथार्धपुरुषाश्च वा ।

विनाशं तस्य देशस्य कुलस्य च विनिर्दिशेत् ॥

अमासवयसे गर्भे द्वौ चतुष्पात्त्रयोऽपि वा ।

अत्युष्मा विनताश्चापि प्रजायन्तेऽनयो भवेत् ॥

वडवा हस्तिनी गौर्वा यदि युग्मं प्रसूयते ।

विजन्त्यं विकृन्तं वापि पद्ममिसिर्नृक्षयः ॥

नार्यः परस्य विषये त्यक्तव्यास्ता हितार्थिना ।

तर्पयेच्च द्विजान् कामैः शान्तिः चैवात्र कारयेत् ॥५४॥

चतुष्पदाः स्वयूयेभ्यस्त्यक्तव्याः परभूमिषु ।

नगरं स्वामिनं यूथमन्यथा तु विनाशयेत् ॥५५॥

Slokas 54-55.—Such of the women as give birth to twins should be removed from the place and left in another country by one that wishes for happiness, He should also please Brahmins with things desired by them and cause an expiatory ceremony to be performed. As for the quadrupeds, they should be removed from their flock or herd and left in other countries ; otherwise, they will ruin their town, owners and herds.

(8) *Portents connected with Quadrupeds.*

परयोनावभिगमनं भवति तिरश्चामसाधु धेनूनाम् ।

उक्षाणो वान्योन्यं पिबन्ति श्वा वा सुरभिपुत्रम् ॥५६॥

मासत्रयेण विन्ध्याच्छिभिः संशयं परागमनम् ।

तत्प्रविधत्तायैतां श्लोकौ गर्गेण निर्दिष्टौ ॥५७॥

Slokas 56-57.—If quadrupeds mate with animals of a different kind, or cows with cows, oxen with oxen, or a dog sucks a calf, it is inauspicious and forebodes foreign invasion undoubtedly in three months. The following two verses have been taught by Garga for counteracting the evil effects of such portents.

तथा च गर्गः ।

द्वियोनिषु यदा यान्ति मिश्रीभावः प्रजायते ।

सरोद्ग्रहयमातङ्गा मनुष्या वा न साधु तत् ॥

अकाळसत्ता इत्यन्ते काले च विमदा यदि ।

मातङ्गोद्ग्रहयश्चानः पक्षिणो वा न साधु तत् ॥

धेनुं धेनुः पिबेद्यन्तुद्वानं ह्यनधुत्तथा ।

श्वा वा पिबेद्धेनुमथ धेनुः श्वानमथापि वा ।

प्रासेषु त्रिषु मासेषु परचक्रागमं वदेत् ॥

त्यागो विवासनं दानं तत्तस्याशु शुभं भवेत् ।

तर्पयेद्ब्राह्मणांश्चात्र जपहोमांश्च कारयेत् ॥५८॥

स्थालीपाकेन धातारं पशुना च पुरोहितः ।

प्राजापत्येन मन्त्रेण यजेद्ब्रह्मदक्षिणम् ॥५९॥

Sloka 58-59.—Abandonment, expulsion or making a gift of such quadrupeds will immediately remedy the portent. The owner should in such a contingency, also worship Brahmins and cause recitation and sacrifice to be gone through. The priest should make offerings of cooked and sanctified rice and of a goat chanting hymns addressed to the Creator, and feed Brahmins sumptuously with generous gifts.

(9) *Portents connected with the Wind.*

यानं वाहवियुक्तं यदि गच्छेत्तत्र जेच्च वाहयुतम् ।

राष्ट्रमथ मवति तदा चक्राणां सादमङ्गे च ॥६०॥

Sloka 60.—When a carriage moves without horses, or does not move when dragged by them, or when the wheels stick in the mud or give way, there is imminent danger to the realm.

गीतरवतूर्यशब्दा नमसि यदा वा चरस्त्रिरान्यत्वम् ।

मृत्युस्तदा गदा वा विस्वरतूर्ये पराभिभवः ॥६१॥

Sloka 61.—When sounds of singing and musical instruments are heard in the sky ; or moving objects (such as carts) become stationary, and stationary objects (like trees) move, it forebodes disease or death. When musical instruments produce unnatural sounds, there will be defeat at the hands of an enemy.

अनभिहततूर्यनादः शब्दो वा ताडितेषु यदि न स्यात् ।

व्युत्पत्तौ वा तेषां परागमो नृपतिमरणं वा ॥६२॥

Sloka 62.—When musical instruments produce sounds without being struck, or produce no sounds even being struck or produce multifarious notes, there will be invasion by a foe or the King's death.

गोलाङ्गलयोः सङ्गे दर्वीशुर्पाद्युपस्करविकारे ।

क्रोष्टुकनादे च तथा शस्त्रमयं मुनिवचश्चेदम् ॥६३॥

Sloka 63.—When ox and plough get entangled, when ladles, winnowing baskets, etc., and cooking utensils show portentous changes, or when they (above utensils) produce a sound similar to the howling of jackals (or when jackals howl ?), there will be danger from weapons. The following is the instruction of Sage Garga for remedying the portent.

वायव्येष्वेषु नृपतिर्वायुं शक्तुमिर्चयेत् ।

आवायोरिति पञ्चर्चो जप्तव्याः प्रयतैर्द्विजैः ॥६४॥

ब्राह्मणान् परमाग्नेन दक्षिणाभिश्च तर्पयेत् ।

बहुभुजदक्षिणा होमाः कर्तव्याश्च प्रयत्नतः ॥६५॥

Slokas 64-65.—During these aerial portents, the King ought to worship the Wind-God with flour of barley; and the Brahmins, being devout and pure, should recite repeatedly the five hymns beginning with “ आवयोः ” The King should worship Brahmins with Payasa and Dakshina. Similarly, offerings should be made unto the Fire with devotion and efforts, along with Brahmin-feeding and Dakshinas on a large scale

(10) *Portents connected with Animals and Birds.*

पुरपक्षिणो वनचरा वन्या वा निर्भया विशन्ति पुरम् ।

नक्तं वा दिवसचराः क्षपाचरा वा चरन्त्यहनि ॥६६॥

सन्ध्याद्वयेऽपि मण्डलमावध्नन्तो मृगा विहङ्गा वा ।

दीप्तायां दिश्यथवा क्रोशन्तः संहता भयदाः ॥६७॥

Slokas 66-67.—Village birds roaming in the forest, jungle birds getting freely into the town or village; day-birds (crows) flying at night; night-birds (owls, etc.) flying at day time; and birds or beasts forming circles at dawn and twilight, or howling in groups facing the Sun, presage danger.

इयेनाः प्ररुदन्त इव द्वारे क्रोशन्ति जम्बुका दीप्ताः ।

प्रविशेज्जेन्द्रभवने कपोतकः कौशिको यदि वा ॥६८॥

Sloka 68.—When eagles appear to be weeping, jackals facing the Sun howl hideously at the gates of the city, or when a pigeon or owl enters the King's palace, danger has to be apprehended.

श्वानः प्ररुदन्तः is another reading.

तथा च गर्भः ।

इत्येनगृध्रबलाकाश्च वामना मुण्डवारिणः ।

वाढ्वायन्त इवात्यर्थं प्ररीताः सङ्कशो यदि ॥

कृद्वन्ति श्विविधं यत्र तदेवाशु विनश्यति ।

पक्षभीक्ष्णं कपोता वा प्रविशन्ति वसन्ति वा ॥

राजवेश्मन्युलूका वा तच्छून्यमधिराज्यवेत् ।

कुक्कुटरुतं प्रदोषे हेमन्तादौ च कोकिलालापाः ।

प्रतिलोममण्डलचराः श्येनाद्याश्चाम्बरे भयदाः ॥६९॥

गृहचैत्यतोरणेषु द्वारेषु च पक्षिसङ्घसम्पातः ।

मधुवल्मीकाम्भोरुहसमुद्भवश्चापि नाशाय ॥७०॥

Slokas 69-70.—Cocks crowing in the evening, Cuckoos warbling in the beginning of the dewy season (Hemanta), and vultures and the like flying in a circle from right to left in the sky, denote danger. If groups of birds sit on houses, sacred trees, arches and gates, or if honey, anthill and lotus are produced in houses, etc., ruin will overtake the place.

श्वभिरस्थिशवावयवप्रवेशनं मन्दिरेषु मरकाय ।

पशुशस्त्रव्याहारे नृपमृत्युर्मुनिवचश्चेदम् ॥७१॥

Sloka. 71.—When dogs bring bones or parts of dead bodies into houses, epidemics will be the result; and when quadrupeds and weapons talk like human beings, there will be the King's death. The following is the Sage's advice for assuaging the evil effects of such portents.

मृगपक्षिविकारेषु कुर्याद्भोमान् सदक्षिणान् ।

देवाः कपोत इति च जप्तव्याः पञ्चभिर्द्विजैः ॥७२॥

सुदेवा इति चैकेन देया गावः सदक्षिणाः ।

जपेच्छाकुनसूक्तं वा मनो वेदशिरांसि च ॥७३॥

Slokas 72-73.—During the portents of beasts and birds, sacrifices should be performed along with Dakshina. Five Brahmins should repeat the hymn beginning with the words देवाः ऋषातः and one the hymn "Sudevah, etc." (*vide* Valakhilya 6 4). Or, they may recite the Sakuna hymn, the prayer मन्त्रे, etc. or the Atharva Siras. The priests should be given cows and Dakshina.

(11) *Portents connected with Indra's Banner,
Door-bolt, etc.*

शक्रध्वजेन्द्रकीलस्तम्भद्वारप्रपातमङ्गेषु ।
तद्वत्कपाटनोरणकेतूनां नरपतेर्मरणम् ॥७४॥

Sloka 74.—The falling down or breaking of Indra's standard, door-bolt, pillar, door, door-leaves, arch or flag indicates King's death.

सन्ध्याद्वयस्य दीप्तिर्धूमोत्पत्तिश्च काननेऽनघौ ।
छिद्रामावे भूमेर्दणं कम्पश्च भयकारी ॥७५॥

Sloka 75.—Brilliance at dawn and Sunset, the rise of smoke in the forest without fire, the splitting of the earth without breach and its tremor cause danger.

पाखण्डानां नास्तिकानां च भक्तः साध्वाचारप्रोज्झितः क्रोधशीलः ।
ईर्ष्युः क्रूरो विप्रदासकचेना यसिन् राजा तस्य देशस्य नाशः ॥७६॥

Sloka 76.—The country whose ruler is a friend of heretics and atheists who has abandoned the right conduct, is hot-tempered, malicious, cruel and intent on war will go to ruin.

प्रहर हर छिन्दि भिन्दीत्यायुधकाष्ठश्लेषाणयो बालाः ।
निगदन्तः प्रहरन्ते तत्रापि भयं भवत्याशु ॥७७॥

Sloka 77.—The place where boys strike one another holding weapons, sticks and stones in their hands

and crying "Strike !, undo !, cut !, pierce !" will have immediate danger.

तथा च पराशरः ।

यदि धनुरसिकाष्टकोष्टदस्ताः पुरशिखवो रणवस्त्रमाचरन्ति ।

प्रहरहरजह्यिन्द्राहरग्ने भयमचिरान्तुमुलं निवेदयन्ति ॥

अङ्गारगौरिकाद्यैर्विकृतप्रेताभिलेखनं यस्मिन् ।

नायकचित्रितमथवा क्षये क्षयं याति नचिरेण ॥७८॥

Sloka 78.—A house where figures of monsters or ghosts are drawn with charcoal, red-chalk, etc., or a picture of the house-owner is drawn with charcoal, etc., will ere long be destroyed.

लूतापटाङ्गशबलं न सन्ध्ययोः पूजितं कलहयुक्तम् ।

नित्योच्छिष्टस्त्रीकं च यद्गृहं तत्क्षयं याति ॥७९॥

Sloka 79.—That house, which is full of cobwebs, where there is no worship of Gods at dawn and Sunset, where there is constant quarrel and where there are unclean women every day, will meet with destruction.

दृष्टेषु यातुधानेषु निर्दिशेन्मरकमाशु सम्प्राप्तम् ।

प्रतिघातायैतेषां गर्गः शान्तिं चकारेमाम् ॥८०॥

Sloka 80.—When goblins are seen, pestilence is said to be imminent. For averting these portents, Sage Garga has laid down the following expiation.

महाशान्त्योऽथ बलयो भोजयानि सुमहान्ति च ।

करयेत् महेन्द्रं च माहेन्द्रं च समर्चयेत् ॥८१॥

Sloka 81.—The King should cause great expiations, oblations and large quantities of eatables to be made. There Indra with his consort should be worshipped.

(12) *Phenomena which are not Portents.*

नरपतिदेशविनाशे केतोरुदयेऽथवा ग्रहेऽर्केन्द्रोः ।

उत्पातानां प्रभवः खर्तुर्भवश्चाप्यदोषाय ॥८२॥

Sloka 82.—The appearance of portents at the time of the death of a king, devastation of the country by a hostile army, the rising of Ketu or of a solar or a lunar eclipse, and also the appearance of the following ones peculiar to the respective seasons, are not inauspicious.

ये च न दोषान् जनयन्त्युत्पातास्तानृतुस्वभावकृतान् ।

ऋषिपुत्रकृतैः श्लोकैर्विद्यादेतैः समासोक्तैः ॥८३॥

Sloka 83.—One can understand the portents which are occasioned by the peculiar nature of the seasons and so do not lead to evil effects, from the verses composed by Sage Rishiputra and summarized here-under.

वज्राशनिमहीकम्पसन्ध्यानिर्घातनिःखनाः ।

परिवेष्टजोधूमरक्ताकारास्तमयोदयाः ॥८४॥

द्रुमेभ्योऽन्नरसस्नेहबहुपुष्पफलोद्गमाः ।

गोपक्षिमदवृद्धिश्च शिवाय मधुमाधवे ॥८५॥

Slokas 84-85.—The following portents seen in the months of Chaitra and Vaisakha (*i. e.*, the spring season) are conducive of good results: Thunderbolt, lightning, earth-tremor, bright glare at twilight, sounds of loud thunder, haloes, dust, smoke (in forests), the Sun being crimson at rising and setting, the appearance of food, sweet juices, oil and abundant flowers and fruits on trees and increased lasciviousness on the part of bulls and birds.

तारोत्कापातकलुषं कपिलार्कन्दुमण्डलम् ।

अनग्निज्वलनस्फोटधूमरेण्वनिलाहतम् ॥८६॥

रक्तपद्मारुणा सन्ध्या नभः क्षुब्धार्णवोपमम् ।
सरिता चाम्बुसंशोषं दृष्ट्वा ग्रीष्मे शुभं वदेत् । ८७॥

Slokas 86-87.—The following portents seen in Summer, i. e., in Jyeshtha and Ashadha, are said to be auspicious: the sky tarnished with shooting stars and falling meteors; the orbs of the Sun and the Moon being tawny; blaze and explosion without fire, smoke and dust filling the sky; the twilight red like the red lotus; the sky resembling the ocean with surging billows; and the drying up of the waters of the rivers.

शक्रायुधपरीवेष विद्युच्छुक्कविरोहणम् ।
कम्पोद्धर्तनवैकृत्यं रसनं दरणं क्षितेः ॥ ८८॥
सरोनद्युदपानानां वृद्धयर्ध्वतरणप्लवाः ।
सरणं चाद्रिगेहानां वर्षासु न भयावहम् ॥ ८९॥

Slokas 88-89.—The following portents are not harmful in the rainy season:— Rainbow, haloes, lightning, the sprouting up of withered trees, trembling, upheaval and unnatural appearance, rumbling and splitting of the earth; rising, overflowing and inundations of lakes, rivers and wells; and breaking of mountains and houses.

दिव्यस्त्रीभूतगन्धर्वविमानाद्भुतदर्शनम् ।
ग्रहनक्षत्रताराणां दर्शनं च दिवाऽम्बरे ॥ ९०॥
गीतवादित्रनिर्घोषा वनपर्वतसानुषु ।
सस्यवृद्धिरपां हानिरपापाः शरदि स्मृताः । ९१॥

Slokas 90-91.—In autumn, the following portents augur well:—The sight of celestial nymphs, spirits, Gandharvas, aerial chariots, marvellous things and planets, asterisms and stars by day in the sky; sounds of

singing and musical instruments in the forests and on mountain slopes; increase of crops and decrease of water.

शीतानिलतुषारत्वं नर्दनं मृगपक्षिणाम् ।
रक्षोयक्षादिसंस्वानां दर्शनं वागमानुषी ॥९२॥
दिशो धूमान्धकाराश्च सनभोवनपर्वताः ।
उच्चैः सूर्योदयास्तौ च हेमन्ते शोभनाः स्मृताः ॥९३॥

Slokas 92-93.—In the dewy season, the following prove beneficial: cold blast, frost, cries of birds and beasts, sight of demons, Yakshas and such invisible beings; aerial voice, the quarters with the sky, forests and mountains darkened with smoke and the high rising and setting of the Sun.

हिमपातानिलोत्पाता निरूपाद्भुतदर्शनम् ।
कृष्णाञ्जनाममाकाशं तारोल्कापातपिञ्जरम् ॥९४॥
चित्रगर्भोद्भवाः स्त्रीषु गोऽजाश्चमृगपक्षिषु ।
पद्माङ्कुरलतानां च विकाराः शिशिरे शुभाः ॥९५॥

Slokas 94-95.—The following phenomena in winter are productive of good effects: snowfall, unnatural winds, the sight of deformed and wonderful beings (divine ones); the sky resembling dark collyrium, and variegated with the fall of stars and meteors; wonderful births from women, cows, goats, horses, beasts and birds; and unnatural changes in leaves, sprouts and creepers.

ऋतुस्वभावजा येते दृष्टाः स्वर्तो शुभप्रदाः ।
ऋतोरन्यत्र चोत्पाता दृष्टास्ते चातिदारुणाः ॥९६॥

Sloka 96.—The aforesaid phenomena arising from the special features of the seasons produce good effects, if seen in their respective seasons. On the other hand, if they are observed in other seasons, the portents prove very dreadful.

Slokas 1-3.—In the beginning of this work I have treated, in great detail, of the good and bad effects of the celestial and atmospheric phenomena mostly in connection with the planets' courses, conjunctions, wars, paths and the like. "It does not behove Varahamihira, being noted for brevity, to repeat the same subject," so some will find fault with him. But those in the know of this science should not say that this chapter is a repetition of the effects already dealt with, because this chapter, entitled 'Barini Chitraka'—Peacock's colours—is a well-known chief section of this Samhita (collection) [or "since this is an important section of the Samhita, men of science should not repeat the subject] and it is but the nature of this section to reiterate what has been once recounted. If I leave out this chapter, still people will blame me.

Sloka 28.—Here have I expounded without any repetition all that the ancient sages have treated of in great detail. That the crow caws even after hearing the warbling of the cuckoo, is entirely due to its innate nature and not to its desire of vanquishing the cuckoo.

The following notes of Mr. Chitambara Iyer relating to the phenomena of nature culled from other works are quoted :

"There will be famine as long as the course of Jupiter and that of Saturn lie through the end of the signs Mesha and Vrischika and through the middle of Vrishabha and Simha.

During the period when Jupiter and Saturn occupy a single sign of the zodiac, there would be pestilence, cholera and death among the people.

As long as Jupiter and Venus continue together in a state of disappearance, mankind will suffer from devils, diseases, thieves and enemies.

If the course of Saturn or the retrograde motion of Mars should lie through the signs of Dhanus, Mesha, Vrishabha, Meena or Simha, there would be such deaths among men and animals that only a third of mankind, of elephants, horses, cows and other animals of birds and of creatures of water would survive.

If the motion of Mars should be an accelerated one, there would be fear from destructive fires; if he should retrograde and enter another sign, the people would suffer from heat and many families would suffer, and if his course should be through a sign longer than the calculated period, there would be drought in the land and rulers will be at war.

If Jupiter should retrograde or if his motion should be an accelerated one, and if in this state he should enter another sign, the rivers would not be full; the kings would lose their glory and suffer from diseases.

If Saturn should, after a long direct course, begin to retrograde or have an accelerated motion and in this state enter another sign, there would be diseases, famine and drought in the land and vehicles will suffer destruction.

If, when Jupiter should enter another sign when in his accelerated motion, Saturn should be in his slow motion, Venus should have disappeared, and Mercury should have reappeared, the country would perish.

If Saturn, Mars and Jupiter should be within sight of each other, men with their children would suffer from hunger and from weapons.

If, while the course of the Sun lies through the end of the signs Vrishabha, Mithuna, Vrischika and Simha, Jupiter and Mars should be in conjunction with it, mankind would suffer from famine, and the deaths would be so many that in the cremation grounds of villages and towns, Pisachas might be seen with hundreds of dead bodies in their mouths.

If two, three or four planets should meet together, people would suffer from death and famine. If five planets should meet, there would also be famine; if six, the chief ruler would run away from his kingdom, and if seven, humanity would come to an end.

If the course of Mars and Saturn, through the signs of Karkataka, Simha and Meena should be retrograde or re-retrograde, there would be much suffering on earth. There would also be a scarcity of water and wars in the land; grains would be destroyed and mankind would suffer from robbers.

If Saturn and Rahu should meet, crops would be injured; commodity would become scarce; husbands and wives would be at strife, there would be drought and famine in the land; cows would suffer death and men would become exceedingly lazy.

If the course of the Sun and the Moon, both of brilliant discs, should lie through the seven asterisms from Krittika, Madhyadesa would suffer miseries.

If the course of the Sun, the Moon, Mars and Venus should lie through the seven asterisms from Magha, there would be grief and disease among men and the God of Death would be busy in his wide work of destruction in the southern countries.

If the course of Jupiter, the Moon and Mercury, all of brilliant discs, should lie through the seven asterisms from Anuradha, the western countries, as far as the sea, as well as the western sea itself with its creatures would suffer miseries.

If the course of the Sun, Venus and Mars should lie through the seven asterisms from Sravishta, the northern countries would suffer miseries. If the benefic planets should appear of the colour of gold, the Brahmins, the Kshatriyas, the Vaisyas and the Sudras would all attend to their respective duties and would become happy."

Thus ends the 47th Adhyaya on "Motley Miscellany."

Sloka 22.—After worshipping the infused deities, they should spend the night there in order to ascertain the good or bad nature of the future revealed by dreams, the rules pertaining to which have been dealt with in my work 'Yatra'.

Sloka 23.—On the morrow, at dawn, the materia possessing the prescribed qualities are to be offered on

the earth, and the following are the verses enunciated by the ancient sage on this subject.

तस्मिन्मण्डलमालिख्य कल्पयेत्तत्र मेदिनीम् ।
 नानारत्नाकरवतीं स्थानानि विविधानि च ॥२४॥

Slokas 24-28.—In that place, a circle should be drawn by the priest and filled with varieties of gems, and places kept apart for worshipping the different deities, viz., Serpents, Yakshas, Gods, Manes, Gandharwas, Nymphs, Sages and Siddhis. The learned priest should draw with various coloured powders the figures of the planets with all the stars, Rudras, the Mothers (7 in number), Skanda, Vishnu, Visakha, the protectors of the quarters and divine ladies, and duly worship them with perfumes, garlands, scented paste, eatables and food of various kinds and varieties of roots, fruits and meat and attractive drinks such as toddy, milk and wine.

Slokas 29-33.—Now I shall explain the mode of worshipping the deities drawn in the circle. As for the planets, the same method as given in the *यात्रा* in connection with planetary sacrifices should be followed. The Danavas, Daityas and Pisachas are to be worshipped with flesh, rice, liquor, etc.; the Manes with oil bath, collyrium, sesamum, meat and rice; the sages with hymns from Sama, Yajus and Rig Vedas, perfumes, incense and garlands; the serpents with unmixed colours and the triple sweet—honey, ghee and sugar; the Gods with incense, ghee, oblations, garlands, gems, invocations and salutations; the Gandharwas and the nymphs with fine perfumes and sweet-smelling garlands; the remaining deities with multi-coloured offerings. All the deities should be worshipped and also strings dipped in saffron-paste, cloths, flags, ornaments and sacred threads should be placed in their respective compartments.

Slokas 34-36.—To the west or the south of the circle, fire should be kindled on the sacrificial altar and all the necessary materials collected as well as long blades of Darbha grass that have passed their sprouting stage ; and fried grains, ghee, coloured rice, curd, honey, white mustard seeds, perfumes, flowers, incense, yellow orpiment, collyrium, sesamum and sweet fruits of the season. On the circle should be placed earthen plates filled with ghee and Payasa and with these materials, worship should be done on the western altar, as this is the one recommended for the royal ablution.

Slokas 37-38.—And in the four corners of the altar should be placed strong pots with white strings tied round their necks, and sprouts of milky trees and fruits on their mouths. They should be filled with water containing the herbs prescribed for the ablution, and gems and then the materials for the ablution enumerated by Sage Garga as hereunder (*vide* next two *Slokas*), should be collected.

Slokas 43-45. — At first, the skin of a bull bearing auspicious marks, which had died after full age should be spread on the altar with the neck turned to the east. Over this, should be placed a red and unimpaired skin of a fighting bull. Over this is to be spread a lion's skin, and over that, a tiger's. This is to be done in an auspicious Muhurta when the Moon is on the star Pushya.

Slokas 46-47. — The throne made of gold, silver or copper or of any milky tree is to be placed on the afore-said skins. If its height is one cubit, one and a quarter, and one and a half cubits, it will prove beneficial to rulers of states, conquerors of neighbouring kingdoms and those who wish to bring the whole earth under their sway respectively.

Slokas 48-49. — Having placed gold on the throne (having put some gold inside the throne), the King should sit on it with a happy mind, in the company of his ministers, trustworthy friends, preceptors, astrologers, citizens, and those having auspicious names; and with bards, townsmen and Brahmins shouting and chanting

in a chorus the Punyaha hymn and the Vedas; and all evils warded off through the auspicious sounds of tabors, conchs and other musical instruments.

Sloka 50.—Then the preceptor should anoint the King who is clad in fresh (unwashed) silken garments, and who has offered oblations and worship to the deities, with ghee contained in pots after covering him with a blanket.

अष्टावष्टाविंशतिरष्टशतं वापि कलशपरिमाणम् ।

अधिकेऽधिके गुणोत्तरमयं च मन्त्रेऽत्र मुनिगीतः ॥५१॥

Sloka 51.—The number of holy pots to be used is eight or twenty eight or a hundred and eight. The greater the number of pots consecrated, the greater will be the efficacy. The following is the hymn composed by the Senior Garga for the anointing ceremony.

आज्यं तेजः समुद्दिष्टमाज्यं पापहरं परम् ।

आज्यं सुराणामाहार आज्ये लोकाः प्रतिष्ठिताः ॥५२॥

भौमान्तरिक्षं दिव्यं वा यत्ते कल्मषमागतम् ।

सर्वं तदाज्यसंस्पर्शत् प्रणाशमुपगच्छतु ॥५३॥

Slokas 52-53.—Consecrated ghee has been mentioned as power (splendour); it is the best dispeller of sins; it is the food of the Gods; on it are established all the worlds. Whatever sin—terrestrial, atmospheric or celestial—has befallen you, may all that melt away by your contact with this sanctified ghee."

कम्बलमपनीय ततः पुण्यस्नानाम्बुभिः सकलपुण्यैः ।

अभिषिञ्चेन्मनुजेन्द्रं पुरोहितेऽनेन मन्त्रेण ॥५४॥

Sloka 54.—Then, the royal priest should remove the blanket and bathe the king with the “Waters of the Royal Ablution” containing fruits and flowers, reciting the following hymns :

सुरास्त्वामभिषिञ्चन्तु ये च सिद्धाः पुरातनाः ।

Slokas 55-70.—May the Gods bathe you, and the ancient Siddhas, Brahman, Vishnu, Rudra, Sadhyas, groups of Maruts, the Suns, Vasus, Rudras, the great celestial physicians, Aditi, the mother of the Gods, Svaha, Siddhi, Saraswati, Kirti, Lakshmi, Dhriti, Sree, Sineevali, Kuhu, Danu, Surasa, Vinata, Kadru, the consorts of Gods that have not been mentioned so far, and also mothers of Gods, may all these bathe you! The groups of divine nymphs, the stars, Muhurtas, Fortnights, Days, Nights, the three junctions, Years, the lords of Day (the Sun and other planets), Minutes, Seconds Moments, Lavas (the sixth part of a twinkling), all these, and other auspicious divisions of Time, may they bathe you! Sages engaged in the propogation of the Vedas, and hermits with their wives and disciples bathe you! The Vaimanikas (owners of aerial chariots), groups of Gods, Manus, Oceans Rivers, the great Serpents, Kimpurushas, Vaikhanasas, the great Brahmins, Vaihayasas, the seven seers with their wives, the Fixed Places, Marichi, Atri, Pulaha,

Pulasthya, Kratu, Angiras, Bhrigu, Sanatkumara, Sanaka, Sanandana, Sanatana, Daksha, Jaigeeeshavya, Bhagandara, Ekata, Dwita, Trita, Jabali, Kasyapa, Durvasas, Durvineeta, Kanwa, Katyayana, Markandeya, Deerghatapas, Sunassepha, Viduratha, Urva, Samvarthaka, Chyavana, Atri, Parasara, Dwaipayana, Yavakreeta, Deva-
 raja and his younger brother, Mountains, Trees, Creepers, Holy places, Prajapati, Diti, Cows, the Mothers of the Universe, Divine Vehicles, all the Worlds, the Moving and Stationary Beings, Fires, Manes, Stars, Clouds, Sky, Quarters, Water, these and many others of auspicious names bathe you with holy waters that destroy all the portents, just as Indra was anointed by all these with a happy mind !

इत्येतैश्चान्यैश्चाप्यथर्वकल्पाहितैः सरुद्रगणैः ।

कौष्माण्डमहारौहिणकुबेरहृद्यैः समृद्ध्या च ॥७१॥

Sloka 71.—With these hymns and others prescribed in the books on rituals belonging to the Atharva Veda, Rudragana (11 Anuvakas), Kausmanda (six anuvakas), Maharauhina, Kubera Hridaya and the Samriddhi Rik, the above anointing ceremony should be done.

आपोहिष्ठातिसृभिर्हिरण्यवर्णेति चतसृभिर्जप्तम् ।

कार्पासिकवस्त्रयुगं विभृयात्स्नातो नराधिपतिः ॥७२॥

Sloka 72.—After a bath, the King should wear a pair of cotton cloths, sanctified by the three verses of the hymn commencing with आपोहिष्ठा and by the four beginning with हिरण्यवर्णा.

पुण्याहशङ्खशन्दैराचान्तोऽभ्यर्च्य देवगुरुविप्रान् ।

छत्रध्वजायुधानि च ततः स्वपूजां प्रयुज्जीत ॥ ॥७३॥

Sloka 73.—Then the King sipping water, while the sounds of conchs and chanting of Punyaha hymns flourish, should worship Gods, Preceptors, Brahmins, his royal umbrella, banner and weapons and lastly his own guardian deity (or his usual worship to be done).

आयुष्यं वर्चस्यं रायस्पोषाभिर्ऋग्भिरेताभिः ।

परिजप्तं वैजयिकं नवं विदध्यादलङ्कारम् ॥७४॥

Sloka 74.—Then the King should wear new ornaments conducive to victory, sanctified by the verses आयुष्यं, वर्चस्यं, रायस्पोष, etc.

गत्वा द्वितीयवेदीं समुपविशेच्चर्मणामुपरि राजा ।

देयानि चैव चर्माण्युपर्युपर्येवमेतानि ॥७५॥

वृषस्य वृषदंशस्य रराश्च पृषतस्य च ।

तेषामुपरि सिंहस्य व्याघ्रस्य च ततः परम् ॥७६॥

Slokas 75-76.—Going to the second sacrificial altar, the King should sit on the skins which are to be placed one over another in this manner—first, the skin of a bull is placed, over this, that of a cat, over this, that of an antelope, over this, that of a spotted deer, over these, the lion's, and lastly, the tiger's over them.

मुख्यस्थाने जुहुयात् पुरोहितोऽग्निं समित्तिलघृताद्यैः ।

त्रिनयनशक्रबृहस्पतिनारायणनित्यगतिक्रग्भिः ॥७७॥

Sloka 77.—In the chief place (right side), the priest should make offerings of sacrificial twigs, sesamum, ghee, etc., into the fire with hymns addressed to Siva, Indra, Brihaspati, Narayana and Vayu.

इन्द्रध्वजनिर्दिष्टान्यग्निनिमित्तानि दवात्रिदूयात् ।

कृत्वाऽशेषसमाग्निं पुरोहितः प्राञ्जलिर्ब्रूयात् ॥७८॥

Sloka 78.—The astrologer should tell the auguries, of Fire, explained in the chapter on ' Indra's Banner ' (Adh. XLIII. P. 324, *Supra*). The priest having finished all the rites, should recite the following with folded palms :

यान्तु देवगणाः सर्वे पूजामादाय पार्थिवात् ।

सिद्धिं दत्त्वा तु विपुलां पुनरागमनाय च ॥७९॥

Sloka 79.—" May all the groups of Gods depart and come back on another occasion, having now received worship at the hands of the King, and bestowed great success on him ".

नृपतिरतो दैवज्ञं पुरोहितं चार्चयेद्वनैर्बहुभिः ।

अन्यांश्च दक्षिणीयान् यथोचितं श्रोत्रियप्रभृतीन् ॥८०॥

Sloka 80.—The King then should honour the astrologer, priest and others worthy of Dakshina such as Vedic scholars, with large gifts of money according to their merits.

Sloka 81.—The King should please his subjects (by a proclamation to the effect of protecting them against all odds), release the animals from the hands of butchers,

and order a general amnesty to prisoners except those that threaten the internal peace of the country.

एतत्प्रयुज्यमानं प्रतिपुष्यं सुखयशोऽर्थवृद्धिकरम् ।

पुष्याद्विनाशकलदा पौषी शान्तिः परा प्रोक्ता ॥८२॥

Sloka 82.—Should the King perform this ceremony every time the Moon is in Pushya, he would get increased happiness, fame and wealth. If it be performed at any other time, it would yield only half the benefits mentioned. For, the expiatory ceremony done during the Full Moon in the month of Pushya is declared to be the foremost.

राष्ट्रोत्पातोपसर्गेषु राहोः केतोश्च दर्शने ।

ग्रहावमर्दने चैव पुष्यस्नानं समाचरेत् ॥८३॥

Sloka 83.—The royal ablution should be performed when a kingdom is afflicted with portents and disasters (like epidemics), when there is an eclipse, when Ketu is sighted and when there is a planetary war.

नास्ति लोके स उत्पातो यो ह्यनेन न शाम्यति ।

मङ्गल चापर नास्ति यदस्मादतिरिच्यते ॥८४॥

Sloka 84.—There is no portent in the world that is not remedied by this ; and there is no auspicious rite that surpasses this ceremony.

Sloka 85.—This ceremony is highly commendable at a king's coronation, when he aspires for the sovereignty over an empire and longs for the birth of a son.

महेन्द्रार्थमुवाचेदं बृहत्कीर्तिर्बृहस्पतिः ।

स्नानमायुःप्रजावृद्धिसौभाग्यकरणं परम् ॥८६॥

अनेनैव विधानेन हस्त्यश्वं स्नापयेत्ततः ।

तस्यामयविनिर्मुक्तं परां सिद्धिमवाप्नुयात् ॥८७॥

Sloka 87.—The King who afterwards bathes his horses and elephants in the same manner, will see them free from illness and attain great success.

Thus ends the 48th Adhyaya on "Royal Ablution."

पट्टलक्षणम् ॥४९॥ Royal Crowns.

विस्तरशो निर्दिष्टं पट्टानां लक्षणं यदाचार्यैः ।

तत्सङ्क्षेपः क्रियते मयाऽत्र सकलार्थसम्पन्नः ॥१॥

Sloka 1.—In this chapter, I am giving a summary containing all the ideas of the characteristics of royal diadems that have been treated of at length by the ancient seers (such as Kasyapa).

पट्टः शुभदो राज्ञां मध्येऽष्टावङ्गलानि विस्तीर्णः ।

सप्त नरेन्द्रमहिष्याः षड् युवराजस्य निर्दिष्टः ॥२॥

चतुरङ्गलविस्तारः पट्टः सेनापतेर्भवति मध्ये ।

द्वे च प्रसादपट्टः पञ्चैते कीर्तिताः पट्टाः ॥३॥

Slokas 2-3.—The crown of a King, should, to be auspicious, have an expansion of eight digits in the

middle ; that of the queen, of seven digits ; that of the Yuvaraja, of six ; that of the commander of the army, of four ; and that of the royal protege, of two digits. These are the five kinds of crowns that have been mentioned.

सर्वे द्विगुणा यामा मध्यादर्धेन पार्श्वविस्तीर्णाः ।

सर्वे च शुद्धकाञ्चनविनिर्मिताः श्रेयसो वृद्धौ ॥४॥

Sloka 4.—All these crowns must have a length double their respective expansion, while the expansion on the sides is half that of the middle. All these made of pure gold increase prosperity and happiness.

पञ्चशिखो भूमिपतेस्त्रिशिखो युवराजपार्थिवमहिष्योः ।

एकशिखः सैन्यपतेः प्रसादपट्टो विना शिखया ।५॥

Sloka 5.—A royal crown has five crests ; that of the Yuvaraja and the Queen, three ; that of the commander, only one ; and that of the royal protege is without any crest.

क्रियमाणं यदि पत्रं सुखेन विस्तारमेति पट्टस्य ।

बुद्धिजयौ भूमिपतेस्तथा प्रजानां च सुखसम्पत् ॥६॥

Sloka 6.—When the gold sheet for the crown expands easily while it is being prepared, it augurs prosperity and victory to the King and great happiness to the subjects.

जीवितराज्यविनाशं करोति मध्ये व्रणः समुत्पन्नः ।

मध्ये स्फुटितस्त्याज्यो विघ्नकरः पार्श्वयोः स्फुटितः ॥७॥

Sloka 7.—A dent or hole in the middle of the crown, when it is under preparation, produces loss of life and kingdom. If it breaks in the middle, it should be discarded. One that breaks in the sides produces obstacles.

किञ्चमाणं बद्धा पत्रं मध्ये स्फुटति भिषते ।

अशुभनिमित्तोत्पत्तौ शास्त्रज्ञः शान्तिमादिशेद्राज्ञः ।

शस्तनिमित्तः पट्टो नृपराष्ट्रविवृद्धये भवति ॥८॥

Sloka 8.—At the appearance of evil symptoms, a man learned in this science should prescribe expiatory rites to the king. A crown attended with commendable signs tends to the prosperity of the King as well as of the kingdom.

Thus ends the 49th Adhyaya on "Royal Crowns."

खड्गलक्षणम् ॥५०॥ Signs of Swords.

अङ्गुलशतार्धमुत्तम ऊनः स्यात्पञ्चविंशतिः खड्गः ।

अङ्गुलमानाज्ज्ञेयो व्रणोऽशुभो विषमपर्वस्यः ॥१॥

Sloka 1.—A sword of the best type measures fifty inches, while one of the smallest type, twenty five. A dent in an odd inch in the measurement of the sword is to be considered as foreboding evil.

श्रीवृक्षवर्धमानातपत्रशिवलिङ्गकुण्डलाञ्जानाम् ।

सदृशा व्रणाः प्रशस्ता ध्वजायुधस्वस्तिकानां च ॥२॥

Sloka 2.—Dents resembling in shape a Bilva tree, Vardhamana figure, umbrella, Siva's emblem, ear-ring, lotus, flag, weapon and Swastika mark are auspicious.

कुक्कुटसकाककङ्ककन्यादकबन्धवृश्चिककृतयः ।

खड्गे व्रणा न शुभदा वंशानुगताः प्रभूताश्च ॥३॥

Sloka 3.—The dents resembling a lizard, crow, heron, carcass-eating bird, truncated body and scorpion and many dents in the upper part of the sword are not auspicious.

स्फुटितो ह्रस्वः कुण्ठो वंशच्छिन्नो न दृष्टानोऽनुगतः ।

अस्त्रेण इति चानिष्टः प्रोक्तविपर्यस्त इष्टफलः ॥४॥

Sloka 4.—A sword that has a breach, is too short, blunt, cut at the top, not appealing to the eye and the mind, and without resonance betokens misery ; whereas one with characteristics contrary to the above will yield good results.

कणितं मरणायोक्तं पराजयाय प्रवर्तनं कोशात् ।

स्वयमुद्गीर्णे युद्धं ज्वलिते विजयो भवति खड्गे ॥५॥

Sloka 5.—The sounding of a sword by itself forebodes the owner's death ; its not coming out of its sheath, defeat : its coming out of the sheath by itself indicates war ; and its blazing leads to victory.

नाकारणं विवृणुयात् विघट्टयेच्च

पश्येच्च तत्र वदनं न वदेच्च मूल्यम् ।

देशं न चास्य कथयेत् प्रतिमानयेच्च

नैव स्पृशेन्नृपातिरप्रयतोऽसियष्टिम् ॥६॥

Sloka 6.—The King should not unsheath the sword without any reason, nor brandish it, nor see his own face in it, nor mention its price, nor tell the place of its origin, nor measure it, nor, without purity, touch the blade.

गोजिह्वासंस्थानो नीलोत्पलवंशपत्रमदृशश्च ।

करवीरपत्रशूलाग्रमण्डलाग्राः प्रशस्ताः स्युः ॥७॥

Sloka 7.—The best swords are those that are shaped like a cow's tongue, blue-lily petal, bamboo-leaf, and

Karaveera leaf, as well as those that have a pointed and round tip.

निष्पन्नो न च्छेद्यो निष्पैः कार्यः प्रमाणयुक्तः सः ।

मूले म्रियते स्वामी जननी तस्याग्रतश्छिन्ने ॥८॥

Sloka 8.—If a sword that has been made is too long, the surplus length should not be cut off, but it should be made to have the required length by rubbing it against a file. If it is cut at the bottom, the owner will die; and if at the tip, his mother.

यस्मिन् त्सरप्रदेशे व्रणो भवेत्तद्वदेव खड्गस्य ।

वनितानामिव तिलको गुह्ये वाच्यो मुखे दृष्ट्वा ॥९॥

Sloka 9.—An injury in a particular part of the hilt shows a similar one in the corresponding part of the sword, just as a mole on the face of ladies does the existence of a similar one in their private parts.

अथवा स्पृशति यदङ्गं प्रष्टा निस्त्रिशभृतद्वधार्थं ।

कोशस्थस्यादेश्यो व्रणोऽस्ति शास्त्रं विदित्वेदम् ॥१०॥

Sloka 10.—Noting the particular limb touched by a swordsman who questions a diviner about injuries in the sword, the latter should declare the injury to exist in the particular part of the sword kept in the sheath, by understanding the following rules thereon.

To find out if there are dents at all on the sword, one should find out the Lagna at the time: if there are malefics in the Kendras, surely there will be some flaw in the sword.

Slokas 16-19.—The effects that have to be predicted of the dents in the first five digits of the sword are severally, death of sons, acquisition of wealth, loss of wealth, all round prosperity and confinement; in the next eight digits (up to 13th) severally, birth of sons, quarrel, acquisition of elephants, death of sons, incoming of wealth, death, acquisition of wives and mental affliction: in the next eight (from 14th to 21st) severally, (14) acquisition of wealth, (15) loss of money, (16) acquisition of women, (17) death, (18) increase of wealth, happiness, etc., (19) death, (20) happiness and (21) loss of money; and in the last nine (21 to 30), they are respectively (22) getting

money, (23) death, without salvation, (24) obtaining of wealth, (25) death, (26) prosperity, (27) penury, (28) lordship, (29) death and (30) kingdom.

परतो न विशेषफलं विषमसमस्तास्तु पापशुभफलदाः ।

Sloka 20.—If there be defects beyond the thirtieth digit, the effects thereof are negligible ; * but in the odd and even digits, they prove auspicious and harmful respectively ; while according to some sages (*e. g.* Parasara) the injuries beyond the thirtieth inch up to the end have no effects whatsoever.

Slokas 21-22. — A sword having the smell of the Karaveera flower, the blue-lily, elephant's ichor, ghee, saffron, round jasmine or Champaka, indicates prosperity, whereas one with the smell of cow's urine, salt or fat bodes evil. Similarly, one with the smell of tortoise, marrow, blood or salt produces danger and misery, and one with the lustre of beryl, gold or lightning leads to victory, health and prosperity.

Slokas 23-24.—The following are the drinks prescribed by sage Usanas for the sword : one wishing for very great wealth should give a drink of blood by the sword ; for begetting a virtuous son, a drink of ghee ; for inexhaustible wealth, one of water ; for the acquisition of money by sinful means, one of the milk of mare, camel or elephant ; and for cutting the trunks of elephants, one of fish-bile, deer-milk, horse-milk, and goat-milk, mixed with the toddy of palm trees.

Sloka 25.—A sword rubbed with gingelly oil and then smeared with an unguent prepared with the milky juice of Arka plant, the cleaned powder of goat's horn and the excreta of doves and mice must be given any of the drinks mentioned in the previous two verses, and afterwards whetted; such a sword will not break against stones.

Sloka 26.—An iron weapon treated with a day-old drink made of the burnt powder of plantains (or its rib) mixed with butter-milk, and then sharpened properly, will not break on stones, nor become blunt on other iron instruments.

Thus ends the 50th Adhyaya on 'Signs of Swords.'

अङ्गविद्या ॥५१॥ Prediction through Limbs.

This chapter is probably spurious. So says Bhattotpala. But it will be seen that the author has himself referred to this subject, *viz*, Anga Vidya, in Adhyaya II *supra* (P. 15, lines 2, 3).

Sloka 1.—An astrologer should predict good and bad effects on observing carefully the direction, speech, place and articles brought at the time, also taking into consideration the behaviour of the limbs of the questioner with reference to himself or to another person and the particular time of his query. For, Time which is Omniscient, All-powerful, and All-seeing, on account of its being the Soul (sustainer) of all beings—moveable and stationary—shows good and bad effects through the bodily movements and utterances of the querists.

द्वेवर्षिद्विजसाधुसिद्धनिलयं सत्पुष्पसंयोजितं

सत्स्वादूदकनिर्मलत्वजनिताह्लादं च सच्छाद्वलम् ॥२॥

Sloka 2.—The place favourable for a query is one which is even (without depressions and elevations), covered with the shade of trees that smile with flowers, are laden with fruits, have glossy barks and leaves, are devoid of ill-omened birds and bear auspicious names; which is the abode of Gods, sages, Brahmins, virtuous men and Siddhas, which is endowed with fragrant

flowers and crops, which pleases the heart through the limpidity of its sweet water and which is covered with beautiful green grass.

छिन्नभिन्नकृमिखातकण्टकिप्लुष्टरूक्षकुटिलैर्न सत्कुजैः ।

क्रूरपक्षियुतनिन्द्यनामभिः शुष्कशीर्णबहुवर्णचर्मभिः ॥३॥

Sloka 3.—Inauspicious is a place abounding in trees which are cut, split, worm-eaten, thorny, scorched, coarse, crooked, inhabited by ill-omened birds, bearing censurable names and having many withered leaves and barks fallen.

इमशानशून्यायतनं चतुष्पथं तथाऽमनोज्ञं विषमं सदोषरम् ।

अवस्कराङ्गारकपालमसाभिश्चितं तुषैः शुष्कवृणैर्न शोभनम् ॥४॥

Sloka 4.—Equally inauspicious is a place such as the burial ground, a desolate shrine, a place where four roads meet, one that does not appeal to the heart, rugged ground, a sandy place, one that is covered with rubbish, charcoal, potsherds, ashes, husks and dry grass.

प्रव्रजितनग्ननापितरिपुबन्धनसौनिकैस्तथा श्वपचैः ।

कितवयतिपीडितैर्युतमायुषमाध्वीकविक्रयैर्न शुभम् ॥५॥

Sloka 5.—Similarly unfavourable will be places that are occupied by ascetics, naked persons, barbers, enemies, butchers, dog-eaters, gamblers, hermits, sick persons as well as a prison, armoury, apiary or shops where honey is sold.

प्रागुचरेशाश्च दिशः प्रशस्ताः प्रष्टुर्न वाय्वम्बुयमाग्निरक्षः ।

पूर्वाह्नकालेऽस्ति शुभं न रात्रौ सन्ध्याद्वये प्रश्नकृतोऽपराह्णे ॥६॥

Sloka 6.—The best directions for a query are the East, North and North-east ; North-west, West, South and South-east and South-west are unfavourable for the

querist. The morning time is beneficial, while the night and the two twilights and the afternoon are not favourable.

Sloka 7.—The same good and bad effects as well as fore-tokens as were given in connection with the marching of a sovereign (*Vide* sloka 12 of Ch. XLIII. *supra*) should be taken into consideration here also. The prediction may also be made by observing the articles brought at the time by others, what is in front of the querist, or what is in his hand or on his clothes.

Slokas 8-10.—The following are the masculine limbs: thighs, lips, breasts, testicles, feet, teeth, arms, hands, cheeks, hairs, throat, nails, thumbs, the frontal bone, armpits, shoulders, the ears, the anus and the joints. The feminine limbs are the brows, nose, buttocks, folds

in the belly, hips, the lines on the palm, fingers, the tongue, neck, the hind parts of the shanks, the heels, the shanks, the navel, the ear-lobes, the outer-edge of the ear and the nape of the neck ; and the following are the neuter limbs : the face, back, collar bone, the knees, bones, the sides, the heart, the palate, the eyes, the male genital organ, the chest, the end of the spine, the head and forehead. If the querist should touch a limb of the first group, the success of the task should be achieved immediately ; if a limb of the second group, the success will be delayed, while in the last group, it is improbable. Even in the case of the limbs of the first two groups, if they are coarse, injured, cut or lean, success will not be achieved.

स्पृष्टे वा चालिते वाऽपि पादाङ्गुष्ठेऽक्षिरुभवेत् ।

अङ्गुल्यां दुहितुः शोकं शिरोघाते नृपान्नयम् ॥११॥

Sloka 11.—When the big toe is touched or shaken, the querist will suffer from eye-disease. When a finger is touched, trouble for his daughter will arise. When he strikes the head, there will be trouble from the King.

विप्रयोगमुरसि स्वगात्रतः कर्पटाहतिरनर्थदा भवेत् ।

स्यात्प्रियाप्तिरभिगृह्य कर्पटं पृच्छतश्चरणपादयोजितुः ॥१२॥

Sloka 12.—When the querist touches the chest, he will suffer separation ; leaving off his cloth from his body denotes the befalling of a dire calamity. If he draws a piece of cloth towards himself and joins his feet together, he will achieve his cherished object.

पादाङ्गुष्ठेन विलिखेद्भूमिं क्षेत्रोत्थचिन्तया ।

हस्तेन पादौ कण्ठ्येत्तस्य दासीमयी च सा ॥१३॥

Sloka 13.—If he scratches the earth with his big toe, his thoughts will be about lands. If he scratches the feet with his hand, they are about a maid servant.

व्याधिराश्रयति रज्जुजालकं वल्कलं च समवेक्ष्य बन्धनम् ॥१४॥

Sloka 14.—When the querist is [looking at palm-leaves or birch-bark, his thoughts are about garments; when he is standing on hair, husk, bone or ashes, he will be afflicted with disease; and when he stands on or looks at ropes, nets or barks, he will be imprisoned.

Slokas 15-16.—If long pepper (फलिजीर), black pepper, dried ginger, cyperus grass, lodhra, costus, cloth, water, cumin seeds, gandhamamsi, dill or Tagara be seen or mentioned by the querist, his thoughts will be about a woman's fault, a man's fault, a person in distress, loss of everything, missing of the road, loss of children, loss of money, destruction of corn, son's death, loss of bipeds (beasts with cloven hoofs), loss of quadrupeds and destruction of lands respectively.

न्यग्रोधमधुकतिन्दुकजम्बूष्ठाम्रवदरजातिफलैः ।

धनकनकपुरुषलोहांशुकरूप्यौदुम्बराप्तिरपि करमैः ॥१७॥

Sloka 17.—When the querist holds in his hand the fruits of Banyan tree, Madhuka, Tinduka, Jambu, Plaksha, mangoes, and Jujube, he will get respectively money, gold, servants, iron, silken cloths, silver and copper.

धान्यपरिपूर्णपात्रं कुम्भः पूर्णः कुटुम्बश्चद्विकरी ।

गजगोशुर्ना पुरीषं धनयुवतिसुहृद्दिनाशकरम् ॥१८॥

Sloka 18.—When he sees a vessel filled with corn or a pot full of water, his family will prosper. The sight of the dung of elephants, cows and dogs proves severally destructive to wealth, young ladies and friends.

पशुहस्तिमहिषपङ्कजरजतव्याघ्रैर्लभेत मन्ददृष्टैः ।

अविधननिवसनमलयजकौशेयाभरणसङ्घातम् ॥१९॥

Sloka 19.—When he sees a cow, elephant, buffalo, lotus, silver or tiger. he will obtain woollen articles, wealth, garments, sandal paste, silken cloths or collection of ornaments respectively.

पृच्छा वृद्धश्रावकमुपरित्राडदर्शने नृभिर्विहिता ।

मित्रद्यूतार्थभवा गणिकानृपसूतिकार्थकृता ॥२०॥

Sloka 20.—When the querist looks at an old Kapa-
lika (a Saiva monk wearing skulls), his enquiry is about friends or gambling; when he looks at an ascetic of a high order, it is about a courtesan, king or woman in child-bed.

शाक्योपाध्यायार्हन्निर्ग्रन्थिनिमित्तनिगमकैवर्त्तैः ।

चौरचमूपतिवणिजां दासीयोधापणस्यवध्यानाम् ॥२१॥

Sloka 21.—If he sees a Buddhist monk, a teacher, a Jain monk, a naked fakir, a sooth-sayer, a trader of a city or a fisherman, his thought concerns respectively a thief, the commander of army, a merchant, a female servant, a soldier, a shop-keeper or a condemned criminal.

तापसे शौण्डिके दृष्टे प्रोषितं पशुपालनम् ।

इद्वतं पृच्छकस्य स्यादुच्छृत्तौ विपन्नता ॥२२॥

Sloka 22.—When he looks at an ascetic, a toddy-seller or one engaged in gleaning corn, his thought is severally about some body who has gone abroad, tending cattle or one that has come to grief.

इच्छामि प्रष्टुं भण पश्यत्वार्यः समादिशेत्युक्ते ।

संयोगक दुम्बो थ लाभैश्वर्योद्भवा चिन्ता ॥२३॥

Sloka 23.—If the querist uses the expressions, *viz.*, “ I should like to ask ”, “ please tell ”, “ your honour may see ” and “ kindly predict ”, his thoughts are about some meeting, his family, profit and lordship (authority) respectively.

निर्दिशेति गदिते जयाध्वजा प्रत्यवेक्ष्य मम चिन्तितं वद ।

आशु सर्वजनमध्यगं त्वया दृश्यतामिति च बन्धुचौरजा ॥२४॥

Sloka 24.—If he says ‘ Predict ’, he thinks of victory or travelling. If he says ‘ Think and tell my thoughts ’, his thought is about a relative ; and if he runs to the astrologer in the midst of a crowd and tells “ Find out quickly ”, it is about a thief.

Slokas 25-26.—If the questioner touches an internal Part of the body, the thief is one belonging or related to the family ; if an external part, it is an outsider ; if a big toe, a man-servant ; if a toe, a maid-servant ; if the

shanks, a labourer (messenger); if the navel, his own sister; if the heart, his own wife; if a thumb, his son; if the fingers, his daughter; if he touches his stomach, the thief is to be found in his mother; if the head, in his father (or teacher); and if the right and left arms, in his brother and brother's wife respectively. Thus prediction of theft has to be made from the touch of the limbs.

Slokas 27-28.—The following are the indications for the non-recovery of the stolen properties: The querist touches an external part of the body after an internal one; or spits phlegm, passes urine or evacuates the bowels; or drops something from his hand; or bends some limb extremely and cracks it; or beholds empty pots carried by people or thieves; or hears ominous words such as "taken away, fallen, injured, forgotten, lost, broken, gone, stolen, dead" and the like.

Sloka 29.—All the signs mentioned above when coupled with the sight of husks, bones, poison, etc., or with the sound of weeping and sneezing (or injury?),

forebode death to men attacked by illness. If the querist touches an internal limb, belches aloud, it is to be guessed that he is quite happy after a sumptuous feast.

Sloka 33.—If he spits phlegm, it is clear that he has eaten a small quantity of something dry and bitter; if there is the sight of a carnivorous animal, something mixed with meat; if he touches the brows, cheeks

or lips, food consisting of bird's meat. Thus, the signs for predicting food eaten have been stated.

Sloka 35.—When an evil omen is seen or heard, it is to be predicted that the man has eaten the flesh of lizards or fish. In a similar manner, the prognostication of abortion of a pregnant woman should be made at a query ; i. e., if there are evil omens at the time of consultation, there will be miscarriage.

Sloka 36.—At a query as to what would be the sex of the child to be born, if a man is seen, inferred, present or touched, the birth of a boy is to be predicted ; if it is a woman that is seen, etc., a girl ; and if it is a eunuch, a eunuch will be born. The child-birth will be easy and happy if drink, food, fruits and flowers are sighted at the time.

Sloka 37.—When a woman touches with the thumb her eye-brow, stomach or finger at a query, she must then be thinking of the child in the womb. The same prediction should be made when honey, ghce and such other things or gold, gems and corals, or her mother, nurse and children are in front of her.

Sloka 38.—If, at a query, a woman touches the belly with her hand, it may be predicted that she is pregnant ; but if there should be evil omens at the time, she may have abortion. The same will take place when she pulls out her belly owing to the pain given by her seat. or puts one hand over the other.

Slokas 42-43.—When the pregnant woman touches the head, fore-head, brows, ears, cheeks, lower part of chin, teeth, neck, right shoulder, left shoulder, hands, chin, pipe of the neck, breast, right bosom, left bosom, heart, right side, left side, belly, hip, joint of buttocks and anus, right thigh, left thigh, knees, shanks or feet, she will give birth to a child in any of the asterisms in their order commencing from Krittika.

Sloka 44.—Thus have I explained in clear terms the prognostics of touching the limbs, after carefully examining the treatises on this science, for enabling people to attain their cherished desires. An astrologer, who knows all this and is endowed with high intelligence and a large heart, will always be honoured by kings as well as peoples.

Thus ends the 51st Adhyaya on "Prediction through limbs."

पिटकलक्षणम् ॥५२॥ Characteristics of Pimples.

This chapter also is declared to be spurious although this subject has been referred to by the author previously.

Sloka 1.—The pimples of the people of the four classes beginning with Brahmins are white, red, yellow and dark respectively; and the respective colours are auspicious only for the particular classes and those below them and not for those above them. The idea is that white is good for Brahmins; white and red for Kshatriyas; white, red and yellow for Vaisyas; and white, red, yellow and dark for Sudras.

Sloka 10.—Thus have I given an analysis of the pimples from head to foot ; in the same manner, ulcers and marks may be classified. The existence, on the bodies of living beings, of moles, special marks and hairy circles also produce similarly the effects enumerated above.

Thus ends the 52nd Adhyaya on the "Characteristics of Pimples."

वास्तुविद्या ॥५३॥ House-building.

वास्तुज्ञानमथातः कमलमवान्मुनिपरम्परायातम् ।
क्रियतेऽधुना मयेदं विदग्धसांवत्सरप्रीत्यै ॥१॥

Sloka 1.—I shall now expound for the delectation of learned astrologers the science of building houses, handed down by the creator through an unbroken succession of sages.

Dr. Kern remarks as follows :

"According to Utpala, Garga, etc., more explicit is the statement in a work bearing the title of श्री मदांक्तविश्वकर्माप्रकाशिका, where we read,

इति प्रोक्तं वास्तुशास्त्रं पूर्वं गर्गाय धीमते ।

सकलसुरगणानां सूत्रधारः कृतात्मा भवननिवसतां सञ्छास्त्रमेतच्चकार ॥

This passage, with many others, shows that Garga, Parasara, and the like, are mere mythological beings, of exactly the same

historical value with Brahman, Viswakarman, Vasudeva. In the opening stanzas of the विश्वक, we find,

यदुक्तं शम्भुना पूर्वं वास्तुशास्त्रं पुरातनम् ॥

The Viswak seems to be a compilation, for most of the passages quoted by Utpala, either from what he terms किरणाख्यतन्त्र or from Garga, from Brihaspati, Viswakarman himself, Kasyapa etc., recur in the Viswak, a copy of which is in the translator's possession."

Slokas 2-3—There was, it is said, some Being that obstructed the Earth and the Sky with its body. That was suddenly caught hold of and placed topsy-turvy by the multitude of Gods, who became the presiding deities of the several limbs of the Being that were touched by them. The creator ordained that Being to be the House-God of the nature of Gods.

Sloka 12-13 —The breadth of the houses of Brahmins and other four classes range from 32 cubits to 16, each being diminished by 4 ; i. e., Brahmins have five houses with the above measurements ; Kshatriyas have four with 28, 24, 20 and 16 cubits for their breadth ; Vaisyas, three with 24, 20 and 16 and Sudras two with 20 and 16. The lowest class of people (Pariahs, etc.) must have houses with smaller dimensions than these. The length of the houses of the four classes exceeds the breadth by a tenth, eighth, sixth and fourth respectively.

नृपसेनापतिगृहयोरन्तरमानेन कोशरतिभवेन ।

सेनापतिचातुर्वर्ण्यविवरतो राजपुरुषाणाम् ॥१४॥

Sloka 14.—The treasury and pleasure-house must have the dimensions equal to the difference between those of the King's and Commander-in-Chief's houses. The measure for the houses of King's officers is equal to the difference between those of the houses of Commander-in-chief and one of the four classes. That is, if an officer belongs to the Brahmin class, the difference referred to is one between the measure of the Commander-in-chief's house and an ordinary Brahmin mentioned in the previous two slokas ; if the officer is a Kshatriya, we have to subtract the measure for a Kshatriya's house ;

and so forth. [If it is a Kshatriya officer, he will have four houses and the measure should be found out by subtracting from that for the 2nd, etc. of the Commander-in-Chief. Similarly in the case of officers belonging to other classes.]

अथ पारशवादीनां स्वमानसंयोगदलसमं भवनम् ।

Sloka 15.—The houses of persons of mixed classes viz., Parasavas, sons of Brahmins by Sudra women, Bhurja Kantakas, sons of Brahmins by Vaisya women, and Murdhavasiktas, sons of the same by Kshatriya women, have a measure equal to a half of the sum of the measures for a Brahmin's house and for the other parent's. It is inauspicious for all to have houses which either exceed or fall short of the given measurements.

The measure for the house of a Parasava is $\frac{32+20}{2} = 26$ cubits in breadth.

पञ्चाश्रमिणामभितं धान्यायुधवह्निरतिगृहाणां च ।

The verandahs of the above are in order, 3 cubits 19 digits, 3 cubits 8 digits; 2 cubits 20 digits, 2 cubits 18 digits and 2 cubits 3 digits.

Slokas 20-21.—Outside the house there should be made a foot-path whose breadth is a third of the hall. If the path is in front (to the east) of the house, the latter is termed "Soshneesha," one with a turban. If it is behind (to the west of) the house, it is called *Saya-sraya* one with western or hind support; if it is on the sides, it is termed *Savashtambha* one with proper support; and if it is all round the name of the house is *Susthita*, well-fixed. All these types are approved by the authorities on architecture.

Sloka 22.—The height of the first storey should be a sixteenth of the width with an addition of four cubits. The height of each of the following upper storeys is to be lessened by one-twelfth of the preceding one.

So the height of the ground floor of the King's house is $\frac{108}{16} + 4 = 6\frac{3}{4} + 4$ or 10 cubits 18 digits.

added an eighth part of itself. That will give the width of the door; and thrice this will be its height.

The width of Brahmin house is 32 cubits. is 6. This is to be taken as 6 digits. Add 18. i. e., $6 + 18 = 24$ digits. $24 + \frac{1}{2}$ of 24 = 27 digits. This is its breadth and $27 \times 3 = 81$ digits, its height.

Slokas 26-27.—The thickness of the two side-frames of the door is as many digits as the height numbers cubits. One and a half times this gives the thickness of the threshold and the upper-block. The breadth of all the four pieces is an eightieth part of seven times the door-height. An eightieth part of nine times the height (of a storey) gives the width of a pillar at the bottom; and the same lessened by a tenth is its width at the top.

A pillar of the ground floor in a King's house will have a width of about 1 cubit and 5 digits at the bottom and about 1 cubit and 2 digits at the top. Its circumference is thrice the width.

Sloka 33.—The front verandah of the main building should extend from the left hall to the right hall. Another verandah is made thence from left to right and still another beautiful one from there in the same manner. A building with such verandahs is known as Var-dhamana, which should not have an entrance in the south.

Sloka 34.—In the Swastika mansion, the western verandah should extend from the left hall to the right one; the other two verandahs (southern and northern) originating from the above should touch the end in the east, and a fourth one (the eastern) is held between them. Such a mansion with an eastern entrance is favourable.

Sloka 35 —In the Ruchaka type of building, there are two verandahs touching the ends, in the east

and west ; and touching these two internally, there are two more. In this a northern entrance is not auspicious; while in the other quarters they are good.

Slokas 37-38.—A three-halled building, lacking the northern hall, is known as Hiranyanabha and indicates good luck; similarly, one without the eastern hall known as Sukshetra conduces to prosperity; one without the southern hall known as Chulli destroys wealth; and one without the western hall called Pakshaghna causes hatred and the destruction of children.

वित्तविनाशश्चुल्ल्यां ज्ञातिविरोधः स्मृतः काचे ॥४१॥

Slokas 39-41.—A house with only a western and a southern hall is termed Siddhartha ; one with a western and a northern hall, Yamasurya ; one with a northern and an eastern hall, Danda ; one with an eastern and a southern hall, Vata ; one with an eastern and a western one, Graha-Chulli ; and one with a southern and a northern one, Kacha. The first kind of house leads to the acquisition of wealth ; the second, to the death of the house-holder ; the third, to punishment and death ; the fourth, to grief from quarrel ; the fifth, to loss of money ; and the sixth, to hatred among kinsmen.

There are many writers on architecture such as Viswakarman, Maya, Kama and Hiranyagarbha. The last one mentions 64 or 120 varieties of houses. Great kings can have mansions of $8\frac{1}{2}$ storeys ; Brahmins, of $7\frac{1}{2}$; Kshatriyas, of $6\frac{1}{2}$; Vaisyas, of $5\frac{1}{2}$; and Sudras, of $3\frac{1}{2}$. The height of Sudra's house ought not to exceed 20 moderate cubits ; that of Vaisya's, 40 cubits ; that of Kshatriya's, 60 cubits ; that of Brahmin's, 80 cubits ; and that of king's, 100 cubits. The last is the maximum limit for the height of human habitations.

According to the same authority, the height of the foundations of best houses is to be $2\frac{1}{2}$ cubits.

There is restriction regarding the height of the storeys of buildings with two, three and four halls. In a house of a single hall, the height is equal to its breadth.

According to another authority, *viz* Sakra, the width of single-halled houses is not restricted ; but it should not exceed the length. Should it exceed the length, such houses would be called Utsargas. But single-halled houses are not prescribed for Brahmins, etc. Such houses are not conducive to longevity, but if made of straw, they can be permitted (Garga).

Viswakarman speaks of three kinds of digits, *viz.*, major, moderate and minor. The first is the length of eight of full-grown barley grains ; the second, of seven ; and the third, of six.

They are respectively called Prasaya, Sadharana, and Sama. It appears our author refers here to the last kind of digit. Viswakarman opines that in the construction of houses, etc., the first kind of digit should be adopted; of beds, eating plates, vehicles, etc., the last variety.

The combination of old and new bricks, baked and raw ones, etc., is forbidden. But Hiranyagarbha says: if necessary, raw bricks should be used below, and then baked ones. Maya objects to this and states:—There are five things to be done for houses; viz., Katima, Granthima, Dayima, Ripima and Khatima. Hiranyagarbha says: There are different kinds of houses according to the materials used in the construction. One built of stone is called Mandira; of baked bricks, Vastu; this is the best; of raw bricks, Sumanta; of mud, Sudhara; of wooden logs, Manasya; of bamboos, Nandana; of canvas for kings, Vijaya; of varieties of straw, Kalima.

For house-holders the best houses are those made of gold, silver, copper and iron. They are respectively called Pushkara, Sribhaya, Suryamanta and Chanda. There are also four other varieties, viz., those made of lac, Anila, tin and Varibandhaka (वारिवन्धक). Thus there are fourteen varieties of houses in all categories.

Sloka 42.—In order to divide the ground-plan of a house into 81 squares, draw ten lines from east to west and ten others from north to south. Inside the diagram, thirteen deities are situated, and thirty two in the outer compartments. Thus, there are 45 deities in this figure. (p. 436)

Then follow from South-east to South-west, thence to north-west and thence to north-east, Pushan, Vitatha, Brihatkshata, Yama, Gandharva, Bhṛingaraja, Mriga, Pitru, Dauvarika, Sugriva, Kusumadanta, Varuna, Asura, Sosha, Papayakshma, Roga, Ahi, Mukhya, Bhal-lata, Soma, Bhujaga, Aditi, and Diti, thus 32 in all.

Slokas 46-48.—In the centre, there is Brahman occupying nine divisions ; to his east, there is Aryaman (in 3 squares) ; next and to the right of Aryaman, at the interval of one compartment, there is Savita in a single square ; next to him to the right is Vivaswan ; next to him is Indra ; then going up, *i. e.*, to the west of Brahman there are Mitra (in 3) and Raja Yakshma ; then turning to the east, there is Prithvi Dhara (in 3) and Apavatsa. Thus, these eight are along the circumfe-

rence around Brahman. In the internal north-eastern corner (behind Parjanya), there is Apah ; South-east (between Savitru and Anila), Savitra ; South-west, Jaya and north-west, Rudra

Sloka. 49-50.—Apah, Apavatsa, Parjanya, Agni and Diti form one group, each occupying one compartment, in the north-eastern corner. In the same manner, there are five deities in each of the corners. The remaining deities, 20 in number, in the outer compartments, have

each power over two squares. The remaining 4 deities headed by Aryaman have jurisdiction over three squares each in the four quarters.

So in each corner there are five deities ruling over single squares. Savita, Savitra, Anila, Antariksha and Pushan in the South-east; Vibudhadhipathi, Jaya, Dauvarika, Pitru and Mriga in South-west; and Rajayakshma, Rudra, Papayakshma, Roga and Abi in North-west. Twenty deities exercise authority over two squares each; in the east, Jayanta, Indra, Surya, Satya and Bhṛisā; in the south Vitatha, Brihatskshata, Yama, Gandharva and Bhṛingaraja; in the west, Sugriva, Kusumadanta, Ambupati, Asura and Sosha; and in the north, Mukhya, Bhallata, Soma, Bhujaga and Aditi. The remaining four, *viz.*, Aryaman, Vivasvan, Mitra and Prithvidhara in the four quarters beginning with the east (with reference to Brahman) preside over three squares each.

Savitra on the hand ; Vitatha and Brihatkshata, on the side ; Vivasvan, on the stomach ; Yama, Gandharva, Bhringaraja and Mriga on the thigh, knee, shank and buttock respectively. The above deities are situated in the parts on the right side of the House-God. Similarly, there are deities on the left side, *i. e.*, Prithvidhara, on the left breast ; Diti, on the left eye ; Aditi, on the left ear ; Bhujaga on the left side of the chest ; Soma, on the left shoulder ; Bhallata, Mukhya, Ahi, Roga and Papayakshma, on the left arm ; Rudra and Rajayakshma, on the left hand ; Sosha and Asura, on the left side ; Varuna, on the left thigh ; Kusumadanta, on the left knee ; Sugriva, on the left shank ; Dauvarika, on the left buttock ; Sakra and Jayanta, on the genital organ ; Brahman, on the heart, and Pita, on the foot.

Slokas 55-56.—Or, drawing nine lines across and nine vertically and thus getting 64 squares, diagonals should be drawn from corner to corner. Of this area, Brahman rules over the central four squares ; and the eight deities situated along the diagonals in the corners near him over half a square (*viz.*, Apa, Apavatsa, Savita, Savitra, Vibudhadhipati, Jayanta, Rajayakshma and Rudra) ; in the outer corners, Sikhi, Antariksha, Anila, Mriga, Pitru. Papayakshma, Roga and Diti, over half a square ; those that are on both sides of these, over one and a half squares (Parjanya, Bhrisa, Bhringaraja, Dauvarika, Sosha and Nagadhipathi, *i. e.*, Ahi) ; and the remaining twenty, over two squares.

Though the author speaks of only quadrangular houses here, elsewhere, he speaks of hexangular, octangular, circular, etc. houses).

Sloka 59.—If, at the time of a query, the house-owner scratches a limb there will be some hurt in the corresponding part of the house. Or at the time of fire-worship, if there is any evil omen or unnatural behaviour of the fire in any particular aspect of it, the corresponding limb of the House-God will be faulty through a nail or peg.

and if it be skulls or hair, there will be death. If it be charcoal, there is danger from thieves ; if it be ashes, there will be constant risk from fire. The dart, unless it be of gold or silver, will prove disastrous on a vulnerable point. A heap of husk or chaff whether found in a vulnerable spot or any other, retards the acquisition of wealth ;] even an ivory peg situated in a vulnerable part will lead to misery.

Sloka 75.—On the north, they are death or captivity, increase of enemies, acquisition of wealth and sons,

possession of all virtues, getting sons and wealth, enmity with one's own son, faults in wife and poverty.

In other Sasrtras, eight presiding deities are spoken of. Each has his own asterism. Similarly, the 32 doors also have their stars. By the agreement of the Moon and the stars, houses and doors are to be constructed. The 8 Vastunaras with their stars and deities are:

A crooked line drawn by foot gives danger from enemies

and misery ; so is one that is imperceptible or ugly ; one drawn with hide, charcoal, bone or tooth, causes disaster to the owner ; one drawn in an anti-clockwise direction, produces hatred ; in a clockwise direction, prosperity ; harsh words, spitting and sneezing at the commencement are said to be inauspicious.

If a bird heated by the Sun, cries harshly at the time, it may be predicted that on the spot there is a bone of a member corresponding to the limb touched.

The meaning of 'heated by the Sun' is—in the first watch of the day, the north-east is full of embers ; the east is 'scorched', south-east, 'smoky', and the rest are calm ; in the second watch, the east is 'full of embers', south-east, 'scorched', south 'smoky', and the rest calm ; in the third, south-east, 'full of embers', south, 'scorched', south-west, 'smoky', and the rest calm ; in the last watch of the day, the south is 'full of embers', south west, 'scorched', west, 'smoky' and the rest, 'calm' ; and so on.

Slokas 1-2.—I shall now explain the science of 'Water-finding' which leads to religious merit and renown, for, it helps men to ascertain the existence of water. Just as there are veins in the human body, even so do they exist, some higher up, others lower down, in the earth. The water that falls from the sky with the same colour and taste, assumes various colours and tastes owing to the difference in the nature of the earth. Hence it should be examined in relation to its environments.

Slokas 3-5.—The divine lords of the eight quarters beginning with the east are in their order, Indra, Agni, Yama, Nirriti (demon), Varuna, Wind, the Moon and Siva. The veins in the different quarters are known by the names of their respective lords. There is a ninth, called 'The Great Vein', in the middle of these. There are hundreds of veins branching off from these and bearing distinct appellations. A vein that comes up from the nether world is good ; so are those in the four directions. But those in the intermediate quarters are not auspicious. Hereafter I shall explain the characteristics of the veins.

There will be found a westerly vein flowing underneath. At a depth of $2\frac{1}{2}$ cubits, the symptoms would be a pale white frog; thereafter, yellow clay, and further, a very hard stone (which will break only by the application of great heat) and underneath that there will be water.

Slokas 100-102.—A water vein will be found at a depth of 15 cubits in a place where trees, shrubs and creepers are smooth and densely covered with leaves, where lotus, Gokshura, Usira (*Desmodium Gairi*) and Kula or Gundra grass, Kusa, Darbha, Nalika or Nala grows. Where date-trees, Jambu, Arjuna and Vetasa or milky trees, shrubs and creepers or mushrooms, Hastikarna, Nagakesara, lotus, Kadamba, Karaja and Sinduwara trees grow, or where there is Vibhitaka or Madayantika, there is water at 15 cubits. So also in a place where there is one mountain upon another

मूले may be interpreted as "at the foot of the lower mountain or upper mountain."

Slokas 22-26.—For making the wood-apple seeds sprout, take the roots of Sarasaparilla, Amalaka, Dhava, Vasika, the branch with leaves of Vetasa, of Suryavalli, of Syama creeper, and of Atimukta (in all eight), boil them in milk, cool it, and then soak the seeds in this liquid for a period of time required for 100 beats. Then after removing and drying them in the Sun daily for 30 days, sow them. This is the method prescribed for it. Make a pit one cubit in diameter and twice as deep, fill it with milk and water; let the pit dry, burn it, and then smear it with a compound of honey, ghee and ashes. First fill it with mud to a height of four digits, then fill it with the powder of black grain, sesamum and barley; over this put mud to the same height again, and then once again fill it with the powder of black gram, etc; add to it an infusion of fish and water and then pound all this until it becomes a thick mass. Sow the seed at a depth of four digits and sprinkle it with fish-water and fleshwater. Soon will a tendril with nice sprouts cover the pandal in an astonishing manner.

Slokas 11-16.—The height of a temple should be double its width and the flight of steps (over which the edifice is built) equal to a third of this height. The Sanctum sanctorum should be half the above width. All round this there are walls. Its door is one fourth of the sanctum sanctorum in width and twice as high. The side-frame of the door has a breadth of a quarter of its height ; similarly the threshold and the upper block. The

thickness of the frames is equal to a fourth of their breadth. A door consisting of three, five, seven or nine frames is highly commended. Lower down, upto a height of $\frac{1}{4}$ th of the doorpost, two images of door-keepers must be kept ; the remaining space being ornamented with the carvings of auspicious birds, Bilwa trees, Swasthika figures, pitchers, couples, foliage, creepers and Siva's hosts. The idol with its pedestal ought to be as high as the door diminished by an eighth, of these, the idol being of two parts and the pedestal one.

There are many varieties of temples, of which Meru is one, whose dimensions are : Breadth = 32 cubits, height = 64 cubits ; the height of the flight of steps = $\frac{64}{8}$ cubits ; the Sanctum sanctorum = 16 cubits ; all round there are walls of 3 cubits' thickness. The door is 4 cubits in breadth ; its height is cubits ; the width of the frame and threshold = 2 cubits ; its thickness = 12 digits ; the height of the idol = 4 cubits and 16 digits ; the height of the pedestal = 2 cubits and 8 digits.

Sloka 28.—The Simha has 12 angles, is adorned with images of lions. Its width is 8 cubits. The remaining four, *viz*, Vritta-round, Chatushkona-quadrangular, Shodasasri-one with 16 angles, and Ashtasri-with 8 angles have significant names and are dark inside. All these have only one storey and one cupola, except the Chaturasra which has five domes.

These dark ones do not have external light entering the interior. There should be walls close by all round the temple and the entrance is to be on the western side. The walls are so constructed that they look part and parcel of the temple structure and not apart from it. The outer gate being on the north, the door of the temple should be made in the east (front) The idol in the temple should be made of gems, by whose lustre, there will be ample light inside.

Slokas 31-35.—Those who wish for prosperity should have the image of Lord Vishnu made in the following manner. The Lord should have either four or only two arms; his breast should bear the Srivatsa mark; it should be adorned with the Kaustubha gem; He should be made as dark as the Atasi flower; He is clothed in yellow garment, shows a serene face, wears a diadem and ear rings, has plump neck, breast, shoulders and arms. Of the eight arms, the right four have a sword, mace, arrow and emblem of

peace (the fringes raised upward) : the left ones, a bow, a buckler, a discus, and a conch. If only four arms are desired, one is the giver of peace or blessings, and the other wears the mace on the right and conch and discus on the left. If He is made with only two hands, then the right hand bestows peace and the other wears the conch.

बलदेवो हलपाणिर्मदविभ्रमलोचनश्च कर्तव्यः ।

विभ्रत्कुण्डलमेकं शंखेन्दुमृणालगौरतनुः ॥३६॥

Sloka 36.—Baladeva should be made having a plough in his hand, with eyes rolling owing to intoxication, and wearing an ear-ring and having his complexion as white as conch, the Moon and the lotus-stalk.

Slokas 37-39.—Goddess Ekanamsa should be situated between Baladeva and Sri Krishna, with her left hand placed on the hip and the other hand holding a lotus. If she is to be four-armed, in the left hands she has a book and a lotus, and in the right ones, boon to the suppliants and a rosary. If she is to be eight-armed, in the left hands, she has a water-pot, a bow, a lotus and a book, and in the right ones, boon, an arrow, a mirror, and a rosary.

Boon-giving hand is one with the open palm, fingers pointing downwards.

शाम्बश्च गदाहस्तः प्रद्युम्नश्चापभृत् सुरुपश्च ।

अनयोः स्त्रियौ च कार्ये खेटकनिस्त्रिशधारिण्यौ ॥४०॥

Sloka 40.—Samba should be made with a mace in his hand ; Pradyumna, endowed with a charming body, with a bow in his hand. Their wives also should be made holding swords and shields in their hands.

ब्रह्मा कमण्डलुकरश्चतुर्मुखः पङ्कजासनस्थश्च ।

स्कन्दः कुमाररूपः शक्तिधरो बर्हिकेतुश्च ॥४१॥

Sloka 41.—Brahman should have four faces, a water-pot in his hand and is seated on a lotus. Subrahmanya should be a boy in appearance, hold a javelin in his hand and have a peacock for his ensign.

शुक्लश्चतुर्विषाणो द्विपो महेन्द्रस्य वज्रपाणित्वम् ।

तिर्यग्ललाटसंस्थं तृतीयमपि लोचनं चिह्नम् ॥४२॥

शम्भोः शिरसीन्दुकला वृषध्वजोऽक्षि च तृतीयमपि चोर्ध्वम् ।

शूल धनुः पिनाकं वामार्धे वा गिरिसुतार्धम् ॥४३॥

Sloka 43.—On the head of Lord Siva, a digit of the Moon should be placed ; his ensign, is a bull ; he has a third eye, high on his fore-head ; he has a trident in one hand and a bow called Pinaka in the other. Or, he may be represented as having Parvati for his left half.

पद्माङ्कितकरचरणः प्रसन्नमूर्तिः सुनीचकेशश्च ।

पद्मासनोपविष्टः पितेव जगतो भवति बुद्धः ॥४४॥

Sloka 44.—The Buddha should be represented seated on a lotus and looking as if he were the father of

mankind, very forgiving, with hands and feet marked with lotuses, with a serene body and sparse hair.

There are two other readings सुनीलकेशश्च and सुनीलकेशश्च. The first means "very dark" and the other "well-trimmed."

आजानुलम्बबाहुः श्रीवत्माङ्कः प्रशान्तमूर्तिश्च ।

दिग्वासास्तरुणो रूपवांश्च कार्योऽर्हतां देवः ॥४५॥

Sloka 45.—The God of the Jains, viz., Jina, should be represented naked, young, handsome and serene in appearance, with his arms reaching the knees and his breast marked with the Sri Vatsa figure.

Sloka 46-48.—The Sun-God's nose, forehead, shanks, thighs, cheeks and breast should be elevated; he should be dressed in the northern style, covering the body from breast to foot. He holds two lotuses born of his hands, in his arms; wears a diadem; his face is adorned with ear-rings; he has a long pearl-necklace and a girdle round his waist. His face has the lustre of the interior of the lotus; his body is covered with an armour; face, pleasant with a smile and has a halo bright with gems (or circle of bright lustre of gems). Such a Sun is auspicious for the architect.

Slokas 49-52.—An idol of the Sun, one cubit high is beneficial ; one that measures two cubits in height bestows wealth ; those of 3 and 4 cubits lead to happiness and plenty respectively. When it is of larger limbs, there will be trouble from the king ; when of shorter limbs, the sculptor will be afflicted with disease ; when of slender belly, impending famine ; when of thin limbs, loss of wealth ; when it has injuries, the maker will die through the fall of a weapon ; when it is bent on the left side, it kills his wife ; on the right, it robs him of his life ; when its eyes are turned upwards, he will become blind ; when bent downwards, he will have worries. Thus, the good and bad effects of all images will have to be assessed as in the case of the Sun-God.

Sloka 12.—In the morning, one should sprinkle the tree with water and cut it on the north-eastern side with

an axe smeared with honey and ghee. The remaining parts are to be cut in a clock-wise manner

पूर्वेण पूर्वोत्तरतोऽथवोदकस्तेद्यदा वृद्धिकस्तदा स्यात् ।

आग्नेयकोणात्क्रमशोऽग्निदाहप्रोगरोगास्तुरगक्षयश्च ॥१३॥

Sloka 13.—If the tree falls down on the east, north-east, or north, it augurs prosperity ; if it falls on the south-east, south, south-west, west and north-west, there will be in order, outbreak of fires, disease, disease, disease and destruction of horses.

यन्नोक्तमस्मिन् वनसम्प्रवेशे निपाताविच्छेदनवृक्षगर्भाः ।

इन्द्रध्वजे वास्तुनि च प्रदिष्टाः पूर्वं मया तेऽत्र तथैव योज्याः ॥१४॥

Sloka 14.—What has not been mentioned here in connection with the topic of 'entering a forest' (*viz.* the fall of trees (Adh. XLIII-20), the cutting and the interior of trees was already (Adh. XLIII-19) explained by me in connection with Indra's banner and construction of houses. (Adh. LIII-122) Those ideas have to be applied here too.

Thus ends the 59th Adhyaya on "Entering a Forest."

Slokas 1-3.—A wise man ought to construct in the north or east a platform for the installation ceremony with four archways and covered with the sprouts of auspicious trees. For the eastern side of the platform are laid down variegated garlands and flags; for the south-eastern one, red ones; for the southern and south-western sites, black ones. They must be white in the west, pale-white in the north-west, variegated in the north and yellow in the north-east.

Slokas 12-13.—The Priest should worship the Fire with the hymns sacred to that God who is to be installed. The symptoms of Fire have been already explained by me on the occasion of dealing with the raising of “Indra’s Banner” (Adh. XLIII-32). A fire filled with smoke, turned to the left and sending sparks continuously is not auspicious. The priest’s failing in memory and moving forward are also inauspicious.

Sloka 14.—When the image has been bathed, clad in a new garment, beautifully adorned with ornaments and worshipped with flowers and perfumes, the priest who installs it should lay it on a well-spread bed.

सुप्तां सगीतनृत्यैर्जागरणैः सम्यगेवमधिवास्य ।
दैवज्ञसम्प्रदिष्टे काले संस्थापनं कुर्यात् ॥१५॥

Sloka 15.—After the sleeping idol has been properly consecrated with the materials for waking up, accompanied by dance and songs, the installation should be done at a time prescribed by the astrologer, i. e., in the bright half of the northern solstice.

Slokas 16-18.—After worshipping the idol with flowers, cloths and unguents, along with the sounds of conchs and musical instruments, it should be taken into the *sanctum sanctorum* with all precaution round the temple, *i. e.*, from left to right. Then giving copious oblations and worshipping Brahmins and those of the religious assembly, the idol should be placed in the pit of the pedestal in which a gold-piece has been deposited. By honouring especially the installer, astrologer, Brahmins, the men of the assembly and the carpenter, one will get all blessed things in this world and heaven in the next.

Sloka 19.—The installing priests of Vishnu are known as Bhagavatas; of the Sun as Magas; of Siva, as Pasupathas (ash-smeared ones); of the divine Mothers as those adepts in the rites of the Mothers' circle; of Brahman, Brahmins; of the Buddha, (all benevolent) of serene mind, as Sakyas; of the Jains, as naked monks. These different priests have to perform, according to the

rules peculiar to each sect, the ceremony for the God whose devotees they are.

Sloka 6.—A goat with spotted neck or head, with the colour of pounded sesamum (a mixture of white and yellow), red eyes, dark or white feet, is commendable. So also is one that is white or dark (कुटिल)

तथा च गर्गः ।

श्वेतो यः कृष्णचरणः कृष्णः श्वेतशोऽपि वा ।

पीतस्ताम्रेक्षणो मूर्ध्नि गले वा पृषतान्वितः ॥

यः कृष्णाण्डः श्वेतो मध्ये कृष्णेन भवति पट्टेन ।

यो वा चरति सशब्दं मन्दं च स शोभनश्छागः ॥७॥

Sloka 7.—A white goat with dark testicles and a dark band in the middle is auspicious. So also is one that walks slowly with a jingling sound. (जटिल)

तथा च गर्गः ।

मन्दं सशब्दं चरति श्वेतः कृष्णाण्डसंयुतः ।

मध्ये कृष्णेन पट्टेन युक्तो यः सोऽपि वृद्धिदः ॥

ऋष्यशिरोरुहपादो यो वा प्राक् पाण्डुरोऽपरे नीलः ।

स भवति शुभकृच्छागः श्लोकश्चाप्यत्र गर्गोक्तः ॥८॥

Sloka 8.—A goat with blue hair on the head, and blue feet, or one with white fore-part and blue hind part brings good luck and the following is the verse composed by Garga.
